Ver.2

Category 4 PLe SIL3

panasonic.net/id/pidsx/global

The control category differs depending on the configuration and wiring of the external circuit.

Protection structure IP67

New version with improved environmental resistance performance

It is possible to select from each three types of standard / robust types depending on the worksite

A wide range of variations are available with protective heights of 230 to 1,910 mm **9.055 to 75.197 in** (1,270 mm **50.000 in** for the finger protection type). Mixing six types in a series connection is also possible.

Finger protection type	SF4B-F□(G□)<V2>	Hand protection type	SF4B-H□(G□)<V2>	Arm / Foot protection type	SF4B-A□(G□)<V2>
	Minimum sensing object ø14 mm ø0.551 in (10 mm 0.394 in beam pitch)		Minimum sensing object ø25 mm ø0.984 in (20 mm 0.787 in beam pitch)		Minimum sensing object ø45 mm ø1.772 in (40 mm 1.575 in beam pitch)

* In the case of "When used as safety device for presses in China", the protective height differs. For details, refer to p.509~ / p.534~ and "Definition of sensing heights" (p.645).

Global support for the safety of press machines or shear (paper cutting) machines

Can be widely used for press machines and other types of equipment from Japan, Europe, North America, South Korea, and China.

APPLICATIONS

Detecting the intrusion and presence of a human being

Detecting the intrusion of a human being: Example 1

The safety light curtains allow you to discriminate between a workpiece and a human being by performing muting control for each beam axis.

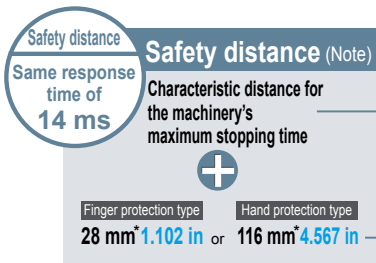

Detecting the intrusion of a human being: Example 2

By using the fixed blanking function, obstacles that always exist are ignored.

A unified response time of 14 ms for all models makes calculation work easy

A fast response time of 14 ms has been achieved regardless of the number of beam channels, the beam axis pitches and the number of units connected in series. This reduces calculation work required for the safety distance.

14 ms even in case of 3 units connected in series!

* It is the characteristic distance for safety light curtain based on ISO 13855.

Note: Calculate the safety distance based on the distance depending on the safety light curtain and the distance depending on the maximum halting time of machinery. Install the safety light curtain according to the relevant standards of the region where the safety light curtain is used.

Improved environmental resistance performance and easier operability

New structure

Protection structure IP67 in a very compact size

A seamless structure with minimal joints has now been developed. The inner unit is protected by a cylindrical inner case. Seams on the unit and lens surfaces have been greatly reduced so that particles such as oil mists and dust are prevented from penetrating the case. Thus, the environmental resistance performance could be raised.

Cylindrical inner case protects the internal unit.

This new structure does not use adhesive or double-sided tape on the joints like with the previous models. There is no need to worry about water immersion or corrosion such as a coolant causing the adhesive to strip off.

SF4B / SF4B-G series Ver.2 has passed the tests of IP65 and IP67 as specified by IEC / JIS standards.

Error details can be understood at a glance with a digital error indicator

The system constantly checks the safety light curtain for problems such as incorrect cable wiring, disconnection, short-circuits, internal circuit problems, and incoming light problems. Details of any electrical problems such as at equipment startup will appear on the digital display. It is no longer necessary to count the number of times the LED blinks, making the system much more convenient.

Error number notification means smooth support via telephone

A muting control function is provided to increase both safety and productivity

(excluding SF4B-□-03<V2>)

The safety light curtain is equipped with a muting control function that causes the line to stop only when a person passes through the safety light curtain, and does not stop the line when an object passes through. The muting sensors and muting lamps can be connected directly to the safety light curtain so that a exclusive controller is not required for muting. This both reduces costs and increases safety and productivity.

Override function allows the line to be restarted smoothly after it has stopped while muting control was active

(excluding SF4B-□-03<V2>)

In case the power turns off while the safety light curtain has been interrupted by an object or in case the line stops before the muting conditions have been established (if only one muting sensor has been interrupted), the line can be restarted smoothly without having to remove the object that is interrupting the safety light curtain.

Example: When power turns off while safety light curtain was interrupted

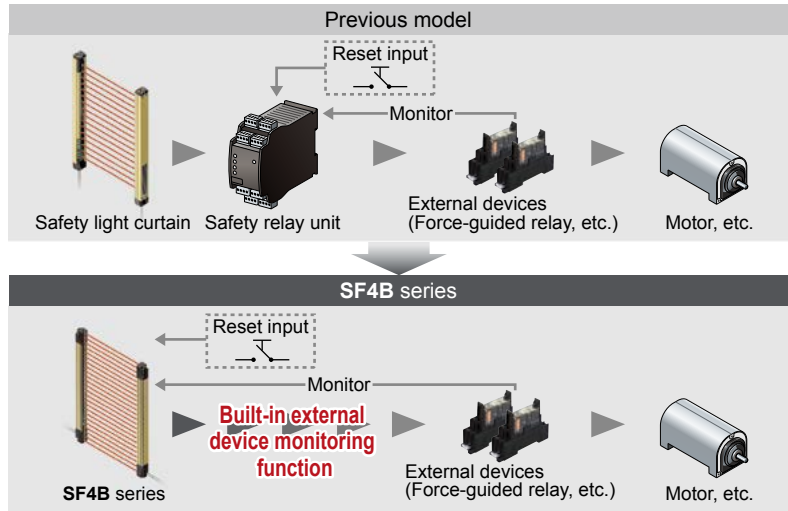

Object must be removed before restart

Smooth restart

Equipped with a safety circuit that does not require an exclusive safety relay unit

The safety light curtain has a built-in external device monitoring function (such as for monitoring whether relays have fused) and an interlock function. The safety circuit is built without safety relay unit and size reduction of a control board is achieved, which contributes to cost reduction.

- Safety relay
Panasonic Corporation
SF relay, slim type

Note: Contact Panasonic Corporation for details on the recommended products.

Beam-axis alignment indicators show the incident light position at a glance

Beam-axis alignment indicators display the beam channels of the safety light curtain in four blocks. When the beam channel at the bottommost channel (or topmost channel), which is used as a reference for beam-axis alignments, is correctly aligned, the LED blinks red. After this, each block lights red as the beam axes successively become aligned. When all channel beam axes are aligned, all LEDs light green. The display also has an additional stability indicator (STB) so that setup can be carried out with greater stability.

Definition of Sensing Heights

Supports both PNP and NPN polarities in a single model

The **SF4B / SF4B-G** series combines PNP transistor output and NPN transistor output in a single model. Overseas equipment that uses PNP, replacement with NPN sensors, factories that are positively grounded, and transfer of equipment overseas are all situations where the control circuits for a single model are suitable for use a.

■ **Polarity can be changed easily by changing wiring**

When the output polarity setting wire (shielded) is connected to 0 V, PNP output is selected, and when it is connected to 24 V, it switches to NPN output.

PNP/NPN polarity indicator
Either PNP or NPN side lights depending on which is selected.

Laser alignment tool for easy installation

The tool performs beam-axis alignment using a laser beam spot. As the tool is battery-operated, it is possible to perform beam-axis alignment before supplying power to the equipment.

Greatly improved ease of installation

(excluding SF4B-□G□<V2>)

New structure

The hexagon-socket head bolts used for aligning the beam axis can be accessed from the front of the safety light curtain. Beam adjustment can be carried out easily while turning the bolts.

Also, the beam-axis alignment part is directly and firmly fixed with M5 bolts so that beam axes misalignment can be prevented.

Easy to distinguish receiver and emitter

Emitter is gray, receiver is black. Whether during startup or maintenance, troubles due to incorrect wiring or false recognition can be greatly reduced. Moreover, the model No. can be checked at the front face of the safety light curtain.

Mutual interference is reduced without needing interference prevention lines

The safety light curtain is equipped with the ELCA (Extraneous Light Check & Avoid) function. Because it automatically shifts the scan timing of the safety light curtain in order to avoid interference, it is not necessary to wire interference prevention lines between machineries.

Reducing the number of malfunctions caused by extraneous light

Double scanning method and retry processing are two new functions exclusive to our company, which successfully eliminate the effects of momentary extraneous light from peripheral equipment. The reduction in operating errors caused by extraneous light reduces frequent stopping of machinery.

Resistant to impact, less damage to workpiece

Thick and robust housing resistant to impact

The **SF4B-G** series safety light curtain is enclosed in a 5 mm **0.197 in** thick robust metal case, protecting the workpiece from various types of impact, such as collision or being stepped on.

Fully protected sensing surface

The sensing surface is fully protected by narrowing and deepening the exposed area of the sensing surface.

Round design minimizes damage to the workpiece

The case is designed so that shock upon impact is dissipated alleviating potential damage to the workpiece in the event of a collision.

Workpiece not contaminated with paint

The body has an alumite-treated case so that paint does not stick to the workpiece in the event of a collision.

Enables series connection with standard type possible

The mating cable is standard, allowing the robust and standard types to be connected in series.

Robust type SF4B-G<V2>

No guard needed

The robust type can be used without an L-shape or U-shape guard, reducing installation and maintenance.

Front protection cover

The front protection cover protects the sensing surface from welding spatter and reduces damage due to collisions.

The beam axis adjuster can be attached without removing the front protection cover.

Protection structure IP67

The seamless structure protects the sensor from being exposed to water.

Mounting bracket for simple & secure installation

The safety light curtain and the mounting bracket are firmly secured with just two bolts. The safety light curtain is situated in the center of the mounting bracket, preventing beam axis deviation. The dimple structure makes alignment easy to adjust.

Black and yellow caution tape

Black and yellow striped attention tape is attached to the side of the safety light curtain, alerting workers to use caution. Hazardous openings are very obvious.

Caution tape
• SF-TP-BG10

Special tape

- Fit to width of safety light curtain
- Made of fabric, making it easy to cut
- Prevent damage at the time of collision

A large reduction in cost by using corner mirror (optional)

A single corner mirror makes it possible to eliminate one safety light curtain set and its associated peripheral safety circuits. This enables costs to be greatly reduced, and also eliminates wiring needs. The control category is unchanged.

Normally for L-shaped or U-shaped installation, 2 or 3 sets of safety light curtains are needed. With the use of a corner mirror reflecting the light, one set of safety light curtain is possible for L-shaped or U-shaped installation.

Handy-controller SFB-HC (optional) that enables the user to select a variety of settings

Separate muting control function for each beam channel

The handy-controller **SFB-HC*** (optional) can be used to carry out muting control for specified beam axes only. Because individual beam axes can be specified to suit the object, separate guards to prevent entry do not need to be set up.

For example, depending on the height of the object, the muting function can be activated for 10 beam channels starting from the bottom, so that if the 11th or subsequent beam channels are interrupted, it is judged that a person has entered the area and the line stops.

* A handy-controller cannot be used with the **SF4B-□-01<V2>**(p.509), **SF4B-□-03<V2>**(p.509) and the **SF-C14EX-01**(p.514 / p.663).

Specific beam axes can be deactivated
The SF4B / SF4B-G series incorporates a fixed blanking function.

The **SF4B / SF4B-G** series is equipped with a fixed blanking function which allows specific beam channels to be selectively interrupted without causing the control output (OSSD) to output the OFF signal. This function is convenient for use with applications in which certain fixed obstacles tend to block specific beam channels. Furthermore, this function provides greater safety as the control output (OSSD) will automatically output the OFF signal if the fixed obstacles are subsequently removed from the sensing area.

A variable number of beam axes can be deactivated
The SF4B / SF4B-G series incorporates a floating blanking function.

1, 2 or 3 non-specified beam channels can be deactivated. If the number of beam channels that are blocked is less than or equal to the set number of beam channels, then the control output (OSSD) will not output the OFF signal. This function is useful in the event when the positions of obstacles within the sensing area must be changed during object rearrangement, or when an object passes through the safety light curtain's sensing area.

Note: When the floating blanking function is used, the acceptable size for the minimum sensing object changes.

Selectable configuration for auxiliary output

Mode No.	Description
0	Negative logic of the control output (OSSD 1, OSSD 2) (factory setting)
1	Positive logic of the control output (OSSD 1, OSSD 2)
2	For emission: output ON, For non-emission: output OFF
3	For emission: output OFF, For non-emission: output ON
4	For unstable incident beam: OFF (Note 1)
5	For unstable incident beam: ON (Note 1)
6	For muting: ON
7	For muting: OFF
8	For beam received: ON, For beam interrupted: OFF (Note 2)
9	For beam received: OFF, For beam interrupted: ON (Note 2)

Notes: 1) The output cannot be used while the fix blanking function, floating blanking function or the muting function is activated.
2) This device outputs the beam received/interrupted state at the detectable area regardless of fixed blanking function, floating blanking function, and muting function.

A variety of other functions can be selected

Emission intensity control function

This function reduces the amount of emitting light. The two modes, normal mode and short mode, can be selected (factory setting: normal mode).

Monitoring function

This function allows the user to confirm the details of each safety light curtain setting.

Protection function

A password protection can be used to avoid unauthorized changes of the settings (factory setting: no password protection).

Copy function

Setting details can be copied to other safety light curtains. This is helpful if you need the same settings on different devices.

Muting lamp diagnosis setting

When the muting lamp diagnosis is disabled, the muting function will continue to operate even if the lamp is blown.

* Refer to the instruction manual for details. The instruction manual can be download from our website.

Lineup of exclusive control units

Supports both PNP and NPN polarities **SF-C10 series**

The **SF4B / SF4B-G** series enables the changeover of PNP/ NPN inputs in a single model for reduction of registered model No.

Connector connection control unit **SF-C11**

The wiring with the safety light curtain is simple connector connection. It reduces time for installation and replacement.

Robust type control unit **SF-C12**

The safety relay is built in the robust metal casing. As the protection structure is IP65, it is possible to install **SF-C12** independently without putting it into the control board.

Thin control unit **SF-C13**

22.5 mm **0.886 in** thinness has been realized. Possible to install in a small space of the board.

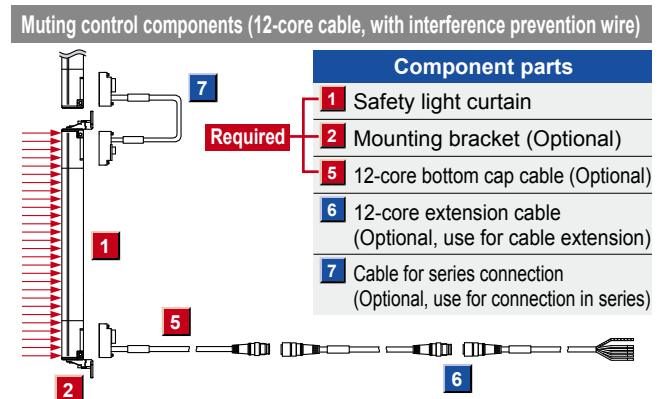

Application expansion unit **SF-C14EX(-01)**

The three safety systems; safety light curtain output, muting control, emergency stop button have been integrated into a single unit.

Notes: 1) The operating range is the possible setting distance between the emitter and the receiver.

- 2) The model No. with "E" on the product label is the emitter, "D" on the label is the receiver.
- 3) In the case of "When used as safety device for presses in China" the distance between the center of the first beam axis and the center of the last beam axis of the device becomes the protective height. The Korean press compliant type SF4B-□-03<V2> does not apply. For details, refer to "Definition of sensing heights" (p.645).

ORDER GUIDE

1 Safety light curtains (Robust type) Mounting bracket and bottom cap cable are not supplied with the safety light curtain. Be sure to order them separately.

Definition of Sensing Heights

Differences from standard type

The robust type SF4B-□G□<V2> is different from the standard type SF4B-□<V2> in the following ways:

- Sensing width (protective height) (Note 1) • Profile • Net weight • Mounting bracket • Front protection cover
- Laser alignment tool • Noncompliant with Japanese and Korean press standard (Note 2)
- Noncompliant with Korean regulations

Other specifications, input/output circuits, and options are the same as for the standard type.

Notes: 1) In the case of "When used as safety device for presses in China", there is no change in the protective height.

2) SF4B-H□G-01<V2> does not comply with Korean press standard only.

3) In the case of "When used as safety device for presses in China" the distance between the center of the first beam axis and the center of the last beam axis of the device becomes the protective height. For details, refer to "Definition of sensing heights" (p.645).

ORDER GUIDE

2 Mounting brackets Mounting bracket is not supplied with the safety light curtain. Be sure to order it separately.

Designation	Model No.	Description
Rear/side mounting bracket (Excluding SF4B-□G□<V2>) [Material: Cold rolled carbon steel (SPCC)]	M8 rear mounting bracket	MS-SFB-7-T For rear mounting. Allows the safety light curtain to be mounted at the rear with one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
	M8 side mounting bracket	MS-SFB-8-T For side mounting. Allows the safety light curtain to be mounted at the side with one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
360° mounting bracket (Excluding SF4B-□G□<V2>) (Material: Die-cast zinc alloy) * Safety light curtain can revolve 360° horizontally.	Standard mounting bracket	MS-SFB-1 Used to mount the safety light curtain on the rear surface and side surface. (4 pcs. per set for emitter and receiver)
	M8 mounting bracket	MS-SFB-1-T Allows the safety light curtain to be mounted at the rear and side with one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
	Pitch adapter bracket	MS-SFB-4 Used as the mounting bracket when changing over a previous safety light curtain with a protective height of 200 mm 7.874 in or more to the SF4B series. It is installed using two M5 hexagon-socket-head bolts. (4 pcs. per set for emitter and receiver)
* Safety light curtain can revolve 360° horizontally.	M8 pitch adapter bracket	MS-SFB-4-T Used as the mounting bracket when changing over a previous safety light curtain with a protective height of 200 mm 7.874 in or more to the SF4B series. It is installed using one M8 hexagon-socket-head bolt. (4 pcs. per set for emitter and receiver)
Dead zoneless mounting bracket (Excluding SF4B-□G□<V2>) (Material: Die-cast zinc alloy)	MS-SFB-3	Mounting with no dead zone is possible so that the mounting bracket does not project past the protective height. (4 pcs. per set for emitter and receiver)
Standard L mounting bracket (For SF4B-□G□<V2>) [Material: Cold rolled carbon steel (SPCC)] (Trivalent chrome plated)	MS-SF4BG-1	Mounting is possible behind or at the side of the safety light curtain. Mount with two M5 bolts or one M8 bolt. (4 pcs. per set for emitter and receiver)
Dead zoneless mounting bracket (For SF4B-□G□<V2>) [Material: Cold rolled carbon steel (SPCC)] (Trivalent chrome plated) Supporting bracket ...PPS	MS-SF4BG-3	Allows safety light curtains to be installed closely together or in locations with installation restrictions due to equipment columns or jigs. (4 pcs. per set for emitter and receiver)

OPTIONS

Control units

Designation	Appearance	Model No.	Application cable	Description
Connector connection type control unit		SF-C11	Bottom cap cable: SFB-CB□ Extension cable: SFB-CCJ10□	Use 8-core cable with connector to connect to the safety light curtain. Compatible with up to Control Category 4. Interference prevention wires and muting function cannot be used.
Robust type control unit		SF-C12	Bottom cap cable: SFB-CB05-MU Extension cable: SFB-CCJ10□-MU	Use 12-core cable with connector to connect to the safety light curtain. Compatible with up to Control Category 4. Muting function cannot be used. Interference prevention wires can be used.
Slim type control unit		SF-C13	Bottom cap cable: SFB-CCB□(-MU) Extension cable: SFB-CC□(-MU)	Use a discrete wire cable to connect to the safety light curtain. Compatible with up to Control Category 4. Interference prevention wires and muting function can be used.
Application expansion unit for SF4B / SF4B-G series		SF-C14EX	Bottom cap cable: SFB-CB□-EX	The muting control function and emergency stop input expand the applications of the safety light curtains. Use exclusive cable to connect to the safety light curtain. Compatible with up to Control Category 4. The handy-controller SFB-HC (optional) cannot be used with SF-C14EX-01 .
Handy-controller non-compatible type		SF-C14EX-01	Extension cable: SFB-CCJ10□	

Note: Refer to SF-C10 series pages (p.663~) for the control units.

SF-C12 spare relay set

A set of spare relays (2 safety relays and 1 removal tool) is available for the safety relay that is built into the SF-C12.
Model No.: **SF-C12-RY**

• Recommended safety relay

OPTIONS

Handy-controller

Designation	Appearance	Model No.
Handy-controller	 * Includes 2 adapter cables	SFB-HC (Note)
Cable set for cable type connection		SFC-WNC1 (Note)

Note: A handy-controller cannot be used with the **SF4B-□-01<V2>** (p.509~), the **SF4B-□-03<V2>** (p.509) and the **SF-C14EX-01** (p.514).

Pigtailed type

Cable type

Safety light curtain diagnosis software

Simply input the error number of the safety light curtain on the screen, and the section of maintenance needed will be located and coping process will be displayed.

* Can be downloaded free from our website.

Safety light curtain diagnosis software

Y-shaped connector

Type	Appearance	Model No.	Description
Wire-saving Y-shaped connector		SFB-WY1 (Note)	Wire-saving connector for standard components (8-core cable). Cables of emitter and receiver are consolidated into one cable for wire-saving. Wiring has +24 V, 0 V, OSSD 1, OSSD 2, output polarity setting wire (shield). Net weight: 35 g approx. [Power wire and synchronization wire are connected inside the connector.] [Interlock is disabled (automatic reset).]
Cable with connector on one side		WY1-CCN3 (Note)	Cable length: 3 m 9.843 ft Net weight: 200 g approx. (1 cable)
		WY1-CCN10 (Note)	Cable length: 10 m 32.808 ft Net weight: 620 g approx. (1 cable)

Note: Not available for **SF4B-□-01<V2>**.

By using the Y-shaped connector, the least required wires such as power or safety output are consolidated into one cable. Man-hours taken for wiring is eliminated to the minimum. Construction times as well as wiring mistakes are greatly reduced.

Refer to the instruction manual for more details such as installation of Y-shaped connector, terminal wiring, and wiring example.

OPTIONS

Front protection cover (excluding SF4B-□G□<V2>) / Protection bar set (excluding SF4B-□G□<V2>) / Corner mirror

-	88	44	FC-SFBH-88	MC-SFBH-88	MC-SFBH-88-T	RF-SFBH-88	1,756 × 72 mm	69.134 × 2.835 in
-	96	48	FC-SFBH-96	MC-SFBH-96	MC-SFBH-96-T	RF-SFBH-96	1,916 × 72 mm	75.433 × 2.835 in

Note: The model Nos. given above denote a single unit. 2 units are required for use in mounting to the emitter/receiver (excluding corner mirror).

Front protection cover

• **FC-SFBH-□**

Protects sensing surface of the safety light curtain from flying objects such as welding spatter. The operating range reduces when the front protection cover is used.

Note: Not available for SF4B-□G□<V2>.

Material: Polycarbonate

Protection bar set

• **MC-SFBH-□**

Note 1: Not available for SF4B-□G□<V2>. M5 hexagon-socket-head bolt with washers

Rear/side protection bar set

• **MC-SFBH-□-T**

Note 1: Not available for SF4B-□G□<V2>. <Rear mounting> <Side mounting>

Operating range

	SF4B-F□	SF4B-H□		SF4B-A□	
		12 to 64 beam axes type	72 to 96 beam axes type	6 to 32 beam axes type	36 to 48 beam axes type
Only emitter installed	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft
Only receiver installed	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft	0.3 to 7.5 m 0.984 to 24.606 ft	0.3 to 6 m 0.984 to 19.685 ft
Both emitter and receiver installed	0.3 to 5.5 m 0.984 to 18.045 ft	0.3 to 7 m 0.984 to 22.966 ft	0.3 to 5.5 m 0.984 to 18.045 ft	0.3 to 7 m 0.984 to 22.966 ft	0.3 to 5.5 m 0.984 to 18.045 ft

Note: The operating range is the possible setting distance between the emitter and the receiver.

Corner mirror

• **RF-SFBH-□**

Normally for L-shaped or U-shaped installation, 2 or 3 sets of safety light curtains are needed. With the use of a corner mirror reflecting the light, one set of safety light curtain is possible for L-shaped or U-shaped installation.

Corner mirror RF-SFBH-□

Operating range

With 1 corner mirror	Declined to 90 %
With 2 corner mirror	Declined to 80 %

• Parts List

Designation	MC-SFBH-□		MC-SFBH-□-T	
	Number	Remarks	Number	Remarks
Protection bar	1 pc.	Material: Aluminum	1 pc.	Material: Aluminum
Protection bar mounting bracket (For left side, for right side)	1 pc. each	Material: Die-cast zinc alloy	1 pc. each (Note 2)	Material: Cold rolled carbon steel (SPCC) (Trivalent chrome plated)
Hexagon-socket-head bolt with washers	2 pcs.	M5 (length: 20 mm 0.787 in)	2 pcs.	M5 (length: 20 mm 0.787 in)
Hexagon-socket-head bolt	2 pcs.	M5 (length: 16 mm 0.630 in)	2 pcs.	M5 (length: 18 mm 0.709 in)

Notes: 2) Available as a spare part. Model No.: **MS-MCSFB-1-T**
 3) The protection bar intermediate supporting bracket **MS-SFB-6** (optional) is installed to protection bars that are longer than the **MC-SFBH-48(-T)**. Use if there is much flexure bending in the protection bar. Please contact our office for details.
 • **Protection bar intermediate supporting bracket MS-SFB-6 (Optional)**
 Material: Cold rolled carbon steel (SPCC) (Trivalent chrome plated)

Definition of Sensing Heights

Introduction to Panasonic Industrial Devices SUNX sensors that can be used as muting sensors

Compact Photoelectric Sensor **CX-400 SERIES Ver.2**

- World standard size
- Wide variation

▶ P.245~

Ultra-slim Photoelectric Sensor **EX-10 SERIES Ver.2**

- 3.5 mm 0.138 in thickness
- Long sensing range: 1 m 3.281 ft (thru-beam type: **EX-19**)
- * The **EX-20** series that is compatible with M3 mounting screws is also available.

▶ P.279~

U-shaped Micro Photoelectric Sensor **PM-25/45/65 SERIES**

- Three protection circuits standard on all models
- Ample beam emitting / receiving distance of 6 mm 0.236 in
- Easy to mount with M3 screws

▶ P.395~

Rectangular-shaped Inductive Proximity Sensor **GX-F/H SERIES**

- Industry longest in stable sensing range
- 10 times the durability (Compared to previous models)
- IP68G rating

▶ P.785~

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F. The model No. with "G" is a robust type.
 PFHD: Probability of dangerous failure per hour, MTTFD: Mean time to dangerous failure (in years)
 2) In the case of "When used as safety device for presses in China", the distance between the center of the first beam axis and the center of the last beam axis of the device becomes the protective height. For details, refer to "Definition of sensing heights" (p.645).

Item Korean press compliant	SF4B-F□-03<V2>	SF4B-H□-03<V2>	—
Operating range (Note 3)	0.3 to 7 m 0.984 to 22.966 ft	12 to 64 beam channels type: 0.3 to 9 m 0.984 to 29.528 ft 72 to 96 beam channels type: 0.3 to 7 m 0.984 to 22.966 ft	6 to 32 beam channels type: 0.3 to 9 m 0.984 to 29.528 ft 36 to 48 beam channels type: 0.3 to 7 m 0.984 to 22.966 ft
Min. sensing object (Note 4)	ø14 mm ø0.551 in opaque object	ø25 mm ø0.984 in opaque object	ø45 mm ø1.772 in opaque object
Effective aperture angle	±2.5° or less [for an operating range exceeding 3 m 9.843 ft (conforming to IEC 61496-2 / ANSI/UL 61496-2)]		
Supply voltage	24 V DC ±10 % Ripple P-P 10 % or less		
Control outputs (OSSD 1, OSSD 2)	PNP open-collector transistor / NPN open-collector transistor (switching method) • When selecting PNP output: Max. source current 200 mA, When selecting NPN output: Max. sink current 200 mA • Applied voltage: same as supply voltage (When selecting PNP output: between the control output and +V,) (When selecting NPN output: between the control output and 0 V) • Residual voltage: 2.5 V or less (When selecting PNP output: source current 200 mA, when selecting NPN output: sink current 200 mA) (when using 20 m 65.617 ft length cable)		
Operation mode	ON when all beam channels are received, OFF when one or more beam channels are interrupted (OFF also in case of any malfunction in the safety light curtain or the synchronization signal)(Note 5.6)		
Protection circuit	Incorporated		
Response time	OFF response: 14 ms or less, ON response: 80 to 90 ms		
Auxiliary output (Non-safety output)	PNP open-collector transistor / NPN open-collector transistor (switching method) • When selecting PNP output: Max. source current 60 mA, When selecting NPN output: Max. sink current 60 mA • Applied voltage: same as supply voltage (When selecting PNP output: between the auxiliary output and +V,) (When selecting NPN output: between the auxiliary output and 0 V) • Residual voltage: 2.5 V or less (When selecting PNP output: source current 60 mA, when selecting NPN output: sink current 60 mA) (when using 20 m 65.617 ft length cable)		
Operation mode	OFF when control outputs are ON, ON when control outputs are OFF [Factory setting, operating mode can be changed using the SFB-HC (optional) handy-controller].		
Protection circuit	Incorporated		
Response time	OFF replay: 34 ms or less, ON replay 110 ms or less		
Interference prevention function	Incorporated (Note 7) (Available only when in series connection for SF4B-□-03<V2>)		
Emission halt function / Interlock function	Incorporated / Incorporated [Manual reset / Auto reset (Note 8)]		
External device monitoring function	Incorporated		
Override function / Muting function	Incorporated (Note 7) (excluding SF4B-□-03<V2>) / Incorporated (Note 7) (excluding SF4B-□-03<V2>)		
Optional functions (Note 9)	Fixed blanking, floating blanking, auxiliary output switching, interlock setting changing, external relay monitor setting changing, muting setting changing, protecting, light emitting amount control		
Environmental resistance	Degree of protection	IP67 / IP65 (IEC)	
	Ambient temperature	-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F	
	Ambient humidity	30 to 85 % RH, Storage: 30 to 95 % RH	
	Ambient illuminance	Incandescent light: 3,500 lx or less at the light-receiving face	
	Dielectric strength voltage	1,000 V AC for one min. between all supply terminals connected together and enclosure	
	Insulation resistance	20 MΩ, or more, with 500 V DC megger between all supply terminals connected together and enclosure	
	Vibration resistance	10 to 55 Hz frequency, 0.75 mm 0.030 in double amplitude in X, Y and Z directions for two hours each	
Shock resistance	300 m/s ² acceleration (30 G approx.) in X, Y and Z directions three times each		
Emitting element	Infrared LED (Peak emission wavelength: 870 nm 0.034 mil)		
Material	Enclosure: Aluminium, Upper and lower edges: Iron, Sensing surface: Polycarbonate and Polyester resin, Cap: PBT		
Connecting method / Cable length	Connector / Total length up to 50 m 164.042 ft is possible for both emitter and receiver, with optional mating cables (Note 10)		
Accessories	MS-SFB-2 (Intermediate supporting bracket): (Note 11) MS-SF4BG-2 (Intermediate supporting bracket): (Note 12) SF4B-TR14 (Test rod): 1 No.	MS-SFB-2 (Intermediate supporting bracket): (Note 11) MS-SF4BG-2 (Intermediate supporting bracket): (Note 12) SF4B-TR25 (Test rod): 1 No.	MS-SFB-2 (Intermediate supporting bracket): (Note 11) MS-SF4BG-2 (Intermediate supporting bracket): (Note 12)

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.
 Model Nos. having the suffix "G" are robust type.
 2) PLe SIL3 compliant from production in August 2009.
 3) The operating range is the possible setting distance between the emitter and the receiver.
 4) When the floating blanking function is used, the size of the min. sensing object is changed. For details, refer to "Safety distance" (p.532).
 5) The outputs are not "OFF" when muting function is active even if the beam channel is interrupted.
 6) In case the blanking function is valid, the operation mode is changed. For details, refer to "Safety distance" (p.532).
 7) In case of using this function, please use 12-core cable.
 8) The manual reset and auto reset are possible to be switched depending on the wiring status.
 9) In case of using optional function, the handy-controller (**SFB-HC**) (optional) is required. However, a handy-controller cannot be used with the **SF4B-□-01<V2>**, **SF4B-□-03<V2>** and the **SF-C14EX-01**.
 10) The cable can be extended within 30 m **98.425 ft** (for emitter/receiver) when two safety light curtains are connected in series, within 20 m **65.617 ft** when three safety light curtains are connected in series. Furthermore, when the muting lamp is used, the cable can be extended within 40 m **131.234 ft** (for emitter/receiver).
 11) The intermediate supporting bracket (**MS-SFB-2**) is enclosed with the following models. The number of sets required varies depending on the product.
 1 set: **SF4B-F□<V2>** 79 to 111 beam channels, **SF4B-H□<V2>** 40 to 56 beam channels, **SF4B-A□<V2>** 20 to 28 beam channels
 2 sets: **SF4B-F127<V2>**, **SF4B-H□<V2>**...64 to 80 beam channels, **SF4B-A□<V2>** ...32 to 40 beam channels
 3 sets: **SF4B-H□<V2>** 88 to 96 beam channels, **SF4B-A□<V2>** 44 to 48 beam channels
 12) The intermediate supporting bracket (**MS-SF4BG-2**) is enclosed with the following models.
 1 set: **SF4B-F□G<V2>** 79 to 127 beam channels, **SF4B-H□G□<V2>** 40 to 64 beam channels, **SF4B-A□G<V2>** 20 to 32 beam channels
 2 sets: **SF4B-H□G□<V2>** 72 to 96 beam channels, **SF4B-A□G□<V2>** 36 to 48 beam channels

Item	Model No.	SF-C11 (Note 2)	SF-C12	SF-C13 (Note 2)
Connectable safety light curtains		SF4B / SF4B-G / SF4D / SF2B series	SF4B / SF4B-G series	Safety light curtains manufactured by Panasonic Industrial Devices SUNX
Applicable standards		IEC 61496-1, EN 61496-1, ANSI/UL 61496-1, CAN/CSA 61496-1, JIS B 9704-1, etc.		
CE marking directive compliance		Machinery Directive, Low Voltage (SF-C11/C13 only) Directive, EMC Directive, RoHS Directive		
Control category		ISO 13849-1 (EN ISO 13849-1, JIS B 9705-1) compliance up to Category 4, PLe standards		
Supply voltage / Current consumption		24 V DC $\pm 10\%$ Ripple P-P 10% or less / 100 mA or less (without safety light curtain)		
Fuse (rating)		Built-in electronic fuse, Triggering current: 0.5 A or more, Reset after power down		
Safety output		NO contact $\times 3$ (13-14, 23-24, 33-34)	NO contact $\times 2$ (13-14, 23-24)	NO contact $\times 3$ (13-14, 23-24, 33-34)
Utilization category		AC-15, DC-13 (IEC 60947-5-1)		
Rated operation voltage (Ue) / Rated operation current (Ie)		30 V DC / 6 A, 230 V AC / 6 A, resistive load (For inductive load, during contact protection) Min. applicable load: 10 mA (at 24 V DC) (Note 3)	24 V DC / 1 A, resistive load (For inductive load, during contact protection) Min. applicable load: 15 mA (at 24 V DC)	30 V DC / 4 A, 230 V AC / 4 A, resistive load (For inductive load, during contact protection) Min. applicable load: 10 mA (at 24 V DC) (Note 3)
Contact resistance		100 m Ω or less (initial value)	50 m Ω or less (initial value)	100 m Ω or less (initial value)
Contact protection fuse rating		6 A (slow blow)	3 A (slow blow)	4 A (slow blow)
Pick-up delay (Auto reset/Manual reset)		80 ms or less / 90 ms or less	30 ms or less / 30 ms or less	80 ms or less / 90 ms or less
Response time		10 ms or less	14 ms or less	10 ms or less
Auxiliary output		Safety relay contact (NC contact) $\times 1$ (41-42) (Related to safety output)	Safety relay contact (NC contact) $\times 1$ (31-32) (Related to safety output)	Safety relay contact (NC contact) $\times 1$ (41-42) (Related to safety output)
Rated operation voltage/current		24 V DC / 2 A, Min. applicable load: 10 mA (at 24 V DC)	30 V DC / 3 A, Min. applicable load: 15 mA (at 24 V DC)	24 V DC / 2 A, Min. applicable load: 10 mA (at 24 V DC)
Contact protection fuse rating		2 A (slow blow)	3 A (slow blow)	2 A (slow blow)
Semiconductor auxiliary output (AUX)		<Minus ground (Setting for PNP)> PNP open-collector transistor	<Plus ground (Setting for NPN)> NPN open-collector transistor	PNP open-collector transistor
Output operation		Related to auxiliary output of safety light curtain	—	ON when the safety light curtain is interrupted
Excess voltage category		II	III	II
Polarity selection function (Note 4)		Incorporated (Sliding switch allows selection of plus/minus ground) Minus ground: Correspond to PNP output safety light curtain Plus ground: Correspond to NPN output safety light curtain		Incorporated (Cable connection allows selection of plus/minus ground) Minus ground: Correspond to PNP output safety light curtain Plus ground: Correspond to NPN output safety light curtain
Pollution degree		2		
Protection		Enclosure: IP40, Terminal: IP20	IP65	Enclosure: IP40, Terminal: IP20
Ambient temperature		-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F		
Enclosure material		ABS	Die-cast aluminum	ABS
Weight		Net weight: 320 g approx.	Net weight: 1 kg approx.	Net weight: 200 g approx.

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) **SF-C11** and **SF-C13** have acquired the Korea S-mark.
 3) If several **SF-C11** or **SF-C13** units are being used in a line together, leave a space of 5 mm 0.197 in or more between each unit. If the units are touching each other, reduce the rated operating current for safety output in accordance with the ambient operating temperature as shown in the graphs at right.
 4) Please switch the sliding switch to the PNP side for minus ground and to the NPN side for plus ground.
 5) Refer to p.667 for details of the specifications for the control unit **SF-C11/C12/C13**.

Dilating when SF-C11 units are mounted close together

Dilating when SF-C13 units are mounted close together

Item	Model No.	SF-C14EX-(01) (Note 2)
Connectable safety light curtains		SF4B / SF4B-G series
Applicable standards		IEC 61496-1, EN 61496-1, ANSI/UL 61496-1, CAN/CSA 61496-1, JIS B 9704-1, etc.
CE marking directive compliance		Machinery Directive, EMC Directive, RoHS Directive
Control category		ISO 13849-1 (EN ISO 13849-1, JIS B 9705-1) compliance up to Category 4, PLe standards
Supply voltage / Current consumption		24 V DC $\pm 10\%$ Ripple P-P 10% or less / 0.2 A or less (without safety light curtain and other external connecting device)
Safety output (Safety output 1, 2, 3)		PNP open-collector transistor 2 outputs $\times 3$ or NPN open-collector transistor 2 outputs $\times 3$ (selectable using a slider switch)
Operation mode (Output operation)		Safety output 1: ON when the safety light curtain is in light receiving condition, OFF when the safety light curtain is in light interrupted condition (Note 3) Safety output 2: ON when the safety light curtain is in light receiving condition or the muting function is valid OFF when the safety light curtain is in light interrupted condition and the muting function is invalid (Note 3) Safety output 3: ON when the emergency stop is invalid, OFF when the emergency stop is valid
Response time		OFF response: 14 ms or less (Safety output 1 and 2: including the response time of the safety light curtain) ON response: 90 ms or less (auto-reset) / 140 ms or less (manual reset) (Note 4)
Auxiliary outputs [Auxiliary output 1, 2, 3, 4 (Note 5)]		PNP open-collector transistor $\times 3$ or NPN open-collector transistor $\times 3$ (selectable using a slider switch)
Operation mode (Output operation)		Auxiliary output 1: ON when the muting function is invalid, OFF when the muting function is valid Auxiliary output 2: ON when the override function is invalid, OFF when the override function is valid Auxiliary output 3: ON when the muting lamp is normal, OFF when the muting lamp is error Auxiliary output 4: ON when the safety light curtain is in light interrupted condition, OFF when the safety light curtain is in light receiving condition (Note 5)
Muting lamp output		Applicable muting lamp: 24 V DC, 3.6 to 30 W (L1, L2 of each unit)
Protection		Enclosure: IP40, Terminal: IP20
Ambient temperature		-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F
Material		Enclosure: ABS
Connection terminal		Detachable spring-cage terminal
Weight		Net weight: 250 g approx.

- Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C +68 °F.
 2) **SF-C14EX-01** is Handy-controller **SFB-HC** (optional) non-compatible type.
 3) Both safety output 1 and 2 are OFF when the emergency stop is valid regardless of whether the safety light curtain is in the light receiving or light interrupted condition.
 4) The auto-reset cannot be used with safety output 3.
 5) The auxiliary output incorporated in the **SF4B / SF4B-G** series is outputted.
 6) Refer to p.668 for details of the specifications for the control unit **SF-C14EX-(01)**.

SPECIFICATIONS

Handy-controller

Item	Model No.	SFB-HC
Supply voltage		24 V DC ±10 % Ripple P-P10 % or less (common to safety light curtain power supply)
Current consumption		65 mA or less
Communication method		RS-485 two-way communications (Specific procedure)
Digital display		4-digit red LED display × 2 (Selected beam channels, setting contents etc. are displayed.)
Function indicator		Green LED × 9 (set function is displayed.)
Functions		Fixed blanking (Factory setting: Disabled) / Floating blanking (Factory setting: Disabled) / Auxiliary output change (Factory setting: Negative Logic of OSSD) / Light emitting amount control (Factory setting: Disabled) / Muting setting change [Factory setting: All beam channels enabled, A = B, Setting of the muting lamp diagnosis function enabled (Ver. 2 or later), Muting sensor output operation setting N.O. / N.C. (Ver. 2.1 or later)] / Interlock setting change (Factory setting: start / restart) / External device monitoring setting change (Factory setting: Enabled, 300 ms) / Override setting changing function 60 sec. (Ver. 2.1 or later) / Setting detail monitoring / Protecting (Factory setting: Disabled) (Factory password setting: 0000) / Initialization / Copy
Ambient temperature		-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F
Ambient humidity		30 to 85 % RH, Storage: 30 to 85 % RH
Voltage withstandability		1,000 V AC for one min. between all supply terminals connected together and enclosure
Insulation resistance		20 MΩ , or more, with 500 V DC megger between all supply terminals connected together and enclosure
Cable		8-core shielded cable, 0.5 m 1.640 ft long, with a connector at the end (2 cables)
Material		Enclosure: ABS
Weight		Net weight: 200 g approx.
Accessories		Adapter cable: 2 cables

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.

Laser alignment tool

Item	Model No.	SF-LAT-2N / SF-LAT-4BG (For SF4B-□G□<V2>)
Supply voltage		3 V (LR6 battery × 2 pcs.)
Battery		1.5 V (LR6 battery) × 2 pcs. (replaceable)
Battery lifetime		30 hours approx. of continuous operation (LR6 battery, at +25 °C +77 °F ambient temperature)
Light source		Red semiconductor laser: Class 2 (IEC / JIS / FDA) (Max. output: 1 mW, Peak emission wavelength: 650 nm 0.026 mil) (Note 2)
Spot diameter		10 mm 0.394 in approx. (at 5 m 16.404 ft distance)
Ambient temperature		0 to +40 °C +32 to +104 °F (No dew condensation), Storage: 0 to +55 °C +32 to +131 °F
Ambient humidity		35 to 85 % RH, Storage: 35 to 85 % RH
Material		Enclosure: ABS, Mounting part: Aluminum
Weight		Net weight: 200 g approx. (including batteries)
Accessories		LR6 battery: 2 pcs.

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.

2) As for FDA regulation, the product complies with 21 CFR 1040.10 and 1040.11 based on Laser Notice No. 50, dated June 24, 2007, issued by CDRH under the FDA.

Corner mirror

Item	Model No.	RF-SFBH-□
Attenuation rate of sensing range		With one corner mirror: Declined to 90 %, With two corner mirrors: Declined to 80 % (When used in combination with the SF4B series)
Environmental resistance	Ambient temperature	-10 to +55 °C +14 to +131 °F (No dew condensation or icing allowed), Storage: -25 to +70 °C -13 to +158 °F
	Ambient humidity	30 to 85 % RH, Storage: 30 to 95 % RH
	Vibration resistance	10 to 55 Hz frequency, 0.75 mm 0.030 in double amplitude in X, Y and Z directions for two hours each
	Shock resistance	300 m/s ² acceleration (30 G approx.) in X, Y and Z directions three times each
Material		Enclosure: Aluminum, Mounting bracket: Stainless steel, Mirror (rear surface mirror): Glass, Side cover: EPDM
Accessories		Intermediate supporting bracket: 1 set (RF-SFBH-40/48/56/64), 2 sets (RF-SFBH-72/80/88/96)

Note: Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +20 °C **+68 °F**.

I/O CIRCUIT AND WIRING DIAGRAMS

Refer to the instruction manual for details. The instruction manual can be download from our website.

SF-C11

SF4B / SF4B-G series wiring diagram (Control Category 4)

For PNP output (minus ground)

- Set the safety light curtain input polarity selection switch to the PNP side and ground the 0 V line.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
 2) Use a momentary-type switch as the reset (RESET) button.
 3) Emission halt occurs when the test (TEST) button is open, and emission occurs when the test (TEST) button is short-circuited. If not using the test (TEST) button, short-circuit T1 and T2.

For NPN output (plus ground)

- In the above diagram, set the safety light curtain input polarity selection switch to the NPN side and ground the + side.

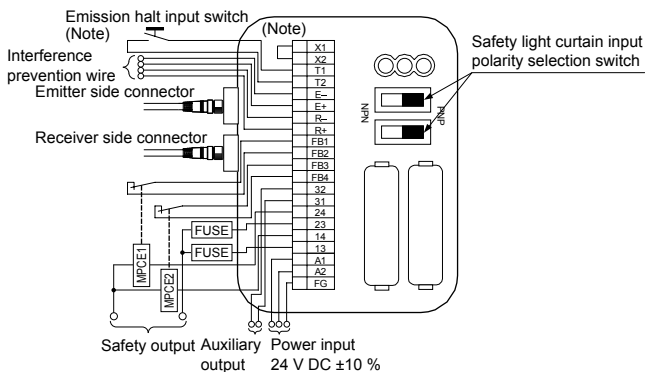

SF-C12

SF4B / SF4B-G series wiring diagram (Control Category 4)

For PNP output (minus ground)

- Set the two safety light curtain input polarity select switches to the PNP side and connect the FG terminal to the 0 V line.

- Note: The above diagram is when using manual reset. If automatic reset is used, connect a normally closed type pushbutton switch between T1 and T2 and leave between X1 and X2 open.

For NPN output (plus ground)

- In the above diagram, set the two safety light curtain input polarity selection switches to the NPN side and connect the F.G. terminal to the + side.

When SF-C11 is connected to the safety light curtain, be sure to use the following mating cable. **SFB-CB□, SFB-CCJ10□**

Terminal arrangement diagram

Terminal	Function
A1	+24 V DC
A2	0 V
13-14, 23-24, 33-34	Safety output (NO contact × 3)
41-42	Auxiliary output (NC contact × 1)
X1	Reset output terminal
X2	Reset input terminal (Manual)
X3	Reset input terminal (Automatic)
A	Not used
B	Not used
T1	Test output terminal
T2	Test input terminal
AUX	Semiconductor auxiliary output

Pin layout for safety light curtain connectors

Connector pin No.	Emitter side connector	Receiver side connector

I/O CIRCUIT AND WIRING DIAGRAMS

SF-C13

SF4B / SF4B-G series wiring diagram (Control Category 4)

For PNP output (minus ground)

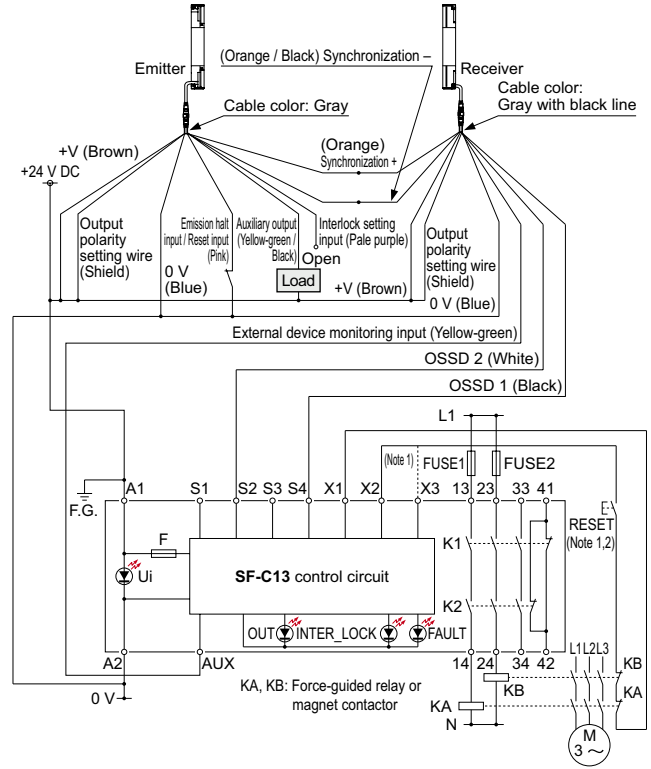

- Connect the safety light curtain control outputs OSSD 1 and OSSD 2 to S1 and S2 respectively.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
2) Use a momentary-type switch as the reset (RESET) button.

For NPN output (plus ground)

- Connect the safety light curtain control outputs OSSD 1 and OSSD 2 to S4 and S2 respectively and ground the + side.

- Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X2 and connect it to X3. In this case, a reset (RESET) button is not needed.
2) Use a momentary-type switch as the reset (RESET) button.

Terminal arrangement diagram

Terminal	Function
A1	+24 V DC
A2	0 V
S1 to S4	Safety light curtain control output (OSSD) input terminal
AUX	Semiconductor auxiliary output
X1	Reset output terminal
X2	Reset input terminal (Manual)
X3	Reset input terminal (Automatic)
13-14, 23-24, 33-34	Safety output (NO contact × 3)
41-42	Auxiliary output (NC contact × 1)

A terminal block is required for wiring of safety light curtain side.

When SF-C13 is connected to the safety light curtain, be sure to use the following discrete wire mating cable.

I/O CIRCUIT AND WIRING DIAGRAMS

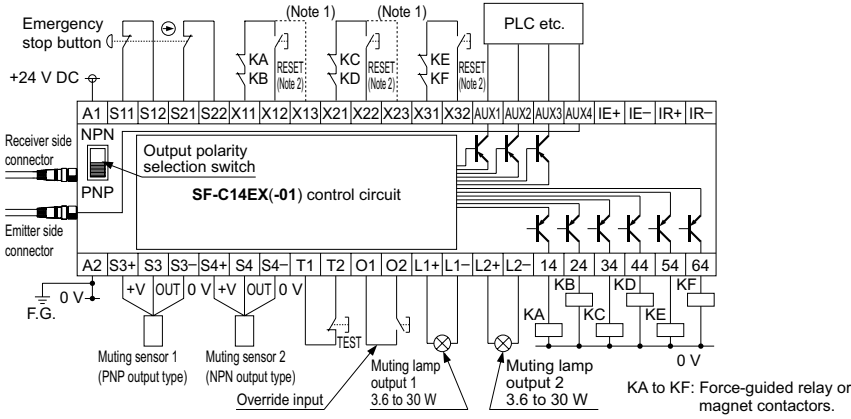

Refer to the instruction manual for details. The instruction manual can be download from our website.

SF-C14EX(-01)

SF4B / SF4B-G series wiring diagram (Control Category 4)

For PNP output (minus ground)

• Set the output polarity selection switch to the PNP side and ground the 0 V line.

• When **SF-C14EX** is connected to the safety light curtain, be sure to use the following mating cable. **SFB-CB□-EX, SFB-CCJ10□**

• If the NO (Normally Open) contact switch is used as a muting sensor, wire it as shown in the figure below.

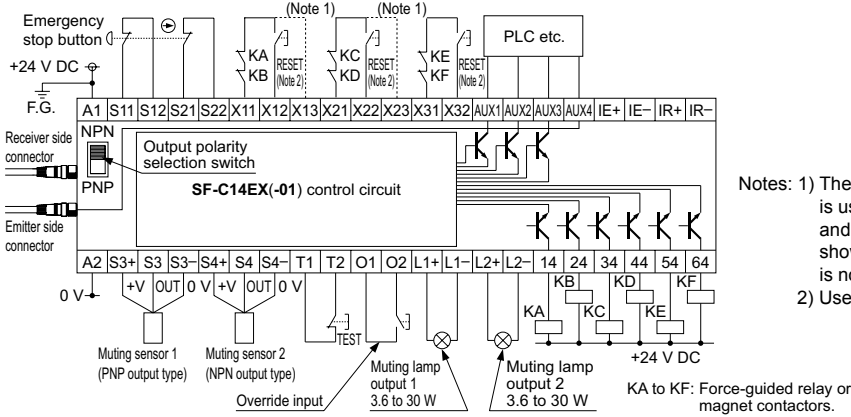

• If the emergency stop button is not used, short-circuit between the terminals S11 to S12 and S21 to S22 directly.

Notes: 1) The above diagram is when using manual reset. If automatic reset is used, disconnect the lead from X12 and connect it to X13, and disconnect the lead from X22 and connect it to X23, as shown by the dotted lines. In this case, a reset (RESET) button is not needed. Terminals X31 to X32 are for manual reset only.
2) Use a momentary-type switch for the reset (RESET) button.

For NPN output (plus ground)

• Set the output polarity selection switch to the NPN side and ground the side of the power supply input.

Notes: 1) The left diagram is when using manual reset. If automatic reset is used, disconnect the lead from X12 and connect it to X13, and disconnect the lead from X22 and connect it to X23, as shown by the dotted lines. In this case, a reset (RESET) button is not needed. Terminals X31 to X32 are for manual reset only.
2) Use a momentary-type switch for the reset (RESET) button.

Terminal arrangement diagram

Terminal	Function	Terminal	Function
14	Safety output 1, Beam received / Beam interrupted output of the safety light curtain	S11	Emergency stop contact input

Definition of Sensing Heights

Refer to the instruction manual for details.

The instruction manual can be download from our website.

PRECAUTIONS FOR PROPER USE

Interlock function

- The selection of manual reset / automatic reset is available by applying the interlock input wiring. The interlock becomes available by selecting manual reset. (Refer to the **SF4B / SF4B-G** instruction manual for details.)

Emission halt function

- This function stops the emission process of the emitter. You can select whether emission is on or halted by means of the connection status for the emission halt input / reset input wire (pink).
- During emission halt, the control outputs (OSSD 1, OSSD 2) become OFF status.
- By using this function, malfunction due to extraneous noise or abnormality in the control outputs (OSSD 1, OSSD 2) and the auxiliary output can be determined even from the machinery side.
- Normal operation is restored when the emission halt input / reset input wire (pink) is connected to 0 V or +V. (Refer to the **SF4B / SF4B-G** instruction manual for details.)

Auxiliary output (Non-safety output)

- This safety light curtain incorporates the auxiliary output (yellowgreen / black) for the non-safety output. The auxiliary output is incorporated with the emitter. (Refer to the **SF4B / SF4B-G** instruction manual for details.)

External device monitoring function

- This is the function for checking whether the external safety relay connected to the control outputs (OSSD 1, OSSD 2) perform normally in accordance with the control outputs (OSSD 1, OSSD 2) or not. Monitor the contacting point "b" of the external safety relay, and if any abnormality such as deposit of the contacting point, etc. is detected, change the status of the safety light curtain into lockout one, and turn OFF the control outputs (OSSD 1, OSSD 2). (Refer to the **SF4B / SF4B-G** instruction manual for details.)

Muting function

- This function turns the safety function of this safety light curtain into disabled temporarily. When the control outputs (OSSD 1, OSSD 2) are ON, this function is available for passing the workpiece through the sensing area of the safety light curtain without stopping the machinery. The muting function becomes valid when all the conditions listed below are satisfied. However, this function cannot be used with the **SF4B-□-03<V2>**.
 - ① The control outputs (OSSD 1, OSSD 2) shall be ON.
 - ② The incandescent lamp with 3 to 10 W shall be connected to the muting lamp output (red).
 - ③ The output of the muting sensors A and B shall be changed from OFF (open) to ON. At this time, the time difference occurred by changing the output of the muting sensors A and B into ON status shall be within 0.03 to 3 sec.
- The following devices, photoelectric sensor with semiconductor output, inductive proximity sensor, position switch on N.O. (Normally open) contact, etc. are available for applying to the muting sensor.
- In case of using the muting function, please order 12-core cable. (Refer to the **SF4B / SF4B-G** instruction manual for details.)

Override function

- This function sets the safety function of this safety light curtain enabled forcibly. When using the muting function, the override function can be used to start the machinery at times such as when the control outputs (OSSD 1 and OSSD 2) are OFF or when the muting sensors are ON when the line is to be started. The override function becomes valid when all the conditions listed below are satisfied. However, this function cannot be used with the **SF4B-□-03<V2>**. (Refer to the **SF4B / SF4B-G** instruction manual for details.)

Series connection

Connectable up to 3 sets of safety light curtains (however, 192 beam channels max.)

(Refer to the **SF4B / SF4B-G** instruction manual for details.)

Parallel connection

Connectable up to 3 sets of safety light curtains

(Refer to the **SF4B / SF4B-G** instruction manual for details.)

Series and parallel mixed connection

Connectable up to 3 sets of safety light curtains (however, 192 beam channels max.)

(Refer to the **SF4B / SF4B-G** instruction manual for details.)

Wiring

Refer to the applicable regulations for the region where this device is to be used when setting up the device. In addition, make sure that all necessary measures are taken to prevent possible dangerous operating errors resulting from earth faults.

- Make sure to carry out the wiring in the power supply off condition.
- Verify that the supply voltage variation is within the rating.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of this sensor, connect the frame ground (F.G.) terminal of the equipment to an actual ground.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.

Others

- This device has been developed / produced for industrial use only.
- Do not use during the initial transient time (2 sec.) after the power supply is switched on.
- Avoid dust, dirt and steam.
- Take care that the safety light curtain does not come in direct contact with water, oil, grease, or organic solvents, such as, thinner, etc.
- Take care that the safety light curtain is not directly exposed to fluorescent light from a rapid-starter lamp or a high frequency lighting device, as it may affect the sensing performance.

Definition of Sensing Heights

PRECAUTIONS FOR PROPER USE

Refer to the instruction manual for details.
The instruction manual can be download from our website.

- When this device is used in the “PSDI mode”, an appropriate control circuit must be configured between this device and the machinery. For details, be sure to refer to the standards or regulations applicable in each region or country.
- To use this device in the U.S.A., refer to OSHA 1910. 212 and OSHA 1910. 217 for installation, and in Europe, refer to EN ISO 13855 as well. Observe your national and local requirements before installing this product.

- This catalog is a guide to select a suitable product. Be sure to read instruction manual prior to its use.
- Both emitter and receiver are adjusted before shipment, please apply both emitter and receiver with the same serial No. The serial No. is indicated on the plates of both emitter and receiver. (Indicated under model No.)

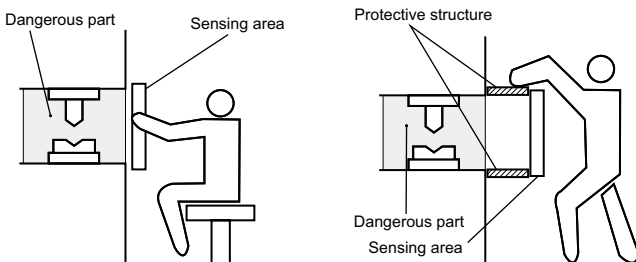

- Make sure to carry out the test run before regular operation.
- This safety system is for use only on machinery in which the dangerous parts can be stopped immediately, either by an emergency stop unit or by disconnecting the power supply. Do not use this system with machinery which cannot be stopped at any point in its operation cycle.

Sensing area

- Make sure to install this device such that any part of the human body must pass through its sensing area in order to reach the dangerous parts of the machinery. If the human body is not detected, there is a danger of serious injury or death.
- Do not use any reflective type or retroreflective type arrangement.
- Multiple receivers (emitters) cannot be connected for use with a single emitter (receiver).

Example of correct sensing area setup

Example of incorrect sensing area setup

Safety distance

- Calculate the safety distance correctly, and always maintain a distance which is equal to or greater than the safety distance, between the sensing area of this safety light curtain and the dangerous parts of the machinery. (Please check the latest standards for the equation.) If the safety distance is miscalculated or if sufficient distance is not maintained, there is a danger of serious injury or death.
- Before designing the system, refer to the relevant standards of the region where this device is to be used and then install this device.

The sizes of the minimum sensing objects for this device vary depending on whether or not the floating blanking function is being used. Calculate the safety distance with the proper size of the minimum sensing object and appropriate equation.

Size of minimum sensing object when applying floating blanking function

	Min. sensing object when applying floating blanking function			
	Invalid	Setting (Note)		
		1 beam channel	2 beam channels	3 beam channels
SF4B-Fr(G) (Min. sensing object ø14 mm ø0.551 in)	ø14 mm ø0.551 in	ø24 mm ø0.945 in	ø34 mm ø1.339 in	ø44 mm ø1.732 in
SF4B-Hr(G) (Min. sensing object ø25 mm ø0.984 in)	ø25 mm ø0.984 in	ø45 mm ø1.772 in	ø65 mm ø2.559 in	ø85 mm ø3.346 in
SF4B-Ar(G) (Min. sensing object ø45 mm ø1.772 in)	ø45 mm ø1.772 in	ø85 mm ø3.346 in	ø125 mm ø4.921 in	ø165 mm ø6.496 in

Note: Refer to p.507 for the floating blanking function. However, the floating blanking function cannot be used with the SF4B-□-01<V2>, the SF4B-□-03<V2> and the SF-C14EX-01.

- The safety distance is calculated using the equations given on the following pages when a person moves perpendicularly (normal intrusion) into the sensing area of the device. If the intrusion direction is not perpendicular, always check the related standards (regional, machine standards, etc.)

For use based on EN ISO 13855 / ISO 13855 / JIS B 9715

For intrusion direction perpendicular to the sensing area
<In case that the minimum sensing object is ø40 mm ø1.575 in or less>

- Equation ① $S = K \times T + C$
 S: Safety distance (mm)
 Minimum required distance between the sensing area surface and the dangerous parts of the machine
 K: Intrusion velocity of operator's body or object (mm/sec.)
 Normally taken as 2,000 (mm/sec.) for calculation
 T: Response time of total equipment (sec.)
 $T = T_m + T_{SF4B}$
 T_m: Maximum halting time of machinery (sec.)
 T_{SF4B}: Response time of the SF4B / SF4B-G series (sec.)
 C: Additional distance calculated from the size of the minimum sensing object of the safety light curtain (mm)
 However, the value of “C” cannot be less than 0.
 $C = 8 \times (d - 14)$
 d: Minimum sensing object diameter (mm)

Definition of Sensing Heights

PRECAUTIONS FOR PROPER USE

Refer to the instruction manual for details.
The instruction manual can be download from our website.

- For calculating the safety distance "S", there are the following five cases.
First calculate by substituting the value $K = 2,000$ (mm/sec.) in the equation above. Then, classify the obtained value of "S" into three cases, 1) $S < 100$, 2) $100 \leq S \leq 500$, and 3) $S > 500$. For Case 3) $S > 500$, recalculate by substituting the value $K = 1,600$ (mm/sec.). After that, classify the calculation result into two cases, 4) $S \leq 500$ and 5) $S > 500$. For details, refer to the instruction manual enclosed with this product. For calculating "T_m" (maximum halt time of the machinery), use a special device called a "brake monitor".
When this device is used in the "PSDI mode", an appropriate safety distance "S" must be calculated. For details, be sure to refer to the standards or regulations applicable in each region or country.

<In the case that the minimum sensing object is $\varnothing 40$ mm $\varnothing 1.575$ in or more>

- Equation $S = K \times T + C$
S: Safety distance (mm)
K: Intrusion velocity of operator's body or object (mm/sec.)
Taken as 1,600 (mm/sec.) for calculation
T: Response time of total equipment (sec.)
 $T = T_m + T_{SF4B}$
T_m: Maximum halting time of machinery (sec.)
T_{SF4B}: Response time of the **SF4B / SF4B-G** series (sec.)
C: Additional distance calculated from the size of the minimum sensing object of the safety light curtain (mm)
 $C = 850$ (mm) (Constant)

For use based on ANSI B11.19

- Equation ② $S = K \times (T_s + T_c + T_{SF4B} + T_{bm}) + D_{pf}$
S: Safety distance (mm)
Minimum required distance between the sensing area surface and the dangerous parts of the machine
K: Intrusion velocity {Recommended value in OSHA is 63 (inch/sec.) \approx 1,600 (mm/sec.)}
ANSI B11.19 does not define the intrusion velocity "K". When determining "K", consider possible factors including physical ability of operators.
T_s: Halting time calculated from the operation time of the control element (air valve, etc.) (sec.)
T_c: Maximum response time of the control circuit required for functioning the brake (sec.)
T_{SF4B}: Response time of safety light curtain (sec.)
T_{bm}: Additional halting time tolerance for the brake monitor (sec.)
The following equation holds when the machine is equipped with a brake monitor.
 $T_{bm} = T_a - (T_s + T_c)$
T_a: Setting time of brake monitor (sec.)
When the machine is not equipped with a brake monitor, it is recommended that 20 % or more of (T_s + T_c) is taken as additional halting time.
D_{pf}: Additional distance calculated from the size of the minimum sensing of the safety light curtain (mm)
SF4B-F□(G)<V2>: D_{pf} = 23.8 mm **0.937 in**
SF4B-H□(G)<V2>: D_{pf} = 61.2 mm **2.409 in**
SF4B-A□(G)<V2>: D_{pf} = 129.2 mm **5.087 in**
 $D_{pf} = 3.4 \times (d - 0.276)$ (inch)
 $\approx 3.4 \times (d - 7)$ (mm)
d: Minimum sensing object diameter 0.552 (inch) \approx 14 (mm) **SF4B-F□(G)<V2>**
Minimum sensing object diameter 0.985 (inch) \approx 25 (mm) **SF4B-H□(G)<V2>**
Minimum sensing object diameter 1.772 (inch) \approx 45 (mm) **SF4B-A□(G)<V2>**

Handy-controller

This device enables to set each function using the handy-controller **SFB-HC** (optional). (However, a handy-controller cannot be used with the **SF4B-□-01<V2>**, the **SF4B-□-03<V2>** and the **SF-C14EX-01**.) Among the functions, the contents related to the safety distance such as the size of the minimum sensing object and response time are varied depending on the setting condition. When setting each function, re-calculate the safety distance, and make enough space larger than the calculated safety distance. Failure to do so might cause the accident that the device cannot stop quickly before reaching the dangerous area of the machinery, resulting in the serious injury or death.

- Refer to the instruction manual of the handy-controller for details of the function settings for using handy-controller **SFB-HC** (optional).

Corner mirror

- Be sure to carry out maintenance while referring to the instruction manual for the **SF4B / SF4B-G** series of safety light curtains.
- Do not use if dirt, water, or oil, etc. is attached to the reflective surface of this product. Appropriate sensing range may not be maintained due to diffusion or refraction.
- Make sure that you have read the instruction manual for the corner mirror thoroughly before setting up the corner mirror and safety light curtains, and follow the instructions given. If the equipment is not set up correctly as stipulated in the instruction manual, incident light errors may result in unexpected situations which may result in serious injury or death.
- Please download the instruction manuals from our website.
- Safety light curtain **SF4B / SF4B-G** series cannot be used as a retroreflective type. Avoid installing the safety light curtain as a retroreflective type when this product is applied.
- The mirror part of this product is made of glass. Note that if it is broken, the glass shards may fly apart.
- Do not use if crack or breakage appears on the reflective surface of this product. Proper sensing range may not be maintained due to diffusion or refraction. If crack or breakage appears on the reflective surface of this product, replace the product.
- When adjusting beam channels with a laser alignment tool, etc., take sufficient care that the laser beam reflected by this product does not enter the eyes.
- Failure to follow the above items may result in death or serious injury.

Protection bar set for rear/side mounting MC-SFBH-□-T assembly dimensions

Rear mounting

<MC-SFBH-□-T(L)>

<MC-SFBH-□-T(R)>

Side mounting

<MC-SFBH-□-T(L)>

<MC-SFBH-□-T(R)>

Material: Mounting bracket ...Cold rolled carbon steel (SPCC)
(Trivalent chrome plated)
Protection bar.....Aluminum

Two brackets (one pc. each of R type and L type),
one protection bar
Two pcs. each of M5 (length 18 mm 0.709 in)
hexagon-socket-head bolts, M5 (length 20 mm 0.787 in)
hexagon-socket-head bolt are attached.

MS-SFB-1

Standard mounting bracket (Optional)

Not available for the robust type **SF4B-□G□<V2>**

MS-SFB-1-T

M8 mounting bracket (Optional)

Not available for the robust type **SF4B-□G□<V2>**

MS-SF4BG-1

Standard L mounting bracket (Optional)

It is only available for the robust type **SF4B-□G□<V2>**.

DIMENSIONS (Unit: mm in)

The CAD data can be downloaded from our website.

MS-SFB-2 Not available for the robust type **SF4B-□G□<V2>** Intermediate supporting bracket (Accessory for safety light curtain)

Material: Die-cast zinc alloy

Note: The intermediate supporting bracket (**MS-SFB-2**) is enclosed with the following products. The quantity differs depending on the product as shown below:

- 1 set: **SF4B-F□<V2>** ... 79 to 111 beam channels
- SF4B-H□<V2>** ... 40 to 56 beam channels
- SF4B-A□<V2>** ... 20 to 28 beam channels
- 2 sets: **SF4B-F127□<V2>**
- SF4B-H□<V2>** ... 64 to 80 beam channels
- SF4B-A□<V2>** ... 32 to 40 beam channels
- 3 sets: **SF4B-H□<V2>** ... 88 to 96 beam channels
- SF4B-A□<V2>** ... 44 to 48 beam channels

MS-SF4BG-2 It is only available for the robust type **SF4B-□G□<V2>** Intermediate supporting bracket (Accessory for safety light curtain)

Rear mounting

Side mounting

Material: Cold rolled carbon steel (SPCC)
Supporting bracket ... PPS

Note: The intermediate supporting bracket **MS-SF4BG-2** is enclosed with the following products. The quantity differs depending on the product as shown below:

- 1 set: **SF4B-F□G□<V2>** ... 79 to 127 beam channels
- SF4B-H□G□<V2>** ... 40 to 64 beam channels
- SF4B-A□G□<V2>** ... 20 to 32 beam channels
- 2 sets: **SF4B-H□G□<V2>** ... 72 to 96 beam channels
- SF4B-A□G□<V2>** ... 36 to 48 beam channels

Definition of Sensing Heights

DIMENSIONS (Unit: mm in)

The CAD data can be downloaded from our website.

MS-SFB-3

Not available for the robust type SF4B-□G□<V2>

Dead zoneless mounting bracket (Optional)

Main body

Spacer

Material: Die-cast zinc alloy

Four bracket set
Four M5 (length 25 mm 0.984 in)
hexagon-socket-head bolts and four spacers are attached.

L-shaped mounting

Mounting adjustment range

The adjustment range of the safety light curtain angle is up to ±15 degrees.

Note: The finger protection type has a beam pitch of 10 mm 0.394 in, which produces a dead zone. Additional measures will be required, such as using a protection cover.

MS-SF4BG-3

Dead zoneless mounting bracket (Optional)

MS-SFB-4

Pitch adapter bracket (Optional)

Main body

It is only available for the robust type SF4B-□G□<V2>.

Not available for the robust type SF4B-□G□<V2>

Material: Dead zoneless mounting bracket ... Cold rolled carbon steel (SPCC)
(Trivalent chrome plated)
Dead zoneless supporting bracket ... PPS

Material: Die-cast zinc alloy

Four bracket set
Four M5 (length 18 mm 0.709 in)
hexagon-socket-head bolts are attached.

Mounting adjustment range

The adjustment range of the safety light curtain angle is up to ±10 degrees.

DIMENSIONS (Unit: mm in)

The CAD data can be downloaded from our website.

MS-SFB-4-T

Not available for the robust type SF4B-□G□<V2> M8 pitch adapter bracket (Optional)

Material: Die-cast zinc alloy
 Four bracket set
 [Four M5 (length 18 mm 0.709 in) hexagon-socket-head bolts are attached.]

MS-SFB-7-T MS-SFB-1-T2 (Rear mounting)

M8 rear mounting bracket (Optional) M8 rear/side mounting brackets set (Optional)

Not available for the robust type SF4B-□G□<V2>

Material: Cold rolled carbon steel (SPCC) (Trivalent chrome plated)
 Four bracket set
 [Four M5 (length 18 mm 0.709 in) hexagon-socket-head bolts are attached.]

Mounting adjustment range

MS-SFB-8-T MS-SFB-1-T2 (Side mounting)

M8 side mounting bracket (Optional) M8 rear/side mounting brackets set (Optional)

Not available for the robust type SF4B-□G□<V2>

<MS-SFB-8-T(R)>

<MS-SFB-8-T(L)>

Mounting adjustment range

Material: Cold rolled carbon steel (SPCC) (Trivalent chrome plated)
 Four bracket
 (two pcs. each of R type and L type) set
 [Four M5 (length 18 mm 0.709 in) hexagon-socket-head bolts are attached.]
