

Description: Mounted together with the CCF cable gland plate, CCG grommets are used to easily route cables fitted with connectors. The grommet is positioned around the cable and is equipped with catch hooks that anchor themselves in the CCF cable gland plate. Strain relief is achieved by using a simple cable tie.

Material: Thermoplastic rubber, halogen free.

Temperature resistance: -40°C to +80°C.

Flammability: HB according to UL94.

Finish: Black.

Protection: IP 54 with suitable gland plate and cables.

Pack quantity: 10 pieces.
