#### **DATASHEET - RCDILE250-C**

RC suppressor circuit, 110 - 250 AC V, For use with: DILE...-C

Powering Business Worldwide\*

Part no. RCDILE250-C Catalog No. 230268 Alternate Catalog XTMCXRSCB

#### **Delivery program**

Accessories			Suppressor circuit
Description			RC suppressor
Actuating voltage	$U_s$	V	110 - 250 AC
Contact sequence			A1 A2
For use with			DILEC
Instructions For AC operation contactors 50 - 60 Hz. The suppressor is fitted as standard in DC operated contactor relays. Note drop-out delay			

Technical data for design verification  Rated operational current for specified heat dissipation  Heat dissipation per pole, current-dependent  Pvid  V  0  Equipment heat dissipation, current-dependent  Pvid  V  0  Static heat dissipation, non-current-dependent  Pvid  V  0  Operating ambient temperature min.  Operating ambient temperature max.  **CC -25  Operating ambient temperature max.  **IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of fresistance of insulating materials to normal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.5 Lifting  10.2.6 Mechanical impact  10.2.7 Inscriptions  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to the product standard's requirements.  The product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to the product standard's requirements.	
Heat dissipation per pole, current-dependent  Equipment heat dissipation, current-dependent  Poid  W  0  Static heat dissipation, non-current-dependent  Pois  W  0  Operating ambient temperature min.  Operating ambient temperature max.  C  C  50  IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated to 10.2.7 Inscriptions  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated on the product standard's requirements.  Meets the product standard's requirements.

Does not apply, since the entire switchgear needs to be evaluated by the product standard's requirements.  Meets the product standard's requirements.	
IEC/EN 61439 design verification  10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  10.2.7 Inscriptions  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated be applied by the product standard's requirements.  Meets the product standard's requirements.	
10.2 Strength of materials and parts  10.2.2 Corrosion resistance  10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  Meets the product standard's requirements.  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to be a product standard's requirements.  10.2.6 Mechanical impact  Does not apply, since the entire switchgear needs to be evaluated to be a product standard's requirements.	
10.2.2 Corrosion resistance  Meets the product standard's requirements.  10.2.3.1 Verification of thermal stability of enclosures  Meets the product standard's requirements.  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated to be evaluated Does not apply, since the entire switchgear needs to be evaluated Meets the product standard's requirements.	
10.2.3.1 Verification of thermal stability of enclosures  10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated	
10.2.3.2 Verification of resistance of insulating materials to normal heat  10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  10.2.5 Lifting  10.2.6 Mechanical impact  10.2.7 Inscriptions  Meets the product standard's requirements.  Does not apply, since the entire switchgear needs to be evaluated to the product standard's requirements.  Meets the product standard's requirements.	
10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated to be	
and fire due to internal electric effects  10.2.4 Resistance to ultra-violet (UV) radiation  Meets the product standard's requirements.  10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated  10.2.6 Mechanical impact  Does not apply, since the entire switchgear needs to be evaluated  Meets the product standard's requirements.	
10.2.5 Lifting  Does not apply, since the entire switchgear needs to be evaluated to be evalua	
10.2.6 Mechanical impact  Does not apply, since the entire switchgear needs to be evaluated Meets the product standard's requirements.	
10.2.7 Inscriptions  Meets the product standard's requirements.	
10.3 Degree of protection of ASSEMBLIES  Does not apply, since the entire switchgear needs to be evaluated	
10.4 Clearances and creepage distances  Meets the product standard's requirements.	
10.5 Protection against electric shock  Does not apply, since the entire switchgear needs to be evaluated	
10.6 Incorporation of switching devices and components  Does not apply, since the entire switchgear needs to be evaluated	
10.7 Internal electrical circuits and connections Is the panel builder's responsibility.	
10.8 Connections for external conductors Is the panel builder's responsibility.	
10.9 Insulation properties	
10.9.2 Power-frequency electric strength Is the panel builder's responsibility.	
10.9.3 Impulse withstand voltage Is the panel builder's responsibility.	
10.9.4 Testing of enclosures made of insulating material Is the panel builder's responsibility.	
10.10 Temperature rise  The panel builder is responsible for the temperature rise calculation provide heat dissipation data for the devices.	n. Eaton will
10.11 Short-circuit rating  Is the panel builder's responsibility. The specifications for the swit observed.	chgear must b

10.12 Electromagnetic compatibility	Is the panel builder's responsibility. The specifications for the switchgear must be observed.
10.13 Mechanical function	The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

## **Technical data ETIM 7.0**

Low-voltage industrial components (EG000017) / Surge protection module (EC000683)				
Electric engineering, automation, process control engineering / Low-voltage switch technology / Contactor (LV) / Component for protective circuit (ecl@ss10.0.1-27-37-10-10 [AKF019013])				
Function			RC-element	
Rated control supply voltage Us at AC 50HZ	V	/	250 - 250	
Rated control supply voltage Us at AC 60HZ	V	/	250 - 250	
Rated control supply voltage Us at DC	V	/	0 - 0	
Voltage type for actuating			AC	
With LED indication			No	

# Approvals

Product Standards	IEC/EN 60947-4-1; UL 508; CSA-C22.2 No. 14-05; CE marking
UL File No.	E29184
UL Category Control No.	NKCR2
CSA File No.	-
North America Certification	UL recognized
Specially designed for North America	No
