|--|--|
| 10.2.7 Inscriptions                                      | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES                  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances                   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock                   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections        | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors                 | Is the panel builder's responsibility.   |
| 10.9 Insulation properties                               |  |
| 10.9.2 Power-frequency electric strength                 | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage                         | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material | Is the panel builder's responsibility.   |
| 10.10 Temperature rise                                   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating                               | Is the panel builder's responsibility. The specifications for the switchgear must observed.                                      |
| 10.12 Electromagnetic compatibility                      | Is the panel builder's responsibility. The specifications for the switchgear must observed.                                      |
| 10.13 Mechanical function                                | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

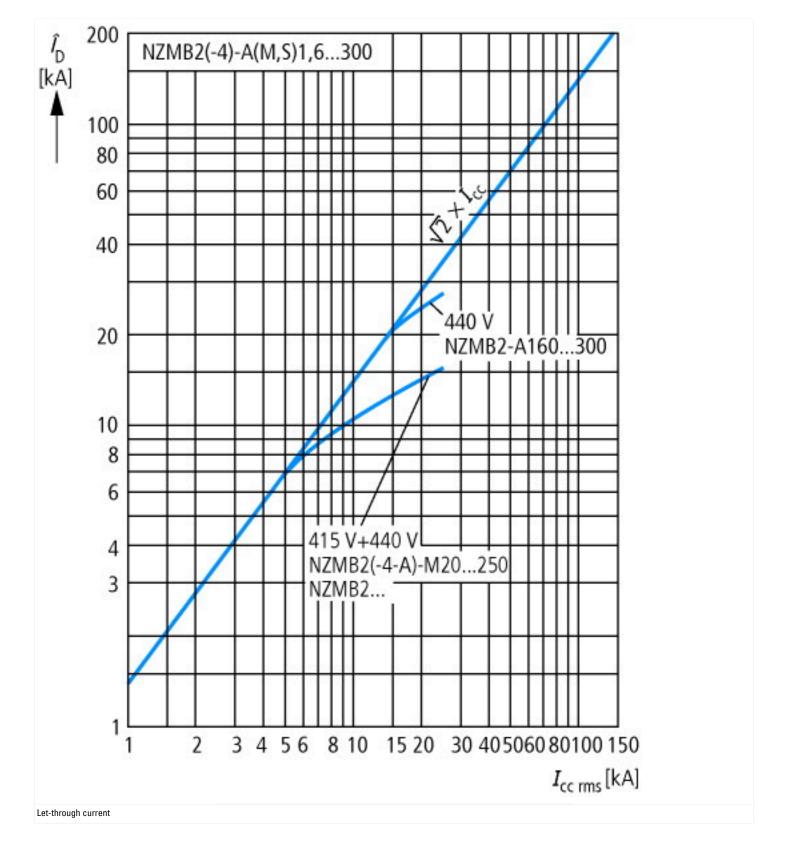

#### **Technical data ETIM 7.0**

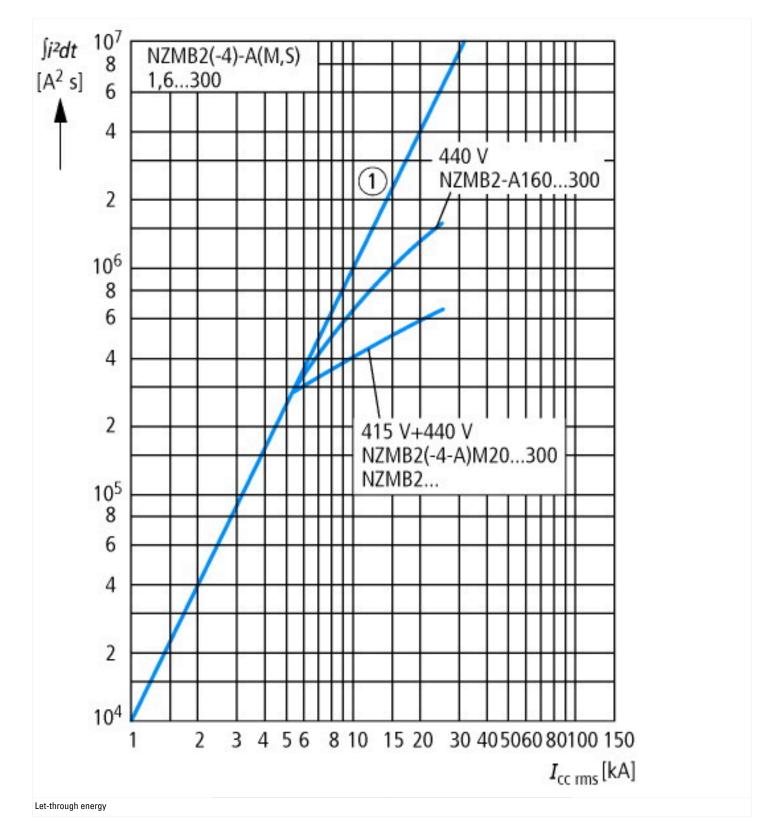

Low-voltage industrial components (EG000017) / Power circuit-breaker for trafo/generator/installation protection (EC000228)

Electric engineering, automation, process control engineering / Low-voltage switch technology / Circuit breaker (LV < 1 kV) / Circuit breaker for power transformer, generator and system protection (ecl@ss10.0.1-27-37-04-09 [AJZ716013])

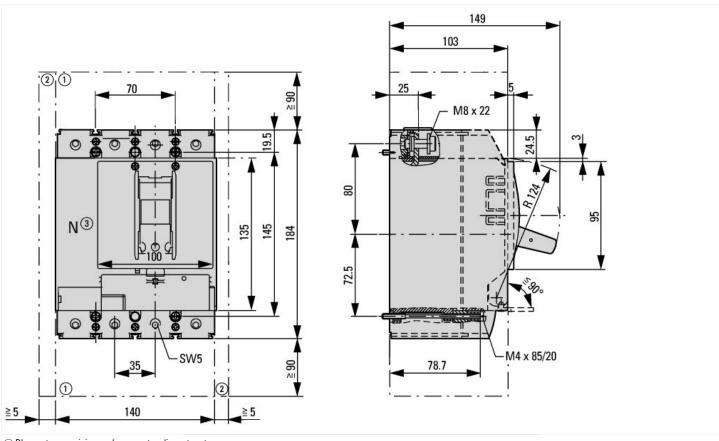

| d permanent current lu  d voltage  V  d short-circuit breaking capacity Icu at 400 V, 50 Hz  kA  load release current setting  A stment range short-term delayed short-circuit release  A stment range undelayed short-circuit release  A prated earth fault protection  of electrical connection of main circuit  ce construction | 200 440 - 440 25 160 - 200 0 - 0 6 - 10 No Screw connection Built-in device fixed built-in technique |

| ce construction  | Built in device fixed built in technique   |
|  | Dulit-III device fixed bulit-III technique   |
| ble for DIN rail (top hat rail) mounting   | No   |
| rail (top hat rail) mounting optional  | Yes  |
| ber of auxiliary contacts as normally closed contact   | 0  |
| ber of auxiliary contacts as normally open contact   | 0  |
| ber of auxiliary contacts as change-over contact   | 0  |
| switched-off indicator   | No   |
| under voltage release  | No   |
| ber of poles   | 4  |
| ion of connection for main current circuit   | Front side   |
| of control element   | Rocker lever   |
| plete device with protection unit  | Yes  |
| or drive integrated  | No   |
| or drive optional  | Yes  |
| ee of protection (IP)  | IP20   |
