### **DATASHEET - DILK20-11(380V50/60HZ)**

Contactor for capacitors, with series resistors, 20 kVAr, 380 V 50/60 Hz

Part no. DILK20-11(380V50/60HZ)
Catalog No. 294018
Alternate Catalog XTCC020C11AR

Powering Business Worldwide\*

#### **Delivery program**

| Product range   |   |      | DILK Contactors for capacitors         |
|---|---|------|--|
| Application   |   |      | Contactors for power factor correction |
| Description   |   |      | with series resistors                  |
| Rated power of AC-6b three-phase capacitors, 50 - 60 Hz |   |      |  |
| Open  |   |      |  |
| 230 V   | ۵ | kVAr | 11                                     |
| 400 V   | ۵ | kVAr | 20                                     |
| 525 V   | Q | kVAr | 25                                     |
| 690 V   | ۵ | kVAr | 33.3                                   |
| Contact sequence  |   |      | A1                                     |
| Actuating voltage                                       |   |      | 380 V 50/60 Hz                         |

Instructions In the case of group compensation multi-stage capacitor banks are connected to the mains, as required. Transient currents of up to 180 × le could flow between the capacitors. The capacitors are pre-charged via the early-make auxiliary contacts and the fitted wire resistors, thereby reducing the inrush current. The main contacts then close in a time-delayed manner and bring about the continuous current. Due to their special contacts, the contactors for the capacitors are weld-resistant for capacitors with inrush current peaks

Due to their special contacts, the contactors for capacitors are weld-resistant for capacitors with inrush current peaks up to 180 × I<sub>e</sub>.

| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  |                   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   |                   |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  |                   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   |                   |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |                   |    |  |
| 10.9.2 Power-frequency electric strength   |                   |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   |                   |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   |                   |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   |                   |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  |                   |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

| Rated control supply voltage Us at AC 50HZ   | V | 380 | 0 - 380        |
| Rated control supply voltage Us at AC 60HZ   | V | 380 | 0 - 380        |
| Rated control supply voltage Us at DC  | V | 0 - | 0              |
| Voltage type for actuating   |   | AC  |                |
| Number of auxiliary contacts as normally open contact  |   | 1   |                |
| Number of auxiliary contacts as normally closed contact  |   | 1   |                |
| Type of electrical connection of main circuit  |   | Scr | rew connection |
| Number of main contacts as normally open contact   |   | 3   |                |

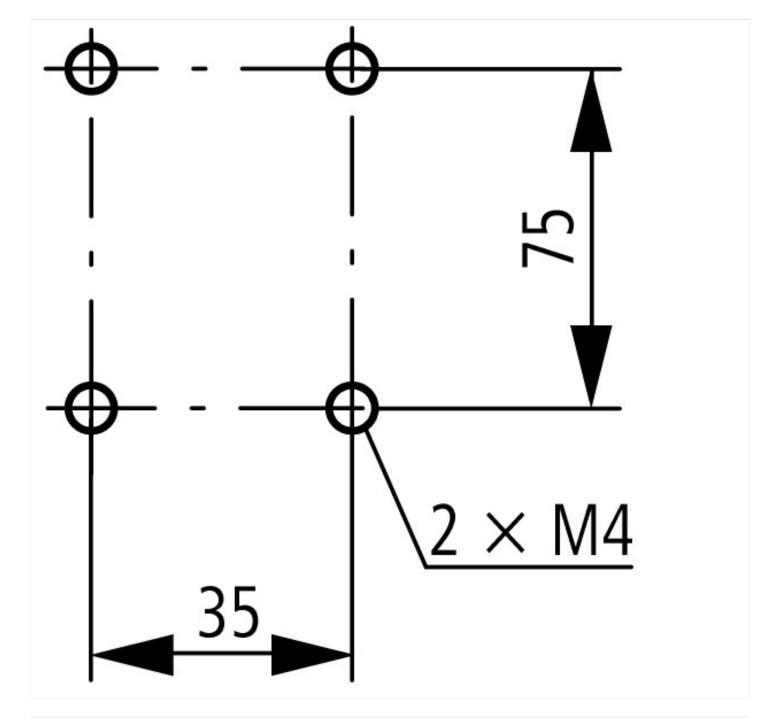

| Number of normally closed contacts as main contact |      | 0  |
|--|------|----|
| Rated blind power at 400 V, 50 Hz                  | kvar | 20 |

## Approvals

| Product Standards                    | IEC/EN 60947-4-1; UL 60947-4-1; CSA - C22.2 No. 60947-4-1-14; CE marking |
|--------------------------------------|--|
| UL File No.                          | E29096   |
| UL Category Control No.              | NLDX   |
| CSA File No.                         | 012528   |
| CSA Class No.                        | 3211-04  |
| North America Certification          | UL listed, CSA certified   |
| Specially designed for North America | No   |
