

Reference: T 160 M32

Code: 2007097

Junction box with 10xM32 entries, 190x150x77, Light grey, 7035, Polypropylene, Glass-fibre reinforced, PP/ GF

Buy it at Electric Automation Network

The junction boxes are made of a thermoplastic polypropylene polymer with plug-in seals made of ethylene vinyl acetate (EVA). This allows installation of cables either directly through the 7x M25 + 5x M32 seals, or the seals can be cut with a knife at the pre-marked points, in order to create an insertion opening for cables or pipes. Alternatively, cable glands can be pushed through the openings instead of the seals and locked with a locknut from the inside.

The junction boxes can be mounted on mounting plates in the openings on the floor using steel screws 3.5×9.5 .

Clear internal dimensions: 176x135x67 mm Cover with labelling panel and lead-sealed.
