#### **DATASHEET - FAZ-D2/1N**

#### Miniature circuit breaker (MCB), 2A, 1pole+N, type D characteristic

Powering Business Worldwide\*

Part no. FAZ-D2/1N Catalog No. 278685 Alternate Catalog FAZ-D2/1N

No.

EL-Nummer (Norway) 1666768

|--|-------------------|----|---|
| Technical data for design verification   |                   |    |   |
| Rated operational current for specified heat dissipation   | In                | Α  | 2   |
| Heat dissipation per pole, current-dependent   | $P_{vid}$         | W  | 0   |
| Equipment heat dissipation, current-dependent  | $P_{vid}$         | W  | 1.1   |
| Static heat dissipation, non-current-dependent   | $P_{vs}$          | W  | 0   |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0   |
| Operating ambient temperature min.   |                   | °C | -40   |
| Operating ambient temperature max.   |                   | °C | 75  |
|  |                   |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| EC/EN 61439 design verification  |                   |    |   |
| 10.2 Strength of materials and parts   |                   |    |   |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.                                  |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.                                  |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.2.6 Mechanical impact   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.2.7 Inscriptions  |                   |    | Meets the product standard's requirements.                                  |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.4 Clearances and creepage distances   |                   |    | Meets the product standard's requirements.                                  |
| 10.5 Protection against electric shock   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.6 Incorporation of switching devices and components   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.          |
| 10.7 Internal electrical circuits and connections  |                   |    | Is the panel builder's responsibility.                                      |
| 10.8 Connections for external conductors   |                   |    | Is the panel builder's responsibility.                                      |
| 10.9 Insulation properties   |                   |    |   |
| 10.9.2 Power-frequency electric strength   |                   |    | Is the panel builder's responsibility.                                      |
| 10.9.3 Impulse withstand voltage   |                   |    | Is the panel builder's responsibility.                                      |
| 10.9.4 Testing of enclosures made of insulating material   |                   |    | Is the panel builder's responsibility.                                      |

| 10.10 Temperature rise              | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
|-------------------------------------|--|
| 10.11 Short-circuit rating          | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function           | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
