## DATASHEET - FRCMM-40/4/03-G/A

## Residual current circuit breaker (RCCB), 40A, 4p, 300mA, type G/A

Part no. FRCMM-40/4/03-G/A 170304 Catalog No.

**Alternate Catalog** 

FRCMM-40/4/03-G/A

1666293

**EL-Nummer** (Norway)

| Standard front dimension   |                    | mm   | 45                         |  |
| Device height  |                    | mm   | 80                         |  |
| Built-in width   |                    | mm   | 70 (4TE)                   |  |

Quick attachment with 2 latch positions for DIN-rail IEC/EN 60715

| Degree of Protection                           |     | IP20, IP40 with suitable enclosure  |
|--|-----|---|
| Terminals top and bottom                       |     | Twin-purpose terminals  |
| Terminal protection                            |     | Busbar tag shroud to BGV A3, ÖVE-EN 6                                     |
| Terminal cross-section                         |     |   |
| Solid  | mn  | 1.5 - 35  |
| Stranded                                       | mn  | 1 <sup>2</sup> 2 x 16   |
| Terminal cross-section                         |     | M5 (with cross-recessed screw as defined in EN ISO 4757-Z2, Pozidriv PZ2) |
| Tightening torque of fixing screws             | N/ı | n 2 - 2.4   |
| Thickness of busbar material                   | mn  | n 0.8 - 2   |
| Admissible ambient temperature range           | °C  | -25 - +40   |
| Permissible storage and transport temperatures | °C  | -35 - +60   |
| Climatic proofing                              |     | 25-55°C/90-95% relative humidity according to IEC 60068-2                 |
| Mounting position                              |     | As required   |
| Contact position indicator                     |     | red / green   |
| Trip indication                                |     | white / blue  |

# Design verification as per IEC/EN 61439

| 2001gii 1011110ution 40 poi 120, 211 01 100   |                   |    |  |
|---|-------------------|----|--|
| Technical data for design verification  |                   |    |  |
| Rated operational current for specified heat dissipation  | In                | Α  | 40   |
| Heat dissipation per pole, current-dependent  | $P_{\text{vid}}$  | W  | 2.2  |
| Equipment heat dissipation, current-dependent   | P <sub>vid</sub>  | W  | 8.8  |
| Static heat dissipation, non-current-dependent  | $P_{vs}$          | W  | 0  |
| Heat dissipation capacity   | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.  |                   | °C | -25  |
| Operating ambient temperature max.  |                   | °C | 75   |
|   |                   |    | Starting at 40 °C, the max. permissible continuous current decreases by 2.5% for every 1 °C                                      |
| IEC/EN 61439 design verification  |                   |    |  |
| 10.2 Strength of materials and parts  |                   |    |  |
| 10.2.2 Corrosion resistance   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$ |                   |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                   |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions   |                   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances  |                   |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections   |                   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors  |                   |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties  |                   |    |  |
| 10.9.2 Power-frequency electric strength  |                   |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage  |                   |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material  |                   |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise  |                   |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating  |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility   |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function   |                   |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
|   |                   |    |  |
