AF30Z-30-11-20 12-20VDC Contactor

Buy it at Electric Automation Network

AF30Z contactors are used for controlling power circuits up to 690 V AC and 220 V DC. They are mainly used for controlling 3-phase motors, non-inductive or slightly inductive loads. AF..Z contactors include an electronic coil interface accepting a wide control voltage Uc min. ... Uc max. Only four coils cover control voltages between 24...250 V 50/60 Hz or 12...250 V DC. AF. Z contactors can manage large control voltage variations. One coil can be used for different control voltages used worldwide without any coil change. AF..Z contactors allow direct control by PLC-output  $\geq$  24 V DC 500 mA and obtain a reduced holding coil consumption. AF..Z contactors withstand short voltage dips and voltage sags (SEMI F47-0706 compliance) between 24...250 V 50/60 Hz AF..Z contactors have built-in surge protection and do not require additional surge suppressors The AF... series 2-stack 3-pole contactors are of the block type design. - Main poles and auxiliary contact blocks: 3 main poles with a nonremovable front-mounted 1 N.O. + 1 N.C. auxiliary contact block, side-mounted addon auxiliary contact blocks (mechanically-linked auxiliary contacts compliant with Annex L of IEC 60947-5-1 including the "Mechanically Linked" symbol on the contactor side. N.C. mirror contacts compliant with Annex F of IEC 60947-4-1) -Control circuit: DC operated for AF..Z-30-...-20 contactors. Only AF..Z-30-...-20 contactors need to respect the polarity on the coil terminals (A1+ and A2-). -Accessories: a wide range of accessories is available. Note: 2-stack contactors available in some countries: please consult your ABB representative.
