Type Code RCI 10 , Weight 0.716 Kg , Approval CE, EAC, UL

[Buy it at Electric Automation Network](#)

RCI reversing contactors are designed for demanding forward/reverse control of 3-phase AC motors. The zero cross-switching method ensures very fast and precise motor control and virtually eliminates EMC emission. The RCI reversing contactor is ideal where fast switching capability and long life are essential. Operational current up to 10A (AC-3) Built-in interlock between forward and reverse DIN-rail mountable Built-in varistor protection Universal control voltage Burst firing (zero cross) LED status indicator IP 20 protection Problem-free specification according to industry standard Easy and quick installation

Type Code	RCI 10
Weight	0.716 Kg
Approval	CE, EAC, UL
Control volt. DC	5 - 24 V
Controlled phases	2
EAN no.	5702423108749
Max. load [A]	10 A

Descript.	REVERSING CONTACTOR
Prod. Group	Contactors and motor starters
Prod. name	REVERSING CONTACTOR
Supply volt. AC	400 V
UL approval file	E198251
