Accessories			Rating Plug (rate current module)
			The rated current can be reduced by changing the rating plug, for example, in order to adapt to changed conditions in the application. The rating plug's nominal value must be less than or equal to the basic device's rated current. The rating plug can be replaced on site without replacing the transformer. 200 A, 250 A and 300 A rating plugs cannot be combined with P-trip units.
