CABLE GLAND V-TEC M20X1,5 GRCL

Buy it at [Electric Automation Network](#)

The quickest and most convenient way of providing strain relief and tightness with cable glands on junction boxes and housings is with the tried-and-trusted V-TEC VM cable glands from OBO. With the integrated sealing lip and the special OBO lamella technology protection class IP68 is achieved. Strain relief and tightness have been tested to DIN en 50262.

The connecting threads are metric and are therefore suitable for universal use. Even screwed in place, the fitting is there for ever, as the optimum thread adjustment with the right pitch ensures permanent resistance to shaking.

Applications: From private housing with junction boxes up to industrial applications in the distributor cabinet.

Temperature range: -20 °C to +65 °C
