FPGT- Loader

Easy to use software tool for GT series touch panels and FP-Series PLCs to transfer project data without having an engineering system. FPGT Loader can be used to make true copies of a master GT or a master PLC project to one or more target GTs or PLCs. The uploaded data can either be downloaded immediately to another GT or PLC of the same type or saved on disk for later usage.
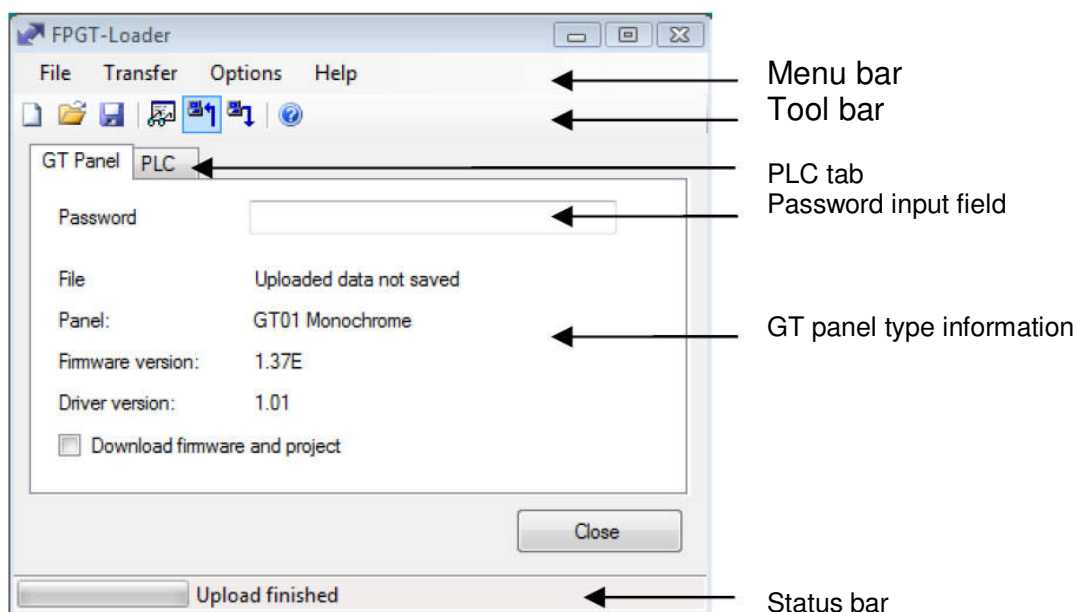

PLC Features:

- Upload program and data
- Download program and data
- User definable register types and ranges of variables
- Include Flash & EEPROM data
- Save PLC project as single file
- Reset errors
- Download PC date & time

HMI Features:

- Read Panel System Information
- Upload Project File
- Download Project File
- Save panel project as single file
- Download Firmware

GT Panel window:

Menu bar
Tool bar

PLC tab
Password input field

GT panel type information

Status bar
