Ambient operating temperature - max Posign verification Design verification 0 V Equipment heat dissipation, current-dependent Pvid 0 V Heat dissipation capacity Pdiss 0 V Rated operational current for specified heat dissipation (In) 0 V 10:22 Corsion resistance 0 V 10:22 Verification of thermal stability of enclosures 0 V 10:23 L Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 10:22 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 10:23 L Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 10:24 Resistance to ultra-violet (UV) radiation Dess end upply, since the entire switchgear needs to be evaluated. 10:25 Lifting Dess end upply, since the entire switchgear needs to be evaluated. 10:25 Lifting Meets the product standard's requirements. 10:35 Incorporation of switching devices and components Dess end upply, since the entire switchgear needs to be evaluated. 10:40 Fearances and creepage distances Meets the product standard's requirements. 10:51 Incorporation of switching devices and components Dess end upply, since the entire switchgear needs to be evaluated. </td <td></td> <td>White</td>		White
Design verification Perify and the dissipation, current-dependent Pvid OW Heat dissipation capacity Pdiss 0W 0W Heat dissipation capacity Pdiss 0W 0W Rated operational current-dependent Pvid 0W 0A 10222 Corrosion resistance 0W 0A 10222 Corrosion resistance Meets the product standard's requirements. 102.31 Verification of thermal stability of enclosures Meets the product standard's requirements. 102.32 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 102.33 Resist of insul, mat to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 102.43 Resistance to ultra-violet (UV) radiation Dees not apply, since the entire switchgear needs to be evaluated. 102.5 Urifing Dees not apply, since the entire switchgear needs to be evaluated. 103.24 Resistances Meets the product standard's requirements. 103.25 Verification of assemblies Dees not apply, since the entire switchgear needs to be evaluated. 104.22 Fortection against electric shock Dees not apply, since the entire switchgear needs to be evaluated. 104.13 Internal electrical circuits and connections Meets the panal builder's	Climatic environmental conditions	
Equipment heat dissipation, current-dependent Pvid 0 W Heat dissipation capacity Pdiss 0 W Rated doparational current for specified heat dissipation (In) 0 A 10.22 Corrosion resistance 0 A 10.22 Corrosion resistance Meets the product standard's requirements. 10.23 I Verification of thermal stability of enclosures Meets the product standard's requirements. 10.23 Resist of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 10.24 Resistance to ultra-violet (UV) radiation Meets the product standard's requirements. 10.25 Urification of assemblies Meets the product standard's requirements. 10.24 Resistance to ultra-violet (UV) radiation Meets the product standard's requirements. 10.25 Urification of assemblies Meets the product standard's requirements. 10.3 Degree of protection of assemblies Meets the product standard's requirements. 10.3 Degree of protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Meets the product standard's requirements. 10.3 Degree of protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.4 I terrate electrical circuits and connections I is th	Ambient operating temperature - max	70 °C
Heat dissipation capacity Pdiss 0W Heat dissipation prople, current-dependent Pvid 0W Rated operational current for specified heat dissipation (In) 0A 10.2.2 Corrosion resistance 0A 10.2.2 Corrosion resistance 0A 10.2.2 Lorinscion of thermal stability of enclosures 0A 10.2.3 Liverification of thermal stability of enclosures Meets the product standard's requirements. 10.2.3 Resist. of insult and to abornal head fire by internal elect. effects Meets the product standard's requirements. 10.2.4 Resistance to ultra-violet (UV) radiation Dees not apply, since the entire switchgear needs to be evaluated. 10.2.5 Lifting Dees not apply, since the entire switchgear needs to be evaluated. 10.2.6 Mechanical impact Dees not apply, since the entire switchgear needs to be evaluated. 10.2.7 Inscriptions Dees not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Dees not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Dees not apply, since the entire switchgear needs to be evaluated. 10.5 Incorporation of switching devices and components Dees not apply, since the entire switchgear needs to be evaluated. 10.8 Connections of external	Design verification	
Heat dissipation per pole, current-dependent Pvid OW Rated operational current for specified heat dissipation (In) OA 10.2.2 Corrosion resistance Meets the product standard's requirements. 10.2.3.1 Verification of thermal stability of enclosures Meets the product standard's requirements. 10.2.3.2 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 10.2.5 Lifting Des not apply, since the entire switchgear needs to be evaluated. 10.2.6 Mechanical impact Des not apply, since the entire switchgear needs to be evaluated. 10.2.7 Inscriptions Des not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Des not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and components Des not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and components Des not apply, since the entire switchgear needs to be evaluated. 10.5 Protection against electric shock Des not apply, since the entire switchgear needs to be evaluated. 10.6 Incorporation of switching devices and components Is the panel builder's responsibility. 10.8 Connections for external conductors </td <td>Equipment heat dissipation, current-dependent Pvid</td> <td>0 W</td>	Equipment heat dissipation, current-dependent Pvid	0 W
Rated operational current for specified heat dissipation (In) Image: Constance of the specification of the specifications for the specifications in the instruction	Heat dissipation capacity Pdiss	0 W
10.22 Corrosion resistanceMeets the product standard's requirements.10.23.1 Verification of thermal stability of enclosuresMeets the product standard's requirements.10.23.2 Verification of resistance of insulting materials to normal heatMeets the product standard's requirements.10.23.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effectsMeets the product standard's requirements.10.24 Resistance to ultra-violet (UV) radiationPlease enquire10.25 LiftingDoes not apply, since the entire switchgar needs to be evaluated.10.26 Mechanical impactDoes not apply, since the entire switchgar needs to be evaluated.10.27 InscriptionsDoes not apply, since the entire switchgar needs to be evaluated.10.30 Degree of protection of assembliesMeets the product standard's requirements.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgar needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgar needs to be evaluated.10.31 Mechanical (requirements)Is the panel builder's responsibility.10.32 Power-frequency electric strengthIs the panel builder's responsibility.10.32 Aresting of enclosures made of insulating materialIs the panel builder's responsibility.10.32 Internal electric are riseIs the panel builder's responsibility.10.33 Internal electric are riseIs the panel builder's responsibility.10.34 Testing of enclosures made of insulating materialIs the panel builder's responsibi	Heat dissipation per pole, current-dependent Pvid	0 W
10.2.3.1 Verification of thermal stability of enclosuresMeets the product standard's requirements.10.2.3.2 Verification of resistance of insulating materials to normal heatMeets the product standard's requirements.10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effectsMeets the product standard's requirements.10.2.4 Resistance to ultra-violet (UV) radiationPlease enquire10.2.5 LiftingDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsDoes not apply, since the entire switchgear needs to be evaluated.10.3.1 Gerearces and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6.8 Incorporation of switching devices and componentsMeets the product standard's requirements.10.8.1 Protection against electric strengthEntire switchgear needs to be evaluated.10.9.2 Power-frequency electric strengthEntire switchgear needs to be evaluated.10.9.3 Inpulse withstand voltageEntire switchgear needs to be evaluated.10.11 Emeprature riseEntire switchgear needs to be evaluated.10.12 Electromagnetic compatibilityEntire switchgear needs to be evaluated.10.13 Lectromagnetic compatibilityEntire structure requirements.10.13 Mechanical functionEntire structure requirements.10.13 Mechanical functionEntire structure requirements.10.13 Mechanical functionEntire switchgear nust be observed.10.13 Mechanical functionEntire structure requirements.	Rated operational current for specified heat dissipation (In)	0 A
102.3.2 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 102.3.3 Resist. of insul. mat to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 102.4 Resistance to ultra-violet (UV) radiation Does not apply, since the entire switchgear needs to be evaluated. 102.5 Lifting Does not apply, since the entire switchgear needs to be evaluated. 102.7 Inscriptions Does not apply, since the entire switchgear needs to be evaluated. 10.3 Degree of protection of assemblies Does not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Does not apply, since the entire switchgear needs to be evaluated. 10.5 Protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.7 Internal electrical circuits and connections Is the panel builder's responsibility. 10.8 Connections for external conductors Is the panel builder's responsibility. 10.8.3 Inpulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.13 Electromagnetic compatibility Is the panel builder's responsibility. 10.14 Clearance and evoluction Is the panel builder's responsibility. 10.15 E	10.2.2 Corrosion resistance	Meets the product standard's requirements.
10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 10.2.4 Resistance to ultra-violet (UV) radiation Dees not apply, since the entire switchgear needs to be evaluated. 10.2.5 Lifting Does not apply, since the entire switchgear needs to be evaluated. 10.2.6 Mechanical impact Dees not apply, since the entire switchgear needs to be evaluated. 10.2.7 Inscriptions Meets the product standard's requirements. 10.3.0 Begree of protection of assemblies Does not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Does not apply, since the entire switchgear needs to be evaluated. 10.5 Protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.7 Internal electrical circuits and connections Is the panel builder's responsibility. 10.8 Connections for external conductors Is the panel builder's responsibility. 10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.13 Mechanical function Is the panel builder's responsibility. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function Is the panel builder's responsibility. The specifications for the switchgear must be observed.	10.2.3.1 Verification of thermal stability of enclosures	Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation Please enquire 10.2.5 Lifting Does not apply, since the entire switchgear needs to be evaluated. 10.2.7 Inscriptions Does not apply, since the entire switchgear needs to be evaluated. 10.3.1 Degree of protection of assemblies Does not apply, since the entire switchgear needs to be evaluated. 10.4.4 Clearances and creepage distances Does not apply, since the entire switchgear needs to be evaluated. 10.5.5 Protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.6.1 Incorporation of switching devices and components Does not apply, since the entire switchgear needs to be evaluated. 10.7.1 Internal electrical circuits and connections Is the panel builder's responsibility. 10.8.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.13 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.2.3.2 Verification of resistance of insulating materials to normal heat	Meets the product standard's requirements.
10.2.5 LiftingDoes not apply, since the entire switchgear needs to be evaluated.10.2.6 Mechanical impactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIn the specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects	Meets the product standard's requirements.
10.2.6 Mechanical impactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.11 Short-circuit ratingNot applicable.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.4 Resistance to ultra-violet (UV) radiation	Please enquire
10.2.7 Inscriptions Meets the product standard's requirements. 10.3 Degree of protection of assemblies Does not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Meets the product standard's requirements. 10.5 Protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.6 Incorporation of switching devices and components Does not apply, since the entire switchgear needs to be evaluated. 10.7 Internal electrical circuits and connections Is the panel builder's responsibility. 10.8 Connections for external conductors Is the panel builder's responsibility. 10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.10 Temperature rise Is the panel builder's responsibility. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.2.5 Lifting	Does not apply, since the entire switchgear needs to be evaluated.
10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesDoes not apply, since the entire switchgear needs to be evaluated.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.6 Mechanical impact	Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.7 Inscriptions	Meets the product standard's requirements.
10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.3 Degree of protection of assemblies	Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.4 Clearances and creepage distances	Meets the product standard's requirements.
10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.5 Protection against electric shock	Does not apply, since the entire switchgear needs to be evaluated.
10.8 Connections for external conductors Is the panel builder's responsibility. 10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function It device meets the requirements, provided the information in the instruction	10.6 Incorporation of switching devices and components	Does not apply, since the entire switchgear needs to be evaluated.
10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.7 Internal electrical circuits and connections	Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function Implementation	10.8 Connections for external conductors	Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function Image: Compatibility of the switchgear must be observed.	10.9.2 Power-frequency electric strength	Is the panel builder's responsibility.
10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.9.3 Impulse withstand voltage	Is the panel builder's responsibility.
10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.9.4 Testing of enclosures made of insulating material	Is the panel builder's responsibility.
Image: state of the second st	10.10 Temperature rise	Not applicable.
10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.11 Short-circuit rating	
	10.12 Electromagnetic compatibility	
	10.13 Mechanical function	

Technical data ETIM 9.0

Low-voltage industrial components (EG000017) / Hood/lens for circuit control devices (EC001072)				
Electric engineering, automation, process control engineering / Low-voltage switch technology / Command and alarm device / Dome, refractor (ecl@ss13-27-37-12-31 [AKF049019])				
Colour lens		White		
Shape of lens		Round		
Construction type		Flat		
Labelled		No		
Built-in diameter	mm	22.5		
Diameter	mm	22.2		
Width	mm	24		
Height	mm	3
