## DATASHEET - PFIM-80/2/03-MW

Residual current circuit breaker (RCCB), 80A, 2p, 300mA, type AC

Part no. Catalog No.

PFIM-80/2/03-MW 235404

Similar to illustration

## **Delivery program**

| Basic function               |                 |    | Residual current circuit-breakers  |
|------------------------------|-----------------|----|--|
| Number of poles              |                 |    | 2 pole   |
| Application                  |                 |    | Residual current circuit-breaker for residential and commercial applications |
| Rated current                | In              | А  | 80   |
| Rated short-circuit strength | I <sub>cn</sub> | kA | 10   |
| Rated fault current          | $I_{\Delta N}$  | А  | 0.3  |
| Туре                         |                 |    | Туре АС  |
| Tripping                     |                 | s  | non-delayed  |
| Product range                |                 |    | PFIM   |
| Sensitivity                  |                 |    | AC current sensitive   |
| Impulse withstand current    |                 |    | Partly surge-proof 250 A   |

## **Technical data Electrical**

| Electrical   |                      |      |   |
|--|----------------------|------|---|
| Standards  |                      |      | IEC/EN 61008  |
| Rated operational voltage  | U <sub>e</sub>       | V    |   |
|  | U <sub>e</sub>       | V AC |   |
| Rated operating voltage  | U <sub>e</sub>       | V AC | 230   |
| Rated frequency  | f                    | Hz   | 50  |
| Limit values of the operating voltage  |                      |      |   |
| Test circuit   |                      | V AC | 196 - 264   |
| Sensitivity  |                      |      | AC current sensitive  |
| Rated insulation voltage   | Ui                   | V    | 440   |
| Rated impulse withstand voltage  | U <sub>imp</sub>     | kV   | 4   |
| Rated short-circuit strength   | I <sub>cn</sub>      | kA   | 10  |
| Rated making and breaking capacity / Rated residual making and breaking capacity | $I_m / I_{\Delta m}$ | А    | 800   |
| lifespan   |                      |      |   |
| Electrical   | Operations           |      | ≧ 4000  |
| Mechanical   | Operations           |      | ≧ 20000   |
| References   |                      |      |   |
| Auxiliary switch for subsequent installation                                     |                      |      | Z-HK 248432   |
| Tripping signal contact for subsequent installation                              |                      |      | Z-NHK 248434  |

| Compact enclosure  |                      |      | KLV-TC-2 276240   |
| Sealing cover set  |                      |      | Z-RC/AK-2MU 285385  |
| Mechanical   |                      |      |   |
| Standard front dimension   |                      | mm   | 45  |
| Device height  |                      | mm   | 80  |
| Built-in width   |                      | mm   | 35 (2TE)  |
| Mounting   |                      |      | Quick attachment with 2 latch positions for DIN-rail IEC/EN 60715 |
| Degree of Protection   |                      |      | IP40, IP54 (with moisture-proof enclosure)                        |
| Terminals top and bottom   |                      |      | Open mouthed/lift terminals                                       |
| Terminal protection  |                      |      | DGUV VS3, EN 50274  |
| Terminal cross-section   |                      |      |   |
|  |                      |      |   |

| Solid  |                   | mm <sup>2</sup> | 1.5 - 35   |
|--|-------------------|-----------------|--|
| Stranded   |                   | mm <sup>2</sup> | 2 x 16   |
| Thickness of busbar material   |                   | mm              | 0.8 - 2  |
| Permissible storage and transport temperatures   |                   | °C              | -35 - +60  |
| Climatic proofing  |                   |                 | 25-55°C/90-95% relative humidity according to IEC 60068-2  |
| Thickness of busbar material   |                   | mm              |  |
| Material thickness   |                   | mm              | 0.8 - 2  |
| Design verification as per IEC/EN 61439  |                   |                 |  |
| Technical data for design verification   |                   |                 |  |
| Rated operational current for specified heat dissipation   | I <sub>n</sub>    | A               | 80   |
| Heat dissipation per pole, current-dependent   | P <sub>vid</sub>  | W               | 0  |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub>  | W               | 8.6  |
| Static heat dissipation, non-current-dependent   | P <sub>vs</sub>   | W               | 0  |
| Heat dissipation capacity  | P <sub>diss</sub> | W               | 0  |
| Operating ambient temperature min.   | ' diss            | °C              | -25  |
| Operating ambient temperature max.   |                   | °C              | 60   |
|  |                   | U               | Starting at 40 °C, the max. permissible continuous current decreases by 1.2% for every 1 °C                                      |
| IEC/EN 61439 design verification   |                   |                 |  |
| 10.2 Strength of materials and parts   |                   |                 |  |
| 10.2.2 Corrosion resistance  |                   |                 | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |                 | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |                 | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |                 | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |                 | Meets the product standard's requirements.   |
| 10.2.5 Lifting   |                   |                 | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   |                   |                 | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  |                   |                 | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  |                   |                 | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   |                   |                 | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   |                   |                 | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |                   |                 | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  |                   |                 | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   |                   |                 | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |                   |                 |  |
| 10.9.2 Power-frequency electric strength   |                   |                 | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   |                   |                 | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   |                   |                 | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   |                   |                 | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   |                   |                 | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  |                   |                 | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  |                   |                 | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## **Technical data ETIM 7.0**

Circuit breakers and fuses (EG000020) / Residual current circuit breaker (RCCB) (EC00003)

Electric engineering, automation, process control engineering / Electrical installation, device / Residual current protection system / Residual current circuit breaker (RCCB)

Number of poles
