#### DATASHEET - PFIM-40/4/003-G/A-MW

Residual current circuit breaker (RCCB), 40A, 4p, 30mA, type G/A

Part no. Catalog No.

PFIM-40/4/003-G/A-MW 235454

0001609336

EL-Nummer (Norway)

Similar to illustration

### **Delivery program**

| Basic function               |                 |    | Residual current circuit-breakers  |
|------------------------------|-----------------|----|--|
| Number of poles              |                 |    | 4 pole   |
| Application                  |                 |    | Residual current circuit-breaker for residential and commercial applications |
| Rated current                | In              | А  | 40   |
| Rated short-circuit strength | I <sub>cn</sub> | kA | 10   |
| Rated fault current          | $I_{\Delta N}$  | А  | 0.03   |
| Туре                         |                 |    | Type G/A (ÖVE E 8601)  |
| Tripping                     |                 | s  | Short time-delayed   |
| Product range                |                 |    | PFIM   |
| Sensitivity                  |                 |    | Pulse-current sensitive  |
| Impulse withstand current    |                 |    | Surge-proof, 3 kA  |

| Standard front dimension   |                      | mm   | 45  |
| Device height  |                      | mm   | 80  |
| Built-in width   |                      | mm   | 70 (4TE)  |
| Mounting   |                      |      | Quick attachment with 2 latch positions for DIN-rail IEC/EN 60715 |
| Degree of Protection   |                      |      | IP20, IP40 with suitable enclosure                                |
| Terminals top and bottom   |                      |      | Open mouthed/lift terminals                                       |
| Terminal protection  |                      |      | DGUV VS3, EN 50274  |

| Terminal cross-section                         |                 |   |
|--|-----------------|---|
| Solid  | mm <sup>2</sup> | 1.5 - 35  |
| Stranded                                       | mm <sup>2</sup> | 2 x 16  |
| Thickness of busbar material                   | mm              | 0.8 - 2   |
| Permissible storage and transport temperatures | °C              | -35 - +60   |
| Climatic proofing                              |                 | 25-55°C/90-95% relative humidity according to IEC 60068-2 |
| Thickness of busbar material                   | mm              |   |
| Material thickness                             | mm              | 0.8 - 2   |

# Design verification as per IEC/EN 61439

| Technical data for design verification   |                   |    |  |
|--|-------------------|----|--|
| Rated operational current for specified heat dissipation   | In                | А  | 40   |
| Heat dissipation per pole, current-dependent   | P <sub>vid</sub>  | W  | 0  |
| Equipment heat dissipation, current-dependent  | P <sub>vid</sub>  | W  | 9.6  |
| Static heat dissipation, non-current-dependent   | P <sub>vs</sub>   | W  | 0  |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0  |
| Operating ambient temperature min.   |                   | °C | -25  |
| Operating ambient temperature max.   |                   | °C | 60   |
|  |                   |    | Starting at 40 °C, the max. permissible continuous current decreases by 2.5% for every 1 °C                                      |
| IEC/EN 61439 design verification   |                   |    |  |
| 10.2 Strength of materials and parts   |                   |    |  |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  |                   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   |                   |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  |                   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   |                   |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |                   |    |  |
| 10.9.2 Power-frequency electric strength   |                   |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   |                   |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   |                   |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   |                   |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  |                   |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
