

Descrição: Brackets mounted on the outside hole pattern of the frame ensuring a strong and 3 dimensional alignment of the mild steel bayed enclosures with an "auto spacer" function. This method of baying enclosures also has the advantage of creating a direct earthing connection between the enclosure frames.

Material: 3 mm zinc plated steel.

Quantidade por embalagem: 6 brackets with mounting accessories.

Ref.
CCE06

* Available for MCSL enclosures.

** If partial doors, DP, with a height of 150 mm are installed, only the CCEH bracket can be used.
