Product Description

Type Selection

The Carpark Software is an application that gives you information achieved from your Carpark installation. It consists of two components, the server and the client. The server is installed on a Windows-based PC and manages the data traffic between the Carpark facility and the Carpark client. The Carpark client is installed on a Windows-based PC that is connected to LAN/Internet, which in turn is connected to the PC which runs the Server. The client can monitor the parking facility in real-time. It can, once connected to the Carpark Server Software
