

Data Sheet

Shut-off valve Type **SVA DH** and **SVA DL** 250 – 300

Designed to meet all industrial refrigeration application requirements

SVA-DL and SVA-DH are angleway shut-off valves designed to meet all industrial refrigeration application requirements.

SVA-DL (Delta pressure Low)

is designed with a restriction in the opening function. High differential pressure can be applied from the side port and reduced pressure can be applied from bottom port. SVADL is a twostep valve for pressure relief.

SVA-DH (Delta pressure High)

is designed without restriction in the opening function. As a result of its balanced design this valve is able to open at all differential pressures with limited torque. The angleway shut-off valves are carefully designed to give favourable flow conditions. Easy to dismantle for inspection and repair.

Both SVA-DL & SVA-DH shut-off valves have internal backseating enabling the spindle seal to be replaced with the valve still under pressure.

The valves are designed to give favourable flow characteristics and are easy to dismantle for servicing. The valve cone is designed to ensure perfect closing.

Features

- Applicable to HCFC, HFC, R717 (Ammonia) and R744 (CO₂) and all flammable refrigerants
- Optional accessories:
 - Heavy duty industrial handwheel for frequent operation
 - Vented cap for infrequent operation
- Available in angleway version with extended bonnet for insulated systems
- The valve caps can be wire-sealed, to prevent operation by unauthorised persons
- Internal PTFE backseating
- The bonnet is suitable for installation in insulated low temperature applications
- The housing and bonnet are made from low temperature steel in accordance with the requirements of the Pressure Equipment Directive and other international classification authorities
- Classification: DNV, CRN, BV, EAC etc.

Portfolio overview

Figure 1: SVA-DL & SVA-DH

Table 1: Portfolio overview

Description	Features
Valve body/connection material	Steel
Equipment	Handwheel/Cap
Connection standard	EN 10220 ASME B 36.10M SCHEDULE 40/STD DIN 2448
Connection type	Butt weld
Max. temperature range	-60 °C – 150 °C (-76 °F – +302 °F)
Max. working pressure [bar/psig]	40 bar (580 psig) at -60 °C – +60 °C (-76 °F – +140 °F) 36 bar (522 psig) at +60 °C – +80 °C (+140 °F – +176 °F) 32 bar (464 psig) at +80 °C – +120 °C (+176 °F – +248 °F) 28 bar (406 psig) at +120 °C – +150 °C (+248 °F – +302 °F)
Packing format	Single pack

Functions

SVA-DL

The **SVA-DL** shut-off valve is designed with a restriction in the flow direction (differential pressure). To ensure the most favourable valve performance the flow must be directed from the side port towards the valve cone. Operation of the valve with flow in this direction is made possible by the two-step opening valve cone as illustrated below.

SVA-DH

The **SVA-DH** shut-off valve is designed without restrictions in either flow direction or differential pressure. Due to the balanced valve cone design the torque required to operate the valve is minimized and the valve can be opened and closed against high pressure with flow in any direction.

Pressure

Table 2: Pressure SVA-DL and SVA-DH

SVA-DL	SVA-DH
<p> $\Delta P_{\max} = 40 \text{ bar}$ SVA 250: $\Delta P_{\max} = 9 \text{ bar}$ SVA 300: $\Delta P_{\max} = 6 \text{ bar}$ </p>	<p> $\Delta P_{\max} = 40 \text{ bar}$ </p>

Flow

Table 3: Flow SVA-DL and SVA-DH

SVA-DL	SVA-DH

i NOTE:

Above pressures indicates the maximum pressures at which the the valve can be operated manually and tightness can be achieved.

Media

Refrigerants

Applicable to HC, HCFC, HFC, R717 (Ammonia) and R744 (CO₂). For further information please see installation guide for SVA-DL and SVA-DH.

New refrigerants

Danfoss products are continually evaluated for use with new refrigerants depending on market requirements.

When a refrigerant is approved for use by Danfoss, it is added to the relevant portfolio, and the R number of the refrigerant (e.g. R513A) will be added to the technical data of the code number. Therefore, products for specific refrigerants are best checked at store.danfoss.com/en/, or by contacting your local Danfoss representative.

Product specification

Pressure and temperature

Figure 2: Pressure and temperature graph

Table 4: Pressure and temperature

Temperature range	Max Working Pressure @ specific temperature range
-60 °C – +150 °C (-76 °F – +302 °F)	40 bar (580 psig) at -60 °C – +60 °C (-76 °F – +140 °F)
	36 bar (522 psig) at +60 °C – +80 °C (+140 °F – +176 °F)
	32 bar (464 psig) at +80 °C – +120 °C (+176 °F – +248 °F)
	28 bar (406 psig) at +120 °C – +150 °C (+248 °F – +302 °F)

Design

Housing and bonnet

Made from special, cold-resistant steel approved for low temperature operations.

Bolts

Stainless steel, Quality A2-70.

Valve cone assembly

The valve cone assembly is turnable on the spindle, thus there is no friction between cone and seat when the valve is opened and closed. A Teflon tightening ring provides perfect sealing at a minimum closing torque.

Spindle

Made of polished stainless steel, ideal for O-ring sealing.

Packing gland

The packing gland comprises a spring loaded seal packing which ensures perfect tightness in the range: -60 °C – 150 °C (-76 °F – 302 °F). Furthermore, the packing glands incorporate a scraper ring to prevent the penetration of dirt and ice.

Marking

Each valve type is clearly marked with type, size and performance range

Figure 3: Example of marking ring, SVA-DH

Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at store.danfoss.com.

Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at www.danfoss.com/en/service-and-support/documentation.

Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: www.danfoss.com/en/choose-region.

Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at www.danfoss.com/en/service-and-support/learning.

Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at www.danfoss.com/en/service-and-support/downloads.

Coolselector®2 - find the best components for you HVAC/R system

Coolselector®2 makes it easy for engineers, consultants, and designers to find and order the best components for refrigeration and air conditioning systems. Run calculations based on your operating conditions and then choose the best setup for your system design.

Download Coolselector®2 for free at coolselector.danfoss.com.
