### DATASHEET - DILK33-10(400V50HZ,440V60HZ)

Contactor for capacitors, with series resistors, 33.3 kVAr, 400 V 50 Hz, 440 V 60 Hz

Part no. Catalog No. Alternate Catalog No.

DILK33-10(400V50HZ,440V60HZ) 294056 og XTCC033D10N

#### **Delivery program**

| Product range   |   |      | DILK Contactors for capacitors                                     |
|---|---|------|--|
| Application   |   |      | Contactors for power factor correction                             |
| Description   |   |      | with series resistors  |
| Rated power of AC-6b three-phase capacitors, 50 - 60 Hz |   |      |  |
| Open  |   |      |  |
| 230 V   | ۵ | kVAr | 20   |
| 400 V   | ٥ | kVAr | 33.3   |
| 525 V   | ٥ | kVAr | 40   |
| 690 V   | ۵ | kVAr | 55   |
| Contact sequence  |   |      | $\begin{array}{c} A \\ A $ |
| Actuating voltage                                       |   |      | 400 V 50 Hz, 440 V 60 Hz   |

Instructions In the case of group compensation multi-stage capacitor banks are connected to the mains, as required. Transient currents of up to 180 × le could flow between the capacitors. The capacitors are pre-charged via the early-make auxiliary contacts and the fitted wire resistors, thereby reducing the inrush current. The main contacts then close in a time-delayed manner and bring about the continuous current. Due to their special contacts, the contactors for the capacitors are weld-resistant for capacitors with inrush current peaks Due to their special contacts, the contactors for capacitors with inrush current peaks up to 180 × l<sub>e</sub>.
