

**Residual current circuit breaker (RCCB), 25A, 2p, 30mA, type G/A**

**Part no. FRCMM-25/2/003-G/A-NA**  
**Catalog No. 167119**

Similar to illustration

## Delivery program

|                              |                |      |   |
|------------------------------|----------------|------|---|
| Basic function               |                |      | Residual current circuit-breakers   |
| Number of poles              |                |      | 2 pole  |
| Application                  |                |      | Switchgear for export to North America (UL-listed)                                  |
| Rated current                | $I_n$          | A    | 25  |
| Rated short-circuit strength | $I_{cn}$       | kA   | 10 with back-up fuse  |
| Rated fault current          | $I_{\Delta N}$ | A    | 0.03  |
| Type                         |                |      | Type G/A (ÖVE E 8601)   |
| Tripping                     |                | s... | Short time-delayed  |
| Product range                |                |      | FRCmM-NA  |
| Sensitivity                  |                |      | Pulse-current sensitive   |
| Impulse withstand current    |                |      | Surge-proof, 3 kA   |
| Contact sequence             |                |      |  |

## Technical data

### Electrical

|  |                      |      |                            |
|--|----------------------|------|----------------------------|
| Types conform to   |                      |      | ÖVE E 8601                 |
| Current test marks   |                      |      | As per inscription         |
| Tripping   |                      | s... | 10 ms delay at 50 Hz       |
| Rated voltage according to IEC/EN 60947-2  | $U_n$                | V AC | 240/415                    |
| Rated frequency  | f                    | Hz   | 50/60                      |
| Limit values of the operating voltage  |                      |      |                            |
| Test circuit   |                      | V AC | 184 - 250                  |
| Rated fault current  | $I_{\Delta n}$       | mA   | 30                         |
| Sensitivity  |                      |      | Pulse-current sensitive    |
| Rated insulation voltage   | $U_i$                | V    | 440                        |
| Rated impulse withstand voltage  | $U_{imp}$            | kV   | 4 (1.2/50µs)               |
| Rated short-circuit strength   | $I_{cn}$             | kA   | 10 with back-up fuse       |
| Impulse withstand current  |                      |      | 3 kA (8/20 µs) surge-proof |
| Max. admissible back-up fuse   |                      |      |                            |
| Short-circuit  | gG/gL                | A    | 63                         |
| Overload   | gG/gL                | A    | 25                         |
| Rated making and breaking capacity / Rated residual making and breaking capacity | $I_m / I_{\Delta m}$ | A    | 500                        |
| lifespan   |                      |      |                            |
| Electrical   | Operations           |      | ≥ 4000                     |
| Mechanical   | Operations           |      | ≥ 10000                    |

### Electrical

|                    |  |  |                     |
|--------------------|--|--|---------------------|
| Types conform to   |  |  | UL1053              |
| Current test marks |  |  | As per inscription  |
| Tripping           |  |  | 8 ms delay at 60 Hz |

|  |                      |      |  |
|--|----------------------|------|--|
| Rated voltage according to UL  | $U_n$                | V AC | 480Y/277 V, 60 Hz  |
| Limit values of the operating voltage  |                      |      |  |
| Test circuit   |                      | V AC | 196 - 305  |
| Pick-up current  |                      | mA   | 22   |
| Sensitivity  |                      |      | Pulse-current sensitive  |
| Overvoltage-tested   |                      | V    | 530  |
| Rated impulse withstand voltage  | $U_{imp}$            | kV   | 4 (1.2/50 $\mu$ s)   |
| Rated short-circuit strength   | $I_{cn}$             | kA   | 5 as per CSA   |
| Max. admissible back-up fuse   |                      |      |  |
| Short-circuit  |                      |      | 70 A class J fuse  |
| Overload   |                      |      | The maximum operating current must not exceed the residual current circuit-breaker's rated operational current |
| Rated making and breaking capacity / Rated residual making and breaking capacity | $I_m / I_{\Delta m}$ | A    | 500  |
| lifespan   |                      |      |  |
| Electrical   | Operations           |      | $\geq 4000$  |
| Mechanical   | Operations           |      | $\geq 10000$   |

## Mechanical

|  |  |                 |   |
|--|--|-----------------|---|
| Standard front dimension                       |  | mm              | 45  |
| Device height                                  |  | mm              | 80  |
| Built-in width                                 |  | mm              | 35 (2TE)  |
| Mounting                                       |  |                 | Quick attachment with 2 latch positions for DIN-rail IEC/EN 60715         |
| Degree of Protection                           |  |                 | IP40, IP54 (with moisture-proof enclosure)                                |
| Terminals top and bottom                       |  |                 | Lift terminals  |
| Terminal protection                            |  |                 | Busbar tag shroud to BGV A3, ÖVE-EN 6                                     |
| Terminal cross-section                         |  |                 |   |
| Solid  |  | mm <sup>2</sup> | 1.5 - 35  |
| Stranded                                       |  | mm <sup>2</sup> | 2 x 16  |
| Terminal cross-section                         |  |                 | M5 (with cross-recessed screw as defined in EN ISO 4757-Z2, Pozidriv PZ2) |
| Admissible ambient temperature range           |  | °C              | -25 - +40   |
| Permissible storage and transport temperatures |  | °C              | -35 - +60   |
| Climatic proofing                              |  |                 | 25-55°C/90-95% relative humidity according to IEC 60068-2                 |
| Humidity                                       |  | %               | 5 - 95  |
| Pollution degree                               |  |                 | 2   |
| Mounting position                              |  |                 | As required   |
| Contact position indicator                     |  |                 | red / green   |
| Trip indication                                |  |                 | white / blue  |

## Design verification as per IEC/EN 61439

|  |            |    |   |
|--|------------|----|---|
| Technical data for design verification   |            |    |   |
| Rated operational current for specified heat dissipation   | $I_n$      | A  | 25  |
| Heat dissipation per pole, current-dependent   | $P_{vid}$  | W  | 1   |
| Equipment heat dissipation, current-dependent  | $P_{vid}$  | W  | 2   |
| Static heat dissipation, non-current-dependent   | $P_{vs}$   | W  | 0   |
| Heat dissipation capacity  | $P_{diss}$ | W  | 0   |
| Operating ambient temperature min.   |            | °C | -25   |
| Operating ambient temperature max.   |            | °C | 55  |
|  |            |    | Starting at 40 °C, the max. permissible continuous current decreases by 3% for every 1 °C |
| IEC/EN 61439 design verification   |            |    |   |
| 10.2 Strength of materials and parts   |            |    |   |
| 10.2.2 Corrosion resistance  |            |    | Meets the product standard's requirements.  |
| 10.2.3.1 Verification of thermal stability of enclosures   |            |    | Meets the product standard's requirements.  |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |            |    | Meets the product standard's requirements.  |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |            |    | Meets the product standard's requirements.  |

|  |  |  |
|--|--|--|
| 10.2.4 Resistance to ultra-violet (UV) radiation         |  | Meets the product standard's requirements.   |
| 10.2.5 Lifting   |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact                                 |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions                                      |  | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES                  |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances                   |  | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock                   |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections        |  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors                 |  | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |  |
| 10.9.2 Power-frequency electric strength                 |  | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         |  | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material |  | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   |  | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               |  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility                      |  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function                                |  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

## Technical data ETIM 7.0

Circuit breakers and fuses (EG000020) / Residual current circuit breaker (RCCB) (EC000003)
