## DATASHEET - NZM2-4-XKS

Screw connection, 4p, standard, size 2

Part no.	NZM2-4-XKS
	266750
EL Number	4358896
(Norway)	

(10)17449)	
General specifications	
Product name	Eaton Moeller series NZM connection type
Part no.	NZM2-4-XKS
EAN	4015082667504
Product Length/Depth	75 millimetre
Product height	25 millimetre
Product width	75 millimetre
Product weight	0.082 kilogram
Compliances	IEC RoHS conform
Product Tradename	NZM
Product Type	Accessories
Product Sub Type	Connection type
Delivery program	
Туре	Accessory Screw connection Terminal
Number of poles	Four-pole
Amperage Rating	300 A (Cu), 250 A (Al)
Frame	NZM2
Suitable for	Four-pole Aluminum cable lug Copper cable lugs
Used with	NZM2-4, PN2-4, N(S)2-4
Technical Data - Mechanical - Terminals	
Terminal capacity (stranded cable)	11 - 3/0 AWG/kcmil (1x)         8 - 1/0 AWG/kcmil (1x)         10 mm² - 50 mm² (2x)         10 mm² - 50 mm² (1x)         4 mm² - 70 mm² (2x)         10 mm² - 185 mm² (1x)         8 - 1/0 AWG/kcmil (2x)         12 AWG/kcmil (2x)         12 AWG/kcmil (2x)         Min. 16 mm x 5 mm
Terminal capacity (copper strip)	Min. 2 segments of 16 mm x 0.8 mm
Design verification as per IEC/EN 61439	
10.2.2 Corrosion resistance	Meets the product standard's requirements.
10.2.3.1 Verification of thermal stability of enclosures	Meets the product standard's requirements.
10.2.3.2 Verification of resistance of insulating materials to normal heat	
	Meets the product standard's requirements.
10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects	
	Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation	Meets the product standard's requirements. Meets the product standard's requirements.
	Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation 10.2.5 Lifting	Meets the product standard's requirements. Meets the product standard's requirements. Does not apply, since the entire switchgear needs to be evaluated.
10.2.4 Resistance to ultra-violet (UV) radiation         10.2.5 Lifting         10.2.6 Mechanical impact	Meets the product standard's requirements. Meets the product standard's requirements. Does not apply, since the entire switchgear needs to be evaluated. Does not apply, since the entire switchgear needs to be evaluated.
10.2.4 Resistance to ultra-violet (UV) radiation         10.2.5 Lifting         10.2.6 Mechanical impact         10.2.7 Inscriptions         10.3 Degree of protection of assemblies	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.
10.2.4 Resistance to ultra-violet (UV) radiation         10.2.5 Lifting         10.2.6 Mechanical impact         10.2.7 Inscriptions	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.
10.2.4 Resistance to ultra-violet (UV) radiation10.2.5 Lifting10.2.6 Mechanical impact10.2.7 Inscriptions10.3 Degree of protection of assemblies10.4 Clearances and creepage distances10.5 Protection against electric shock	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.
10.2.4 Resistance to ultra-violet (UV) radiation10.2.5 Lifting10.2.6 Mechanical impact10.2.7 Inscriptions10.3 Degree of protection of assemblies10.4 Clearances and creepage distances	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.
10.2.4 Resistance to ultra-violet (UV) radiation10.2.5 Lifting10.2.6 Mechanical impact10.2.7 Inscriptions10.3 Degree of protection of assemblies10.4 Clearances and creepage distances10.5 Protection against electric shock10.6 Incorporation of switching devices and components10.7 Internal electrical circuits and connections	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Is the panel builder's responsibility.
10.2.4 Resistance to ultra-violet (UV) radiation10.2.5 Lifting10.2.6 Mechanical impact10.2.7 Inscriptions10.3 Degree of protection of assemblies10.4 Clearances and creepage distances10.5 Protection against electric shock10.6 Incorporation of switching devices and components10.7 Internal electrical circuits and connections10.8 Connections for external conductors	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Is the panel builder's responsibility.         Is the panel builder's responsibility.
10.2.4 Resistance to ultra-violet (UV) radiation10.2.5 Lifting10.2.6 Mechanical impact10.2.7 Inscriptions10.3 Degree of protection of assemblies10.4 Clearances and creepage distances10.5 Protection against electric shock10.6 Incorporation of switching devices and components10.7 Internal electrical circuits and connections	Meets the product standard's requirements.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Meets the product standard's requirements.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Does not apply, since the entire switchgear needs to be evaluated.         Is the panel builder's responsibility.

10.10 Temperature rise	The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.
10.11 Short-circuit rating	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.12 Electromagnetic compatibility	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function	The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.
Additional information
