LT80-40 Terminal Shroud

Buy it at Electric Automation Network

LT80-40 terminal shrouds are designed to protect the main terminals against accidental direct contact and to provide a comprehensive IP 20 degree of protection. Designed for rigid cables or flexible cables with insulated ferrules including a stripping length ≥ 18 mm. Safety and protection: make your installation safe, using a compact IP20 protection on the main terminals of AF80 4-pole contactors. Easy to install: save time thanks to a compact design and a fast clipping on each top and bottom parts of the contactors. Optimum interface: Use the same protection whatever the cable cross-section on the contactor.
