

**Ref. No. 685883 | Cat. No. CONTAXRAUX11****Description: Add-on auxiliary contact 1NO 1NC****EAN 5413656858836****Home > Modular DIN-rail devices > Comfort functions > Relays**

Description:

**• Function:**

Relays are electromechanically controlled switches used to control low power loads.

**• Applications:**

Switching of lighting, heating, etc.

Galvanic insulation of i.e. status signalisation lamps from a (high) power (high voltage) circuit.

Galvanic insulation of PLC-inputs or outputs to avoid destruction through excessive voltage.

**• Features:**

The switch position is visualised by the position of the front handle.

The safety terminals are equipped with captive Pozidriv screws and have IP20 protection degree.

Add-on auxiliary contacts available.

Because of the advanced product design, no spacers are needed.

Increased safety: sealing caps for both coil and terminal are available.
