

# Circuit-breaker 4p, 1000A, AF

Part no. IZMX16N4-U10W Article no. 123253

## **Delivery programme**

Delivery programme			
Product range			Air circuit-breakers/switch-disconnectors
Product range			Open circuit-breakers
Current Range			Up to 4000 A
Protective function			Universal protection
Installation type			Withdrawable
Construction size			IZMX16
Release system			Electronic release
Standard/Approval			IEC
Number of poles			4 pole
Degree of Protection			IP20, IP55 with protective cover, IP41 door sealing frame
			suitable for zone selectivity suitable for communication integrated system monitor and 4-character display optionally fittable by user with comprehensive accessories
Rated current = rated uninterrupted current	$\boldsymbol{I}_n = \boldsymbol{I}_u$	Α	1000
Breaking capacity Icu = Ics to 440 V 50/60 Hz	I <sub>cu</sub>	kA	50
Breaking capacity Ics to 440 V 50/60 Hz	I <sub>cs</sub>	kA	50
Overload release, min.	I <sub>r</sub>	Α	500
Overload release, max.	I <sub>r</sub>	Α	1000
Non-delayed  1	$I_i = I_n \times \dots$		2 - 12, OFF
Delayed >	$I_{sd} = I_r \times \dots$		2 - 10
Notes			
Main terminals not included, need to be ordered separately.			
Note concerning the product			

Cassette needs to be ordered separately.

### **Technical data**

#### General

delleral			
Standards			IEC/EN 60947
Ambient temperature			
Storage	θ	°C	-25 - +70 (device with LCD-display -20 - +70)
Operating (open)		°C	-25 - +70 (device with LCD-display -20 - +70)
Mounting position			30° 30°
			30° 30°
Utilization category			В
Degree of Protection			IP20, IP55 with protective cover, IP41 door sealing frame
Direction of incoming supply			as required

### **Main conducting paths**

Main conducting paths			
Rated current = rated uninterrupted current	$I_n = I_u$	Α	1000
Rated uninterrupted current at 50 °C	I <sub>u</sub>	Α	1000
Rated uninterrupted current at 60 °C	I <sub>u</sub>	Α	1000
Rated uninterrupted current at 70 °C	I <sub>u</sub>	Α	1000
Rated impulse withstand voltage	$U_{imp}$	V AC	12000
Rated operational voltage	U <sub>e</sub>	V AC	690
Use in IT electrical power networks up to U = 440 V	I <sub>IT</sub>	kA	23
Overvoltage category/pollution degree			III/3
Rated insulation voltage	Ui	V	1000
Switching capacity			
Rated short-circuit making capacity	I <sub>cm</sub>		
up to 440 V 50/60 Hz	I <sub>cm</sub>	kA	105
up to 690 V 50/60 Hz	I <sub>cm</sub>	kA	88
Rated short-time withstand current 50/60 Hz			
t=1 s	I <sub>cw</sub>	kA	42
Rated short-circuit breaking capacity I <sub>cn</sub>	I <sub>cn</sub>		
IEC/EN 60947 operating sequence I <sub>cu</sub> O-t-CO			
up to 240 V 50/60 Hz	I <sub>cu</sub>	kA	85
up to 440 V 50/60 Hz	I <sub>cu</sub>	kA	50
up to 690 V 50/60 Hz		kA	42
IEC/EN 60947 operating sequence I <sub>cs</sub> O-t-CO-t-CO	I <sub>cu</sub>	NA.	72
		I. A	
up to 240 V 50/60 Hz	I <sub>cs</sub>	kA	50
up to 440 V 50/60 Hz	I <sub>cs</sub>	kA	50
up to 690 V 50/60 Hz	I <sub>cs</sub>	kA	42
Operating times			
Closing delay via spring release		ms	30
Total opening delay via shunt release		ms	25
Total opening delay via undervoltage release		ms	50
Total opening delay on non-delayed short-circuit release (up to complete arc quenching)		ms	25
Lifespan		S	
Lifespan, mechanical	Switching cycles (ON/ OFF)		12500
Lifespan, mechanical with maintenance	Switching		20000
	cycles (ON/ OFF)		
Lifespan, electrical	Switching cycles (ON/ OFF)		10000
Lifespan, electrical with maintenance	Switching cycles (ON/ OFF)		10000
Maximum operating frequency	Operations/h		60
Heat dissipation at rated current I <sub>n</sub>			
Withdrawable units (switch with cassette)		W	125
Weight			
Withdrawable			
3-pole		kg	28
4-pole		kg	33
Cassette			
3 pole		kg	18
4 pole		kg	21
Terminal capacities			
Copper bar			
Fixed mounting			

Black	mm	2 x 5 x 60
Withdrawable units		
Black	mm	2 x 5 x 60
		These are values used in separate switchgear. The actual values will depend on the temperature around the circuit-breaker, which is influenced by the ambient temperature, the degree of protection (IP), the mounting height, the partitions, and any external ventilation. Depending on the specific switchgear design, this may result in derating, which can then be compensated for by increasing the cross-sectional area. Temperature rise tests in the specific switchgear can provide specific and detailed information.
		Permissible continuous current for circuit-breakers operating in switchboards at various internal ambient temperatures. The switchboard's internal ambient temperature should be estimated using the calculation methods of IEC regulation.

# Design verification as per IEC/EN 61439

3			
Technical data for design verification			
Rated operational current for specified heat dissipation	In	Α	1000
Equipment heat dissipation, current-dependent	P <sub>vid</sub>	W	125
Operating ambient temperature min.		°C	-25
Operating ambient temperature max.		°C	70
IEC/EN 61439 design verification			
10.2 Strength of materials and parts			
10.2.2 Corrosion resistance			Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures			Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat			Meets the product standard's requirements.
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects			Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation			Meets the product standard's requirements.
10.2.5 Lifting			Does not apply, since the entire switchgear needs to be evaluated.
10.2.6 Mechanical impact			Does not apply, since the entire switchgear needs to be evaluated.
10.2.7 Inscriptions			Meets the product standard's requirements.
10.3 Degree of protection of ASSEMBLIES			Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distances			Meets the product standard's requirements.
10.5 Protection against electric shock			Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components			Does not apply, since the entire switchgear needs to be evaluated.
10.7 Internal electrical circuits and connections			Is the panel builder's responsibility.
10.8 Connections for external conductors			Is the panel builder's responsibility.
10.9 Insulation properties			
10.9.2 Power-frequency electric strength			Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage			Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material			Is the panel builder's responsibility.
10.10 Temperature rise			The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating			Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.12 Electromagnetic compatibility			Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function			The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

## **Technical data ETIM 6.0**

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation prot. (EC000228)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (ecl@ss8.1-27-37-04-09 [AJZ716010])

proteotion (conesson 27 or or or protein)		
Rated permanent current lu	Α	1000
Rated voltage	V	690 - 690
Rated short-circuit breaking capacity Icu at 400 V, 50 Hz	kA	50
Overload release current setting	Α	500 - 1000
Adjustment range short-term delayed short-circuit release	Α	2000 - 10000
Adjustment range undelayed short-circuit release	Α	2000 - 12000

Rail connection  Built-in device slide-in technique (withdrawable)  Suitable for DIN rail (top hat rail) mounting  DIN rail (top hat rail) mounting optional  No  No  No  No  No  No  No  No  No  N		
Device construction Suitable for DIN rail (top hat rail) mounting DIN rail (top hat rail) mounting optional Number of auxiliary contacts as normally closed contact Number of auxiliary contacts as normally open contact Number of auxiliary contacts as normally open contact Number of auxiliary contacts as change-over contact Number of auxiliary contacts as change-over contact Switched-off indicator available Nith under voltage release Noth under voltage release Nother of poles Position of connection for main current circuit Supplete device with protection unit Number of indicator available Nother drive integrated Nother drive optional Nother drive optional	Integrated earth fault protection	No
Suitable for DIN rail (top hat rail) mounting DIN rail (top hat rail) mounting optional Number of auxiliary contacts as normally closed contact Number of auxiliary contacts as normally open contact Number of auxiliary contacts as change-over contact No	Type of electrical connection of main circuit	Rail connection
Number of auxiliary contacts as normally closed contact Number of auxiliary contacts as normally open contact Number of auxiliary contacts as normally open contact Number of auxiliary contacts as change-over contact Number of auxiliary contacts as change-over contact  Switched-off indicator available Yes With under voltage release No Number of poles According to connection for main current circuit Back side For control element Complete device with protection unit Wotor drive integrated Motor drive optional  No	Device construction	Built-in device slide-in technique (withdrawable)
Number of auxiliary contacts as normally closed contact  Number of auxiliary contacts as normally open contact  Number of auxiliary contacts as change-over contact  Number of auxiliary contacts as change-over contact  Number of auxiliary contacts as change-over contact  Number of indicator available  No  Number of poles  No  Number of poles  Account of connection for main current circuit  No  Number of connection for main current circuit  No  Number of control element  Complete device with protection unit  No  Notor drive integrated  No  No  No  No  No  No  No  No  No  N	Suitable for DIN rail (top hat rail) mounting	No
Number of auxiliary contacts as normally open contact  Number of auxiliary contacts as change-over contact  Switched-off indicator available  With under voltage release  No  Number of poles  Position of connection for main current circuit  Supper of control element  Complete device with protection unit  Wotor drive integrated  No  Ves  Motor drive optional  O  O  O  O  O  O  O  O  O  O  O  O  O	DIN rail (top hat rail) mounting optional	No
Number of auxiliary contacts as change-over contact  Switched-off indicator available  With under voltage release  With under of poles  Position of connection for main current circuit  Suppe of control element  Complete device with protection unit  Wotor drive integrated  Wotor drive optional  2  Yes  Accomplete device with protection unit  Wotor drive optional	Number of auxiliary contacts as normally closed contact	0
Switched-off indicator available  With under voltage release  No  Number of poles  Position of connection for main current circuit  Supplete device with protection unit  Ves  Votor drive optional  Yes  Yes  Votor drive optional  Yes  No  Yes  Votor drive optional	Number of auxiliary contacts as normally open contact	0
With under voltage release No Number of poles 4 Position of connection for main current circuit Supplete device with protection unit Ves Votor drive optional No	Number of auxiliary contacts as change-over contact	2
Number of poles  4 Position of connection for main current circuit  Supplete device with protection unit  Motor drive integrated  Motor drive optional  4  Back side  Push button  Yes  No  Yes	Switched-off indicator available	Yes
Position of connection for main current circuit  Fype of control element  Complete device with protection unit  Ves  Wotor drive optional  Back side  Push button  Yes  Yes	With under voltage release	No
Type of control element Complete device with protection unit Wotor drive optional  Push button Yes  No Yes	Number of poles	4
Complete device with protection unit  Yes  Motor drive optional  Yes  Yes	Position of connection for main current circuit	Back side
Motor drive integrated No Yes	Type of control element	Push button
Motor drive optional Yes	Complete device with protection unit	Yes
	Motor drive integrated	No
Degree of protection (IP)	Motor drive optional	Yes
	Degree of protection (IP)	IP20
