

WM14 96 "Profibus DP"

Three Phase Power Analyser

WM14-96 Profibus IM cod. 8020880 290408

Termination Switch; Switch di terminalizzazione; Abschluss des letzten Gerätes mittels DIP-Schalter; Terminaison du dernier WM14 au moyen de DIP-Switch; Interruptor de terminación.

[P1]-Terminate the first WM14 "a1" positioning the dip-switch in ON on the "Con P" connector and the last WM14 "c1" by connecting T1, T2, T3. Use a two pole shielded cable, about the connection length (from the first to the last instrument) refer to "TAB1".

[P1]-Terminalizzare il primo WM14 "a1" posizionando in ON lo switch nel connettore "Con P" e l'ultimo WM14 "c1" collegando T1, T2, T3. Utilizzare un cavo bipolare schermato, per la sua massima lunghezza (dal primo all'ultimo strumento) riferirsi alla tabella "TAB1".

[P1]-Das erste WM14 "a1" ist mittels DIP-Schalter in Stellung ON am Anschluß "Con P" zu **terminieren**, das letzte WM14 "c1" durch Anschließen von T1, T2, T3. Es ist ein geschirmtes zweidraiges Kabel zu benutzen; bzgl. der Kabellängen (vom ersten zum letzten Instrument) siehe bitte "TAB1".

[P1]-Effectuer la **terminaison** du premier WM14 "a1" en plaçant le Dip-Switch dans la position ON sur le connecteur "Con P" et le dernier WM14 "c1" en raccordant T1,T2,T3. Utiliser un câble faradisé à 2 conducteurs. Pour la longueur du câble entre le premier et le dernier instrument, se référer au tableau "TAB1".

[P1]-**Terminaciones**: colocar el interruptor DIP en ON en el conector "Con P" del primer WM14 "a1" y conectar T1, T2, T3 en el último WM14 "c1". Usar una manguera de dos cables apantallada. Véase "TAB1" para saber la longitud de conexión (desde el primero al último instrumento).

Kbit/s	m
9.6 / 19.2 / 45.45 / 93.75	≤1.200
187.5	≤1.000
500	≤400
1.500	≤200
3.000 / 6.000	≤100

TAB1

[P2]-Terminate the first WM14 "a2" and the last WM14 "c2" by means of the screw terminals T1, T2, T3 as explained above. Use a two pole shielded cable, about the connection length (from the first to the last instrument) refer to "TAB1".

[P2]-Terminalizzare il primo WM14 "a2" e l'ultimo WM14 "c2" tramite i morsetti T1, T2, T3 come spiegato nello schema. Utilizzare un cavo bipolare schermato, per la sua massima lunghezza (dal primo all'ultimo strumento) riferirsi alla tabella "TAB1".

[P2]-Das erste WM14 "a2" und das letzte WM14 "c2" ist durch die Schraubanschlüsse T1, T2, T3 wie oben beschrieben zu **terminieren**. Es ist ein geschirmtes zweidraiges Kabel zu benutzen; bzgl. der Kabellängen (vom ersten zum letzten Instrument) siehe bitte "TAB1".

[P2]-Effectuer la **terminaison** du premier WM14 "a2" et du dernier WM14 "c2" au moyen des connecteurs à vis T1, T2, T3 comme expliqués ci-dessus. Utiliser un câble faradisé à 2 conducteurs. Pour la longueur du câble entre le premier et le dernier instrument, se référer au tableau "TAB1".

[P2]-**Terminaciones**: conectar los terminales de tornillo T1, T2, T3 del primer WM14 "a2" y del último WM14 "c2" tal y como se indica arriba. Usar una manguera de dos cables apantallada. Véase "TAB1" para saber la longitud de conexión (desde el primero al último instrumento).

- (*) The mandatory signals have to be made available by the user.
- (*) I segnali obbligatori devono essere resi disponibili dall'utente.
- (*) Die definierten Signale müssen von den Benutzer verfügbar gemacht werden.
- (*) Les signaux obligatoires doivent être rendus disponibles par l'utilisateur.
- (*) Estas señales deben ser habilitadas por el usuario.

Pin no.	Signal	Meaning	Note
1	Shield	Shield/ protective ground	Not connected
2	M24	Ground of 24V output voltage	Not connected
3	1B (*)	Receive data / transmission data plus	RxD/TxD-P
4	CNTR-P (RTS)	Control signal for repeater (direction control)	
5	GND (*)	Data transmission potential (ground to 5 V)	DGND
6	VP (*)	Supply voltage of the terminating resistor-P, (P5V)	
7	P24	Output voltage plus 24V	Not connected
8	1A (*)	Receive data / transmission data negative	RxD/TxD-N
9	CNTR-N	Control signal for repeater (direction control)	Not connected

ENGLISH
[1]-CT connection, 4-wire system (3P.n). F= 315mA.
[2]-CT/VT connection, 4-wire system (3P.n). F= 315mA.
[3]-ARON CT/VT connection (3P.A). F= 315mA.
[4]-2-phase CT connection (2P). F= 315mA.
[5]-3-phase CT connection, balanced load (3P). F= 315mA. **Note:** a 2 wire connection for voltage measurement is available across the 17 and 15 terminals.
[6]-1-phase CT connection (1P). F= 315mA.
[7]-Power supply connection

Important: the connection of the CT's to earth must be carried out according to the electrical diagrams shown above. **The direct connection is not allowed.**
[P1]-[P2]-Profibus network connections (a: first instrument, ..., c: last instrument).

■ TECHNICAL SPECIFICATIONS

Hardware: microprocessor based. **Keypad:** 3 keys.

Type of electrical system: Selectable: 1-phase, 2-phase, 3-phase with or without neutral unbal. load; 3-phase with neutral bal. load; 3-phase ARON. **Display:** LED 3x3 DGT; digit height 14mm. **Display refresh time:** 700ms. **Rated input current:** 5A. **Max input current:** 6A. **Overload:** 36A (6*I_{max}) for 500ms. **Voltage permanent:** 1.2 * max function range value. **Rated input voltage AV5:** 660V L-L; AV6: 208V L-L. **Wave-form:** sinusoidal or distorted wave. **Measurement method:** TRMS. **Accuracy:** W-VA: ±(1% FS + 1DGT) from 0.25A to 6A, ±(1% FS + 5 DGT) from 0.03 to 0.25A; var: ±(2% FS + 1DGT) from 0.25 to 6A, ±(2% FS + 5 DGT) from 0.03 to 0.25A; V-VA: ±(1% FS + 1DGT) from 0.25A to 6A, ±(1% FS + 5 DGT) from 0.03 to 0.25A; A-VA: ±(1% FS + 1DGT) from 0.25A to 6A, ±(1% FS + 5 DGT) from 0.03 to 0.25A; **Active energy:** class 1 (start up current: 10mA); **Reactive energy:** class 2 (start up current: 10mA); **Var:** ±(1% FS + 1DGT) from 0.25A to 6A, ±(1% FS + 5 DGT) from 0.03 to 0.25A; **Power factor:** programmable window alarm. **Control:** 1 programmable alarm. **Peak factor:** <3 (10A peak max). **Temperature drift:** ≤200ppm/C. **Current transformer:** prog. ratio from 1 to 999. **Rapporto TA:** programmabile da 1 a 999. **Rapporto TV:** programmabile da 1,0 a 99.9. **Input impedance (X-OPTIONS):** 380/660V_{L-L} (AV5) 1 MΩ ±1%, 120/208V_{L-L} (AV6) 1 MΩ ±1%. **Current, %:** 453 KΩ ±5%, Current ≤ 0.02%. **Input impedance 380/660V_{L-L} (AV5) 1 MΩ ±1%:** 120/208V_{L-L} (AV6) 1 MΩ ±1%. **Current, %:** 453 KΩ ±5%, Current ≤ 0.02%. **Power demand:** integrated value in a programmable time from 1 to 30 min. **Thermal current:** integrated value in a programmable time from 1 to 30 min. **Digital filter:** campo: da 0 a 100% del campo visualizzato; coefficiente di filtraggio: da 0 a 16. **EMC:** emissioni: EN50084-1 (residenziale, classe A) Immunità: EN61000-6-2 (industriale, classe A). **Controllo tensione:** allarme a finestra programmabile. **Controllo An:** allarme programmabile. **Fattore di cresta:** <3 (10A picco max). **Deriva termica:** ≤200ppm/C. **Rapporto TA:** programmabile da 1 a 999. **Rapporto TV:** programmabile da 1,0 a 99.9. **Impedenza d'ingresso 380/660V_{L-L} (AV5) 1 MΩ ±1%, 120/208V_{L-L} (AV6) 1 MΩ ±1%:** Corrente: ≤0.02Ω. **Potenza media:** valore integrato in un intervallo di tempo programmabile da 1 a 30 min. **Corrente termica:** valore integrato in un intervallo di tempo programmabile da 1 a 30 min. **Filtro digitale:** campo: da 0 a 100% del campo visualizzato; coefficiente di filtraggio: da 0 a 16. **EMC:** emissioni: EN50084-1 (residenziale, classe A) Immunità: EN61000-6-2 (industriale, classe A). **Alimentazione:** da 90 a 260VAC/DC. **Temperatura di funzionamento:** da 0° a +50°C. **Temperatura di immagazzinamento:** da -10° a +60°C. **Umidità relativa (senza condensa):** <90%. **Categoria di installazione (IEC 60664):** Cat III. **Isolamento:** 4kV per 60s tra ing. di misura e alimentazione; 2kV per 60s tra alimentazione e porta di comunicazione Profibus. Alimentazione DC: 500V tra ing. di misura e alimentazione e porta Profibus; 2kV per 60s tra ing. di misura, alimentazione e porta Profibus. **Rigidità dielettrica:** 4kV per 60s. **Norme di riferimento:** EN61010, IEC 60664. **Approvazioni:** CE. **Connessioni:** a carrello, sezione max del cavo: 2,5 mm². **Grado di protezione:** IP65; Kennzeichnung: CE. **Connessioni:** Schraubklemmen; Max. Leiter-querschnitt: 2,5mm². **Schutzart:** Front: IP65; Anschlüsse: IP20. **Montage:** Schrankenbau. **Gehäusematerial:** ABS, selbstlöschend: UL94 V-0. **Abmessungen:** Siehe Abbildungen oben. **Gewicht:** Ca. 400g (einschließlich Verpackung). **Zusätzliche technische Daten:** Umgebungsbedingungen: Nutzung nur im Innenbereich, Verschmutzungsgrad 2, max. Höhe 2.000m ü.NN; max. Kabelstärke: AWG 14.

■ OUTPUT SPECIFICATIONS
Profibus: Tipo: DP-V0, abilitato solo per lettura dati. **Collegamenti:** distanza massima (vedi tabella TAB1 sopra) secondo IEC61158, connettore 9-poli più morsettiera. **Indirizzo:** da 1 a 125, selezionabile da tastiera. **Protocollo:** profibus DP-V0. **Dati:** Dinamici (solo lettura), sistemi, variabili di fase ed energie. **Baud-rate:** fino a 6Mbit/s (dipendente dalla lunghezza dei cavi e dal numero di strumenti collegati).

■ CARATTERISTICHE DI USCITA
Profibus: Tipo: DP-V0, attivato solo per lettura dati. **Collegamenti:** distanza massima (vedi tabella TAB1 sopra) secondo IEC61158, connettore 9-poli più morsettiera. **Indirizzo:** da 1 a 125, selezionabile da tastiera. **Protocollo:** profibus DP-V0. **Dati:** Dinamici (solo lettura), sistemi, variabili di fase ed energie. **Baud-rate:** fino a 6Mbit/s (dipendente dalla lunghezza dei cavi e dal numero di strumenti collegati).

Belluno (Italy)
Tel. +39 043 931000,
Fax +39 043 931021

■ CARATTERISTICHE DI USCITA
Profibus: Typ: DP-V0, aktiviert nur für lesen der Daten. **Anschluß:** max. Entfernung (1200m@9.6kbit/s, 100m@6Mbit/s) gemäß IEC61158, 9-poliger Stecker. **Adressen:** 1 bis 125, über Tastatur wählbar. **Protokoll:** profibus DP-V0. **Daten:** dynamisch (nur lesen) System, Phasen, Variablen und Energien. **Baudrate:** Bis 6Mbit/s (abhängig von der Länge der Kabel und der Anzahl von Geräten im Netz).

■ CARACTÉRISTIQUES DE SORTIE
Profibus: Typ: DP-V0, activé seulement pour la lecture des données. **Connexions:** distance max. (1200m@9.6kbit/s, 100m@6Mbit/s) selon IEC61158, connecteur 9-pôles. **Adresses:** 1 à 125, sélectionnable par clavier. **Protocole:** profibus DP-V0. **Données:** dynamiques (lecture seule). Réseau, variables de phase et énergies. **Vitesse de transmission:** jusqu'à 6Mbit/s (dépendant de la longueur des câbles et du nombre d'appareils sur le réseau).

■ CARACTÉRISTIQUES DE SORTIE
Profibus (opcional): Tipo: DP-V0, habilitado sólo para lectura de datos. **Conexiones:** máx. distancia (1200m@9.6kbit/s, 100m@6Mbit/s) según IEC61158, conector 9 polos. **Direcciones:** 1 a 125, seleccionable por medio de teclado. **Protocolo:** profibus DP-V0. **Datos:** dinámicos (sólo lectura) Sistema, variables de fase y energías. **Velocidad baudios:** hasta 6Mbit/s (según la longitud de los cables y el número de equipos en la red).

ENGLISH

Safety Precautions

Read carefully the instruction manual. If the instrument is used in a manner not specified by the producer, the protection provided by the instrument may be impaired. **Maintenance:** make sure that the connections are correctly carried out in order to avoid any malfunctioning or damage to the instrument. To keep the instrument clean, use a slightly damp cloth; do not use any abrasives or solvents. We recommend to disconnect the instrument before cleaning it.

Key Pad Functions

To access programming phase press the key **[S]** for at least 10s, to confirm the value, press the key **[S]**.

On measuring mode: scroll to the next displayed page. On programming mode: scroll to the previously displayed page. On programming mode: scroll to the previous function or parameter value increase.

On measuring mode: scroll to the visualizzazione della pagina misura successiva. Nel modo programmazione: passa alla funzione successiva o incrementa i valori. **On measuring mode:** passa alla visualizzazione della pagina misura precedente. Nel modo programmazione: passa alla funzione precedente o decrementa i valori.

RESET AND ACCESS TO THE MAIN MENU

A.R.E : reset the alarms.

P.R.E : reset the W dmd max and A max values.

PAS : if you enter the correct password (the default password is 0) you access to the main menu.

THE MAIN MENU FUNCTIONS

n_P : new password, change password function.

SYS : electrical system selection, choose the correct electrical system: 3Pn: 3-phase unbalanced load with or without neutral, 3PA: 3-phase ARON, 3P: 3-phases charge non équilibrée avec ou sans neutre, 3PA: 3-phases ARON, 3P: 3-phases charge équilibrée, 2P: 2-phases, 1P: monofase.

Ctr: current transformer ratio: select the needed value from 1 to 999.

Example: if the primary of the CT being connected is 300A and the secondary is 5A, the CT ratio corresponds to 60 (obtained from the calculation: 300/5).

Utr: voltage transformer ratio: select the needed value from 1.0 to 99.9. **Example:** if the primary of the VT being connected is 5kV and the secondary is 100V, the VT ratio will be 50 (given by 5000/100).

P.i.t. : integration time for the calculation of power dmd: select the required value from 1 to 30 minutes.

A.i.t. : current integration time of thermalical current: select the required value from 1 to 30 minutes.

Fis : filtering range programming to set the operating range of the digital filter. The value is expressed as % of the full scale value.

Fic : selection of filtering coefficient value from 1 to 16. Increasing the value, also the stability and the settling time of the measurements are increased.

AL. **Up** : Up alarm (V LN), max value of the variable over which the alarm is activated.
