Climatic environmental conditions Image: Climatic environmental conditions Anbient operating temperature - max 0° ° ° Design verification 0° ° Equipment heat dissipation, current-dopendent Pvid 0 W Heat dissipation capecity Pdiss 0 W Reted operational current for specified heat dissipation (In) 0 A 102.2 Corosion resistance 0 Meets the product standard's requirements. 102.2.3 Verification of thermal stability of enclosures Meets the product standard's requirements. 102.2.3 Verification of resistance of insulding materials to normal heat Meets the product standard's requirements. 102.3.4 Verification of resistance of insulding materials to normal heat Meets the product standard's requirements. 102.3.4 Verification of resistance of insulding materials to normal heat Meets the product standard's requirements. 102.4 Resistance to ultra-violet (UV) radiston Does not apply, since the entire switchgear needs to be evaluated. 102.5 Lifting Does not apply, since the entire switchgear needs to be evaluated. 103.5 Protection of assemblies Does not apply, since the entire switchgear needs to be evaluated. 103.5 Protection against electric strongh External enduct standard's requirements. 103.6 Coroporation of switching de	Inscription	
Ambient oparating temparature - max Particular Design verification 0W Equipment heat dissipation, current-dependent Pvid 0W Heat dissipation capacity Pdiss 0W Rated oparational current for specified heat dissipation (In) 0W 102.2 Corrison resistance 0W 102.2 Lorrison resistance of insulating materials to normal heat Meets the product standard's requirements. 102.3.1 Verification of tresistance of insulating materials to normal heat Meets the product standard's requirements. 102.3.2 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 102.3.2 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 102.3.1 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 102.3.2 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 102.4 Resistance to ultra-violet (W) radiation Meets the product standard's requirements. 102.5 Lifting Does not apply, since the entire switchgara needs to be evaluated. 102.6 Mechanical inpact Does not apply, since the entire switchgara needs to be evaluated. 103.6 Incorporatino	Lens color	White
Design verification Perify verification Equipment heat dissipation, current-dependent Pvid 0V Heat dissipation capacity Pdiss 0W Rated operational current for specified heat dissipation (In) 0A 102.2 Corrosion resistance 0A 102.3 Corrosion resistance of insulating materials to normal heat Meets the product standard's requirements. 102.3 Verification of thermal stability of enclosures Meets the product standard's requirements. 102.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 102.4 Resistance to ultra-violet (UV) radiation Meets the product standard's requirements. 102.5 Utring Does not apply, since the entire switchgear needs to be evaluated. 102.5 Itring Does not apply, since the entire switchgear needs to be evaluated. 103.0 Egree of protection of assemblies Does not apply, since the entire switchgear needs to be evaluated. 103.0 Egree of protection squist electric shock Does not apply, since the entire switchgear needs to be evaluated. 103.1 Normal electrical circuits and components Equiptions Is the panel builder's responsibility. 103.2 Opereor frequency electric shock Does not apply, since the entrice switchgear needs to be evaluated.	Climatic environmental conditions	
Eujement heat dissipation, current-dependent Pvid 0 Heat dissipation capacity Pdiss 0W Reat dissipation capacity Pdiss 0W Reat dissipation prole, current-dependent Pvid 0W Reat dissipation prole, current-dependent Pvid 0W Reat dissipation resistance 0W 102.22 Corrosion resistance 0A 102.31 Varification of thermal stability of enclosures 0Meets the product standard's requirements. 102.32 Varification of resistance of insulating materials to normal heat 0Meets the product standard's requirements. 102.32 Varification of resistance of insulating materials to normal heat 0Meets the product standard's requirements. 102.32 Varification of disrama stability of enclosures 0Meets the product standard's requirements. 102.32 Varification of assemblies 0Meets the product standard's requirements. 102.4 Resistance to ultra-violet (UV) radiation 0Meets the product standard's requirements. 102.5 Uriting Dees not apply, since the entire switchgear needs to be evaluated. 102.2 Varification of assemblies 0Meets the product standard's requirements. 103.0 Bores of apply, since the entire switchgear needs to be evaluated. Meets the product standard's requirements. 10.3 Fortection	Ambient operating temperature - max	70 °C
Heat dissipation capacity Pdiss 0W Heat dissipation prole, current-dependent Pvid 0W Rated operational current for specified heat dissipation (In) 0A 10.2.2 Corrosion resistance Meets the product standard's requirements. 10.2.3.1 Verification of thermal stability of enclosures Meets the product standard's requirements. 10.2.3.2 Verification of nesistance of insulating materials to normal heat Meets the product standard's requirements. 10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 10.2.3.8 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 10.2.4 Resistance to ultra-violet (UV) radiation Meets the product standard's requirements. 10.2.5 Urfing Does not apply, since the entire switchgear needs to be evaluated. 10.2.7 Inscriptions Meets the product standard's requirements. 10.3 Degree of protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.4 Resistances Meets the product standard's requirements. 10.5 Incorporation of switching devices and components Does not apply, since the entire switchgear needs to be evaluated. 10.6 Incorporation of switching devices and components Is the panel builder's responsibility.	Design verification	
Heat dissipation pr pole, current-dependent Pvid OW Rated operational current for specified heat dissipation (In) OA 10.2.2 Corrosion resistance Meets the product standard's requirements. 10.2.3.1 Verification of thermal stability of enclosures Meets the product standard's requirements. 10.2.3.2 Verification of thermal stability of enclosures Meets the product standard's requirements. 10.2.3.3 Resist. of insul, mat, to abnormal heat/fire by internal elect, effects Meets the product standard's requirements. 10.2.4 Resistance to ultra-violet (UV) radiation Dees not apply, since the entire switchgear needs to be evaluated. 10.2.5 Lifting Dees not apply, since the entire switchgear needs to be evaluated. 10.2.1 Striptions Dees not apply, since the entire switchgear needs to be evaluated. 10.2.2 Inscriptions Dees not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Dees not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Employ since the entire switchgear needs to be evaluated. 10.5 Incorporation of switching devices and components Dees not apply, since the entire switchgear needs to be evaluated. 10.4 Internal electrical circuits and connections Employ since the entire switchgear needs to be evaluated. 10.5 Incorpora	Equipment heat dissipation, current-dependent Pvid	0 W
Rated operational current for specified heat dissipation (In) 0 A 10.2.2 Corrosion resistance Meets the product standard's requirements. 10.2.3.1 Verification of thermal stability of enclosures Meets the product standard's requirements. 10.2.3.2 Verification of resistance of insulating materials to normal heat Meets the product standard's requirements. 10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects Meets the product standard's requirements. 10.2.4 Resistance to ultra-violet (UV) radiation Meets the product standard's requirements. 10.2.5 Lifting Dees not apply, since the entire switchgear needs to be avaluated. 10.2.7 Inscriptions Dees not apply, since the entire switchgear needs to be evaluated. 10.3.0 Segree of protection of assemblies Dees not apply, since the entire switchgear needs to be evaluated. 10.4 Clearances and creepage distances Meets the product standard's requirements. 10.5 Protection against electric shock Dees not apply, since the entire switchgear needs to be evaluated. 10.8 Connections for external conductors Is the panel builder's responsibility. 10.8.2 Power-frequency electric isrongth Is the panel builder's responsibility. 10.9.2 Power-frequency electric isrongth Is the panel builder's responsibility. 10.9.3 Inpulse withstand voltage Not	Heat dissipation capacity Pdiss	0 W
10.22 Corrosion resistanceMeets the product standard's requirements.10.23.1 Verification of thermal stability of enclosuresMeets the product standard's requirements.10.23.2 Verification of resistance of insulting materials to normal heatMeets the product standard's requirements.10.23.3 Resist. of insul. mat to abnormal heat/fire by internal elect. effectsMeets the product standard's requirements.10.24 Resistance to ultra-violet (UV) radiationPlease enquire10.25 LiftingDoes not apply, since the entire switchger needs to be evaluated.10.26 Mechanical impactDoes not apply, since the entire switchger needs to be evaluated.10.2.7 InscriptionsDoes not apply, since the entire switchger needs to be evaluated.10.26 InscriptionsDoes not apply, since the entire switchger needs to be evaluated.10.27 InscriptionsDoes not apply, since the entire switchger needs to be evaluated.10.28 Corrostion of assembliesDoes not apply, since the entire switchger needs to be evaluated.10.29 Dregree of protection of assembliesDoes not apply, since the entire switchger needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protectical or gainst electric shockDoes not apply, since the entire switchger needs to be evaluated.10.8 Incorporation of switching devices and componentsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs	Heat dissipation per pole, current-dependent Pvid	0 W
102.3.1 Verification of thermal stability of enclosuresMeets the product standard's requirements.102.3.2 Verification of resistance of insulating materials to normal heatMeets the product standard's requirements.102.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effectsMeets the product standard's requirements.102.4 Resistance to ultra-violet (UV) radiationPlease enquire102.5 LiftingDoes not apply, since the entire switchgear needs to be evaluated.102.7 InscriptionsDoes not apply, since the entire switchgear needs to be evaluated.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesDoes not apply, since the entire switchgear needs to be evaluated.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Inpulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.9.1 Temperature riseNot applicable.10.9.2 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.9.1 Sthert-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.9.4 Leectromagnetic compatibilityIs the panel builder's responsi	Rated operational current for specified heat dissipation (In)	0 A
102.3.2 Verification of resistance of insulating materials to normal heatMeets the product standard's requirements.102.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effectsMeets the product standard's requirements.102.4 Resistance to ultra-violet (UV) radiationDoes not apply, since the entire switchgear needs to be evaluated.102.5 LiftingDoes not apply, since the entire switchgear needs to be evaluated.102.6 Mechanical inpactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.3 Inpulse withstand voltageIs the panel builder's responsibility.10.13 Mechanical functionIs the panel builder's responsibility.10.15 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.2 Corrosion resistance	Meets the product standard's requirements.
10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effectsMeets the product standard's requirements.10.2.4 Resistance to ultra-violet (UV) radiationPlease enquire10.2.5 LiftingDoes not apply, since the entire switchgear needs to be evaluated.10.2.6 Machanical inpactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.3 Inpulse withstand voltageIs the panel builder's responsibility.10.13 Mechanical functionIs the panel builder's responsibility.10.13 Mechanical functionIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.3.1 Verification of thermal stability of enclosures	Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiationPlease enquire10.2.5 LiftingDoes not apply, since the entire switchgear needs to be evaluated.10.2.6 Mechanical impactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.13 Impulse withstand voltageIs the panel builder's responsibility.10.13 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.3.2 Verification of resistance of insulating materials to normal heat	Meets the product standard's requirements.
10.2.5 LiftingDees not apply, since the entire switchgear needs to be evaluated.10.2.6 Mechanical impactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.13 Impulse withstand voltageIs the panel builder's responsibility.10.13 Inpulse withstand voltageIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Inpulse withstand voltageIs the panel	10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects	Meets the product standard's requirements.
10.2.6 Mechanical impactDoes not apply, since the entire switchgear needs to be evaluated.10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.11 Short-circuit ratingNot applicable.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.4 Resistance to ultra-violet (UV) radiation	Please enquire
10.2.7 InscriptionsMeets the product standard's requirements.10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.5 Lifting	Does not apply, since the entire switchgear needs to be evaluated.
10.3 Degree of protection of assembliesDoes not apply, since the entire switchgear needs to be evaluated.10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.11 Short-circuit ratingIs the panel builder's responsibility.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.6 Mechanical impact	Does not apply, since the entire switchgear needs to be evaluated.
10.4 Clearances and creepage distancesMeets the product standard's requirements.10.5 Protection against electric shockDoes not apply, since the entire switchgear needs to be evaluated.10.6 Incorporation of switching devices and componentsDoes not apply, since the entire switchgear needs to be evaluated.10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Inpulse withstand voltageIs the panel builder's responsibility.10.10 Temperature riseNot applicable.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionThe device meets the requirements, provided the information in the instruction	10.2.7 Inscriptions	Meets the product standard's requirements.
10.5 Protection against electric shock Does not apply, since the entire switchgear needs to be evaluated. 10.6 Incorporation of switching devices and components Does not apply, since the entire switchgear needs to be evaluated. 10.7 Internal electrical circuits and connections Is the panel builder's responsibility. 10.8 Connections for external conductors Is the panel builder's responsibility. 10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.3 Degree of protection of assemblies	Does not apply, since the entire switchgear needs to be evaluated.
10.6 Incorporation of switching devices and components Does not apply, since the entire switchgear needs to be evaluated. 10.7 Internal electrical circuits and connections Is the panel builder's responsibility. 10.8 Connections for external conductors Is the panel builder's responsibility. 10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.4 Clearances and creepage distances	Meets the product standard's requirements.
10.7 Internal electrical circuits and connectionsIs the panel builder's responsibility.10.8 Connections for external conductorsIs the panel builder's responsibility.10.9.2 Power-frequency electric strengthIs the panel builder's responsibility.10.9.3 Impulse withstand voltageIs the panel builder's responsibility.10.9.4 Testing of enclosures made of insulating materialIs the panel builder's responsibility.10.10 Temperature riseIs the panel builder's responsibility.10.11 Short-circuit ratingIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.12 Electromagnetic compatibilityIs the panel builder's responsibility. The specifications for the switchgear must be observed.10.13 Mechanical functionIt evice meets the requirements, provided the information in the instruction	10.5 Protection against electric shock	Does not apply, since the entire switchgear needs to be evaluated.
10.8 Connections for external conductors Is the panel builder's responsibility. 10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.6 Incorporation of switching devices and components	Does not apply, since the entire switchgear needs to be evaluated.
10.9.2 Power-frequency electric strength Is the panel builder's responsibility. 10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.7 Internal electrical circuits and connections	Is the panel builder's responsibility.
10.9.3 Impulse withstand voltage Is the panel builder's responsibility. 10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.8 Connections for external conductors	Is the panel builder's responsibility.
10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility. 10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.9.2 Power-frequency electric strength	Is the panel builder's responsibility.
10.10 Temperature rise Not applicable. 10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.9.3 Impulse withstand voltage	Is the panel builder's responsibility.
10.11 Short-circuit rating Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.12 Electromagnetic compatibility Is the panel builder's responsibility. The specifications for the switchgear must be observed. 10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.9.4 Testing of enclosures made of insulating material	Is the panel builder's responsibility.
10.12 Electromagnetic compatibility observed. 10.13 Mechanical function Image: Compatibility of the system of the sys	10.10 Temperature rise	Not applicable.
10.13 Mechanical function The device meets the requirements, provided the information in the instruction	10.11 Short-circuit rating	
	10.12 Electromagnetic compatibility	
	10.13 Mechanical function	

Technical data ETIM 9.0

Low-voltage industrial components (EG000017) / Hood/lens for circuit control devices (EC001072)				
Electric engineering, automation, process control engineering / Low-voltage switch technology / Command and alarm device / Dome, refractor (ecl@ss13-27-37-12-31 [AKF049019])				
Colour lens		White		
Shape of lens		Round		
Construction type		Flat		
Labelled		No		
Built-in diameter	mm	22.5		
Diameter	mm	22.2		
Width	mm	24		
Height	mm	3
