

Position switch, 1N/O+1N/C, wide, IP65\_x

**Part no.** ATR-11-1-IA  
**Catalog No.** 034868  
**Alternate Catalog No.** ATR-11-1-IA

### Delivery program

|   |  |    |  |
|---|--|----|--|
| Basic function  |  |    | Position switches<br>Safety position switches              |
| Part group reference  |  |    | ATR  |
| Product range   |  |    | Rounded plunger  |
| Degree of Protection  |  |    | IP65   |
| Features  |  |    | Basic device, expandable                                   |
| Ambient temperature   |  | °C | -25 - +70  |
| <b>Contacts</b>   |  |    |  |
| N/O = Normally open   |  |    | 1 N/O  |
| N/C = Normally closed   |  |    | 1 NC   |
| Notes   |  |    | = safety function, by positive opening to IEC/EN 60947-5-1 |
| Contact sequence  |  |    |  |
| Contact travel: <input checked="" type="checkbox"/> = Contact closed <input type="checkbox"/> = Contact open            |  |    | <br>Zw = 4.2 mm  |
| Positive opening (ZW)   |  |    | yes  |
| <b>Colour</b>   |  |    |  |
| Enclosure covers  |  |    | Grey   |
| Enclosure covers  |  |    |  |
| Housing   |  |    | Insulated material   |
| Connection type   |  |    | Screw terminal   |
| <b>Notes</b> For degree of protection IP65, use V-M20 (206910) cable glands with connecting thread of max. 9 mm length. |  |    |  |

### Technical data

| max. fuse                                |                | A gG/gL | 6        |

### Mechanical variables

|  |              |                   |                                  |
|--|--------------|-------------------|----------------------------------|
| Lifespan, mechanical                                       | Operations   | x 10 <sup>6</sup> | 20                               |
| <b>Notes</b>   |              |                   | (If approached from the side: 6) |
| Contact temperature of roller head                         |              | °C                | ≤ 100                            |
| Mechanical shock resistance (half-sinusoidal shock, 20 ms) |              |                   |                                  |
| Standard-action contact                                    |              | g                 | 25                               |
| Snap-action contact  |              | g                 | 2                                |
| Operating frequency  | Operations/h |                   | ≤ 6000                           |

### Actuation

|  |  |     |                                   |
|--|--|-----|-----------------------------------|
| Mechanical                                 |  |     |                                   |
| Actuating force at beginning/end of stroke |  | N   | 1.0/8.0                           |
| Max. operating speed with DIN cam          |  | m/s | 1/1                               |
| <b>Notes</b>                               |  |     | for angle of actuation α = 0°/30° |

## Design verification as per IEC/EN 61439

|  |                   |    |  |
|--|-------------------|----|--|
| Technical data for design verification   |                   |    |  |
| Rated operational current for specified heat dissipation   | I <sub>n</sub>    | A  | 6  |
| Heat dissipation per pole, current-dependent   | P <sub>vid</sub>  | W  | 0.13   |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub>  | W  | 0  |
| Static heat dissipation, non-current-dependent   | P <sub>vs</sub>   | W  | 0  |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.   |                   | °C | -25  |
| Operating ambient temperature max.   |                   | °C | 70   |
| IEC/EN 61439 design verification   |                   |    |  |
| 10.2 Strength of materials and parts   |                   |    |  |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.                         |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.                         |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.                         |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.6 Mechanical impact   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.2.7 Inscriptions  |                   |    | Meets the product standard's requirements.                         |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.4 Clearances and creepage distances   |                   |    | Meets the product standard's requirements.                         |
| 10.5 Protection against electric shock   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.6 Incorporation of switching devices and components   |                   |    | Does not apply, since the entire switchgear needs to be evaluated. |
| 10.7 Internal electrical circuits and connections  |                   |    | Is the panel builder's responsibility.                             |
| 10.8 Connections for external conductors   |                   |    | Is the panel builder's responsibility.                             |
| 10.9 Insulation properties   |                   |    |  |

|  |  |  |
|--|--|--|
| 10.9.2 Power-frequency electric strength                 |  | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         |  | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material |  | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   |  | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               |  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      |  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                |  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
