Safety isolating transformer

RKD 200/2x12

Picture shows RKD 60 2x12

Advantages

Minimum size at high power
Low weight
Double input voltage for series or parallel connection
Minimal no-load losses
Outstanding temperature behaviour thanks to low magnetic leakage field
Very low noise field

Applications

As a mains transformer for adjustment of the voltage and simple electrical isolation.

As an isolating transformer for the safe electrical isolation of the input and output sides. The transformer may be used to set up protective separation as a protective measure in accordance with VDE 0100.

As a safety isolating transformer for the safe electrical isolation of the input and output sides. The transformer is suitable for creating SELV and PELV circuits because of the limit on the output voltage.

Sample application

PRI:

Parallel connection (115V): brown with white/violet with blue
Series connection (230V): violet with white

SEC:

Parallel connection: red with grey/black with orange
Series connection: black with grey
