Accessories		Undervoltage release with early-make auxiliary contact
Standard/Approval		UL/CSA, IEC
Construction size		NZM1
Description		Undervoltage release with 2 early-make auxiliary contacts, e.g., for early-make connection of undervoltage release in main switch applications, as well as for interlock and load shedding circuits.  For use with emergency-stop devices in connection with an emergency-stop button.  When the under-voltage trip is switched off, accidental contact with the circuit breaker's primary contacts is prevented when switched on.  Early make of auxiliary contacts on switching on and off (manual operation): approx. 20 ms  Undervoltage releases cannot be installed simultaneously with NZMXHIV early-make auxiliary contact or NZMXA shunt release.
Connection type		with 3 m connection cable instead of screw termination
Auxiliary contacts		with 2 early-make auxiliary contacts
Rated control voltage	Us	V 110 - 130 V 50/60 Hz
For use with		NZM1(-4), N(S)1(-4)
