

RGC1D, RGS1D

DC switching, solid state relays

Main features

- IGBT power semiconductor
- 17.5 mm product width
- Rated operational voltage: up to 1000 VDC
- Rated operational current: up to 25 ADC
- Control voltage range: 4.5-32 VDC
- Input polarity protection
- Removable IP20 cover
- Integrated free-wheeling diode for output protection
- Max. transient peak voltage: 1200 V

Description

This product series is mainly intended to switch a string of photovoltaic panels with a maximum string voltage of 1000 VDC and up to 25 ADC in only 17.5 mm width. It may be used in other DC application as well.

The control port is protected against reverse polarity while the IGBT at the output is protected against back voltage with an integrated freewheeling diode.

RGS1D is the panel mount version while the RGC1D has an integrated heatsink.

Specifications are at a surrounding temperature of 25°C unless otherwise specified.

Applications

Photovoltaic panels, railways

Main functions

- DC switching solid state relay
- 4 kV isolation between input and output

Order code

Structure

RGS1D

RGC1D

Element	Component	Function
1/L+	Power connection	Mains connection
2/L-	Power connection	Load connection
A1+, A2-	Control connection	Terminals for control voltage
LED	Control indicator	Indicates presence of control voltage
Heatsink	Integrated heatsink	DIN rail mounting
PE	Protective Earth	Connection for Protective Earth, PE screw not provided with RGC1D

Features

General data

Material	PA66 or PA6 (UL94 V0), RAL7035 Glow wire ignition temperature and Glow wire flammability index conform to EN 60335-1 requirements	
Mounting	RGS1D: Panel mount RGC1D: DIN mount RGS1D...DIN: DIN mount	
Touch Protection	IP20	
Overvoltage category	III, 6 kV (1.2/50 μ s) rated impulse withstand voltage	
Isolation	Input and Output to case	4000 Vrms
	Input to Output	4000 Vrms

Performance

Output specifications

	RGC1D..15	RGS1D..15DIN	RGS1D..15	RGS1D..25
Max. operational current: DC-1 @ 60°C	8 ADC	4 ADC	15 ADC ¹	25 ADC ¹
Max. operational current: DC-1 @ 40°C	15 ADC	6 ADC		
Output protection	Integrated free wheeling diode			
Leakage current @ rated voltage	<1.5 mADC			
Minimum operational current	20 mADC			
Maximum transient surge current (t=10 μs)	200 ADC			

1. Max rated current with suitable heatsink. Refer to heatsink selection tables

Output voltage specifications

Operational voltage range IEC ² UL508 ²	24 - 1000 VDC 24 - 600 VDC
Maximum transient peak voltage	1200 Vp
Maximum onstate voltage drop	1.6 VDC

2. -15% on lower voltage limit

Input specifications

Control voltage range	4.5 - 32 VDC
Pick-up voltage³	4.0 VDC
Drop-out voltage	1.0 VDC
Maximum reverse voltage	32 VDC
Maximum response time pick-up	Refer to Time characteristics
Maximum response time drop-out	Refer to Time characteristics
Input current	See diagrams below

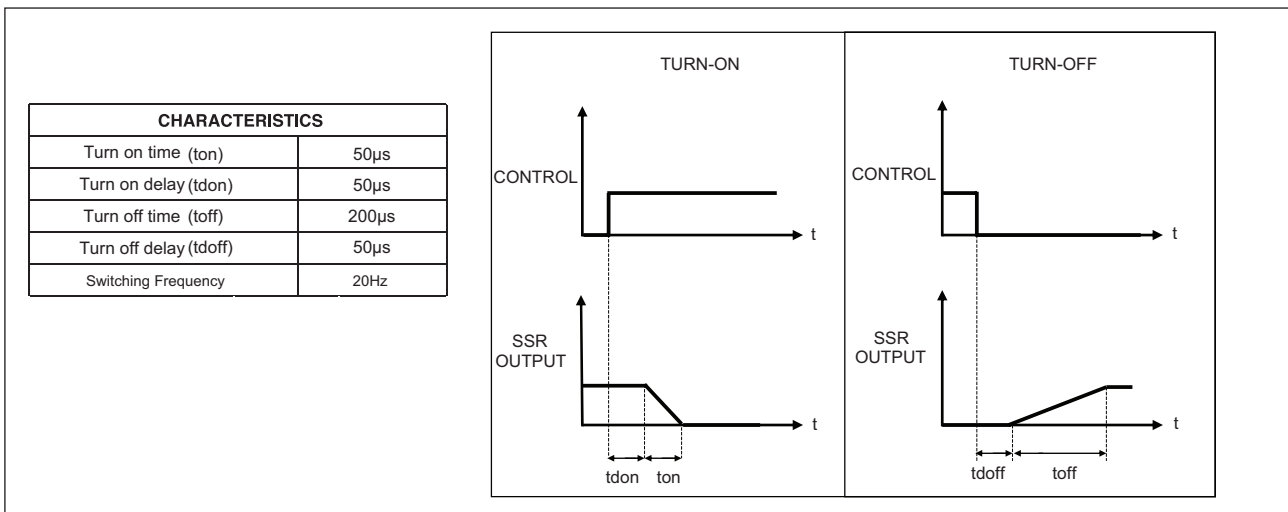

Note: Ideally, the control signal should be applied through a contactless switch (for example, open collector)

3. Pickup voltage should be minimum 6 VDC for EMC conformance.

The declaration in this section is prepared in compliance with People’s Republic of China Electronic Industry Standard SJ/T11364-2014: Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products.

Part Name	Toxic or Harardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Power Unit Assembly	x	o	o	o	o	o

O: Indicates that said hazardous substance contained in homogeneous materials for this part are below the limit requirement of GB/T 26572.

X: Indicates that said hazardous substance contained in one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.

这份申明根据中华人民共和国电子工业标准 SJ/T11364-2014：标注在电子电气产品中限定使用的有害物质

零件名称	有毒或有害物质与元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴化联苯 (PBB)	多溴联苯醚 (PBDE)
功率单元	x	o	o	o	o	o

O:此零件所有材料中含有的该有害物低于GB/T 26572的限定。

X: 此零件某种材料中含有的该有害物高于GB/T 26572的限定。

Short circuit protection

Protection Co-ordination, Type 1:

Type 1 protection implies that after a short circuit, the device under test will no longer be in a functioning state.

In case, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 5,000ADC, 600Volts maximum when protected by fuses. Tests at 5,000A were performed with RK5 fuses, time delay; please refer to the table below for maximum allowed ampere rating of the fuse. Use fuses only.

Protection co-ordination type 1 according to UL 508				
Part No.	Prospective short circuit current [kA]	Max fuse size [A]	Class	Voltage [VDC]
RGC..15	5	25	RK5	Max. 600
RGS..15		25	RK5	
RGS..25		25	RK5	

Protection co-ordination type 1 according to IEC/EN 60947-4-1				
Part No.	Prospective short circuit current [kA]	SIBA		Voltage [VDC]
		Max fuse size [A]	Part number	
RGC..15	5	16	9008010.16	Max. 600
RGS..15		16	9008010.16	
RGS..25		25	9008010.25	

Terminal layout

- 1/L+: Mains supply connection
- 2/L-: Load connection
- A1 (+): Positive control signal
- A2 (-): Control ground

Mounting instructions for RGS1D

Thermal stress will reduce the lifetime of the SSR. Therefore it is necessary to select the appropriate heatsinks, taking into account the surrounding temperature, load current and the duty cycle.

A fine layer of thermally conductive silicone paste must be applied to the back of the SSR. RGS should be mounted on the heatsink with two M5 x 30 mm screws. Gradually tighten each screw (alternating between the two) until both are tightened with a torque of 0.75 Nm. Then tighten both screws to their final mounting torque of 1.5 Nm.

In case of a thermal pad attached to the back of the SSR, no thermal paste is required. The RGS is gradually tightened (alternating between the 2 screws) to a maximum torque of 1.5 Nm.
