General Information

Extended Product Type:	UA75-30-00 24V 50Hz / 24V 60Hz		
Product ID:	1SBL411022R8100		
EAN:	3471522097811		
Catalog Description:	UA75-30-00 24V 50Hz / 24V 60Hz Contactor		
Long Description:	UA75 3-pole contactors for capacitor switching, can be used for the switching of capacitor banks whose inrush current peaks are less than or equal to 100 times nominal ms current. The table below gives the permissible powers according to operational voltage and temperature close to the contactor. It also specifies the maximum peak current \hat{I} values accepted by the contactor. The capacitors must be discharged (maximum residual voltage at terminals \leq 50 V) before being re-energized when the contactors are making. In these conditions, electrical durability of contactors is equal to 100 000 operating cycles. The UA series 3-pole contactors are of the block type design Main poles: 3 main poles - Control circuit: AC operated with laminated magnet circuit - Accessories: a wide range of accessories is available.
