### DATASHEET - STZ4,0(\*/\*)

Control transformer, 4 kVA, Rated input voltage 50 - 950 ± 5 % V, Rated output voltage 12 – 1000 V

Part no. STZ4,0(\*/\*) Catalog No. 914777 **Alternate Catalog** No.

### **Delivery program**

| Product range        |     | Single-phase control transformers ST                             |
|----------------------|-----|--|
| Basic function       |     | Single-phase control, isolating and safety transformers STI, STZ |
| Rated input voltage  | V   | 50 - 950 ± 5 %   |
| Rated output voltage | v   | 12 - 1000  |
| Rated power          | kVA | 4  |
| Short-time rating    | kVA | 15   |
| Cu factor 10,40      |     |  |

Notes

• Transformers with the rated output voltages ≤ 50 V can be used as safety transformers to IEC/EN 61558.

• UL/CSA only up to primary and secondary 600 V (incl. tapping).

When ordering, the type reference must include the following details:

#### STZ0,06(\*/\*)

1st wildcard ≙ Nominal input voltage

2nd wildcard ≙ Rated output voltage

#### **Ordering example**

- Desired part no. STZ0,06
- Desired rated input voltage 230 V
  Desired rated output voltage 12 V

The correct type reference is

#### STZ0,06(230/12)

Additional tappings -> 931897

| Technical data             |      |   |

| IEC/EN 61439 design verification   |                   |    |  |
| 10.2 Strength of materials and parts   |                   |    |  |
| 10.2.2 Corrosion resistance  |                   |    | Meets the product standard's requirements.   |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    | Meets the product standard's requirements.   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects |                   |    | Meets the product standard's requirements.   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    | Meets the product standard's requirements.   |
| 10.2.5 Lifting   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  |                   |    | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   |                   |    | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   |                   |    | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  |                   |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   |                   |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |                   |    |  |
| 10.9.2 Power-frequency electric strength   |                   |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   |                   |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   |                   |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   |                   |    | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  |                   |    | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  |                   |    | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |
|  |                   |    |  |
