Circuit-breaker, 3 p, 100A, selective + withdraw.

Part no. NZMS2-VE100-SVE Catalog No. 113307

Design verification as per IEC/EN 61439

Technical data for design verification			
Equipment heat dissipation, current-dependent	P_{vid}	W	8.25
EC/EN 61439 design verification			
10.2 Strength of materials and parts			
10.2.2 Corrosion resistance			Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures			Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat			Meets the product standard's requirements.
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects $$			Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation			Meets the product standard's requirements.
10.2.5 Lifting			Does not apply, since the entire switchgear needs to be evaluated.
10.2.6 Mechanical impact			Does not apply, since the entire switchgear needs to be evaluated.
10.2.7 Inscriptions			Meets the product standard's requirements.
10.3 Degree of protection of ASSEMBLIES			Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distances			Meets the product standard's requirements.
10.5 Protection against electric shock			Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components			Does not apply, since the entire switchgear needs to be evaluated.
10.7 Internal electrical circuits and connections			Is the panel builder's responsibility.
10.8 Connections for external conductors			Is the panel builder's responsibility.
10.9 Insulation properties			
10.9.2 Power-frequency electric strength			Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage			Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material			Is the panel builder's responsibility.
10.10 Temperature rise			The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating			Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.12 Electromagnetic compatibility			Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function			The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

Technical data ETIM 7.0

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation protection (EC	000228)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (ecl@ss10.0.1-27-37-04-09 [AJZ716013])

Rated voltage V 690 - 690 Rated short-circuit breaking capacity lcu at 400 V, 50 Hz kA 65 Overload release current setting A 50 - 100 Adjustment range short-term delayed short-circuit release A 200 - 1000 Adjustment range undelayed short-circuit release A 1200 - 1200 Integrated earth fault protection Type of electrical connection of main circuit Device construction Suitable for DIN rail (top hat rail) mounting N 690 - 690 N 690 Experiment (a) 100 Experiment (a) 100
Rated short-circuit breaking capacity Icu at 400 V, 50 Hz kA 65 Overload release current setting A 50 - 100 Adjustment range short-term delayed short-circuit release A 200 - 1000 Adjustment range undelayed short-circuit release A 1200 - 1200 Integrated earth fault protection Type of electrical connection of main circuit Device construction kA 65 A 200 - 1000 A 200 - 1000 No Screw connection Built-in device plug-in technique
Overload release current setting A 50 - 100 Adjustment range short-term delayed short-circuit release A 200 - 1000 Adjustment range undelayed short-circuit release A 1200 - 1200 Integrated earth fault protection Type of electrical connection of main circuit Device construction A 50 - 100 A 200 - 1000 No No Built-in device plug-in technique
Adjustment range short-term delayed short-circuit release A 200 - 1000 Adjustment range undelayed short-circuit release A 1200 - 1200 Integrated earth fault protection Type of electrical connection of main circuit Device construction A 200 - 1000 No Screw connection Built-in device plug-in technique
Adjustment range undelayed short-circuit release A 1200 - 1200 Integrated earth fault protection Type of electrical connection of main circuit Device construction A 1200 - 1200 No Screw connection Built-in device plug-in technique
Integrated earth fault protection Type of electrical connection of main circuit Device construction No Screw connection Built-in device plug-in technique
Type of electrical connection of main circuit Device construction Screw connection Built-in device plug-in technique
Device construction Built-in device plug-in technique
Suitable for DIN rail (top hat rail) mounting
DIN rail (top hat rail) mounting optional No
Number of auxiliary contacts as normally closed contact 0
Number of auxiliary contacts as normally open contact 0

Number of succession and the suc	0
Number of auxiliary contacts as change-over contact	0
With switched-off indicator	No
With under voltage release	No
Number of poles	3
Position of connection for main current circuit	Back side
Type of control element	Rocker lever
Complete device with protection unit	Yes
Motor drive integrated	No
Motor drive optional	Yes
Degree of protection (IP)	IP20
