## DATASHEET - PLS6-C3/3N-MW

Miniature circuit breaker (MCB), 3A, 3pole+N, type C characteristic

Part no. Catalog No. PLS6-C3/3N-MW 243008

Similar to illustration

| Delivery program  |                   |    |  |
|---|-------------------|----|--|
| Basic function  |                   |    | Miniature circuit-breakers   |
| Number of poles   |                   |    | 3 pole+N   |
| Tripping characteristic   |                   |    | С  |
| Application   |                   |    | Switchgear for residential and commercial applications   |
| Rated current   | I <sub>n</sub>    | Α  | 3  |
| Rated switching capacity according to IEC/EN 60898-1  | I <sub>cn</sub>   | kA | 6  |
| Product range   |                   |    | PLS6   |
|   |                   |    |  |
| Technical data<br>Electrical  |                   |    |  |
| Rated switching capacity according to IEC/EN 60898-1  | I <sub>cn</sub>   | kA | 6  |
| Design verification as per IEC/EN 61439   |                   |    |  |
| Technical data for design verification  |                   |    |  |
| Rated operational current for specified heat dissipation  | l.                | А  | 3  |
| Heat dissipation per pole, current-dependent  | In<br>P · .       | w  | 0  |
| Equipment heat dissipation, current-dependent   | P <sub>vid</sub>  |    |  |
|   | P <sub>vid</sub>  | W  | 3.7  |
| Static heat dissipation, non-current-dependent  | P <sub>vs</sub>   | W  | 0  |
| Heat dissipation capacity   | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.  |                   | °C | -25  |
| Operating ambient temperature max.  |                   | °C | 75   |
|   |                   |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity  |
| IEC/EN 61439 design verification  |                   |    |  |
| 10.2 Strength of materials and parts  |                   |    |  |
| 10.2.2 Corrosion resistance   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat<br>and fire due to internal electric effects |                   |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                   |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions   |                   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances  |                   |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections   |                   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors  |                   |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties  |                   |    |  |
| 10.9.2 Power-frequency electric strength  |                   |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage  |                   |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material  |                   |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise  |                   |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |

| 10.11 Short-circuit rating          | Is the panel builder's responsibility. The specifications for the switchgear must be observed.           |
|-------------------------------------|--|
| 10.12 Electromagnetic compatibility | Is the panel builder's responsibility. The specifications for the switchgear must be observed.           |
| 10.13 Mechanical function           | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed. |
