EATON

Powering Business Worldwide

Energizing a world that demands more.

We deliver:

- **Electrical solutions** that use less energy, improve power reliability and make the places we live and work safer and more comfortable
- **Hydraulic and electrical solutions** that enable machines to deliver more productivity without wasting power
- **Aerospace solutions** that make aircraft lighter, safer and less costly to operate, and help airports operate more efficiently
- **Vehicle drivetrain and powertrain solutions** that deliver more power to cars, trucks and buses, while reducing fuel consumption and emissions

Discover today's Eaton.

Powering business worldwide

As a global power management company, we help customers worldwide manage the power needed for buildings, aircraft, trucks, cars, machinery and businesses.

Eaton's innovative technologies help customers manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably.

We provide integrated solutions that help make energy, in all its forms, more practical and accessible.

With 2015 sales of \$20.9 billion, Eaton has approximately 100,000 employees around the world and sells products in more than 175 countries.

Planning safety and process optimization: CAD data at the click of a mouse!

- 12,900 article data items and macros
- Convenient selection tool
- Version P8

Eaton is providing its customers with CAD data to offer optimum support during planning. Both electrical and mechanical design data can be called up quickly and conveniently from the Internet at any time. This reduces processing times, minimizes errors and thus reduces costs already in the engineering phase of control panels, systems and machinery.

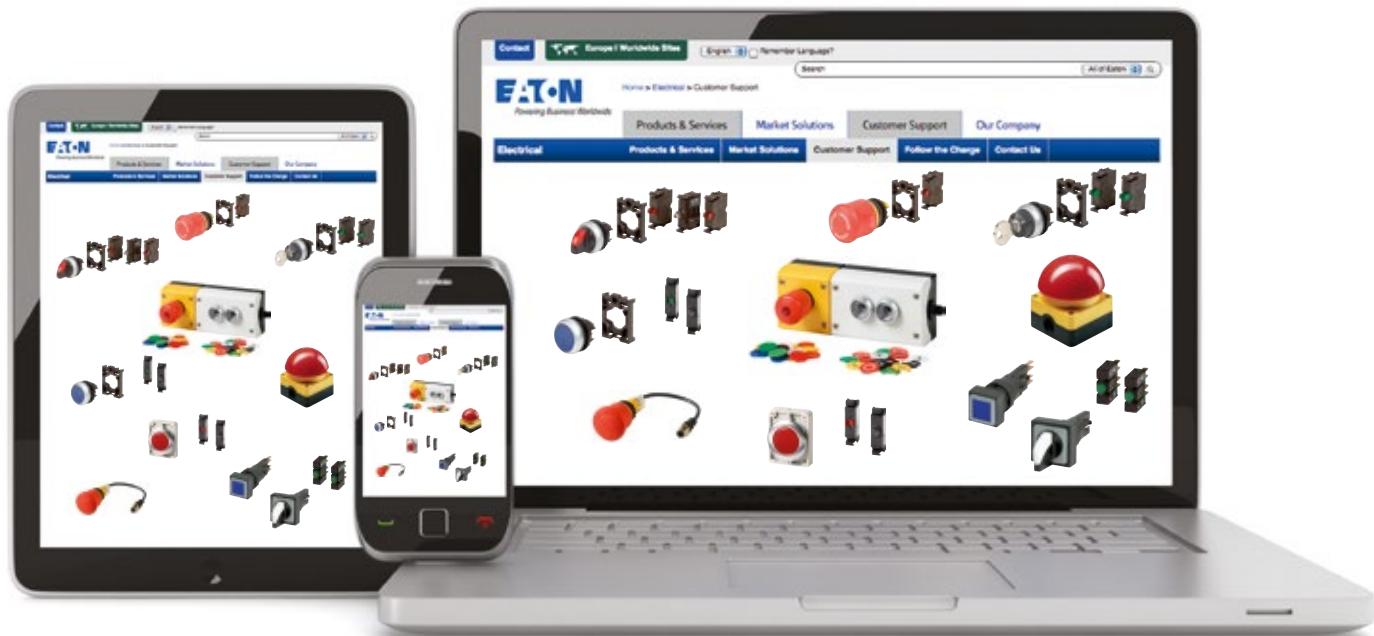

- Models for approx. 15,000 products
- 80 different neutral & native formats

eCAD: Eaton has product data and macros available for EPLAN Electric P8. After downloading the small EPLANSelection program, you will not only be able to select the items you need from a database containing more than 12,900 products, but will also be able to export them and import them into your own EPLAN item database.

mCAD: Eaton makes 2D and 3D data available for more than 15,000 products. Over 80 different neutral and native formats guarantee compatibility with the project engineering systems of the customer. The models can either be integrated directly into the planning software from the Partcommunity Portal on the Internet or via the CADENAS Partsolution software.

The Pushbutton-Configurator – Select Your Products Quickly and Easily!

The Pushbutton-Configurator is available online and is designed to help you select and combine a variety of pilot devices, such as those found in the RMQ-Titan series. The configurator is user-friendly and neatly laid out, provides a quick overview of the various ranges of products, and uses intuitive user guidance to show solutions that match your needs. In addition, once all individual components have been selected, the configurator will show the assembled final product. Moreover, the setup pane shows selected products directly, making it much easier for you to configure the right components for your application.

The integrated Label Editor function can be used to create custom labels for pilot devices, enabling you to customize your applications as necessary. Moreover, the configurator also makes it possible to easily configure complete devices that are put together in a custom-tailored manner. Once you configure your pilot devices, you will be shown a convenient parts list that you can then use to easily order all the components you need. Combined with the various images and integrated links to data sheets, these parts lists ensure that you can easily put together the required documentation for your projects.

RMQ-Titan Pilot Devices Proven and Versatile

Catalog download:
www.eaton.eu/catalog

The pilot devices in the RMQ-Titan M22 and M30 series are characterized by enormous versatility, making them the perfect solution for a wide variety of applications and processes. In fact, the range of potential applications for which they can be used is further broadened by their high degree of protection. In addition, their ergonomic operators combine stylish design with optimum functionality, and using their new slim contact elements makes it possible to combine RMQ-Titan devices with minimal mounting depths. Finally, their shape and design makes RMQ-Titan pilot devices comfortable and intuitive to use.

The tried and tested M22 product series is now complemented by M30 elements with a slim design. Contact and LED elements are available in two mounting depths for the flush mounting plates for both series. Moreover, the fact that the pilot devices can be connected to the SmartWire-DT communication system makes them ingeniously simple to wire.

Emergency stop buttons in a wide variety of designs are an important element in ensuring that dangers can be safely averted, and accordingly play a key role in protecting personnel and property. Accordingly, the emergency-stop buttons in the RMQ-Titan series are tamper-proof.

Numerous type approvals and classification society approvals ensure that RMQ-Titan devices can be used worldwide.

www.eaton.eu/rmq

In short, this comprehensive range of pilot devices is engineered to ensure that your machines, systems, and processes keep running smoothly.

Safe shutdown with RMQ-Titan

The EMERGENCY-STOP or EMERGENCY-OFF buttons are available with and without a key, turn-release, non-illuminated, illuminated with standard LED or with mechanical switch position display (green/red) in the centre of the actuation element. Self-monitoring contact blocks guarantee comprehensive operational safety: even with incorrect installation or after unduly powerful actuation.

Easy and flexible assembly

RMQ flat front devices are not only characterized by an attractive and sleek design, but also feature the sophisticated mounting system known as RMQ-AFX. When the knurled nut is tightened, a spring element simultaneously ensures that the assembly will automatically adjust to the thickness of the mounting plate being used. RMQ flat front devices are designed for 30.5 mm mounting holes.

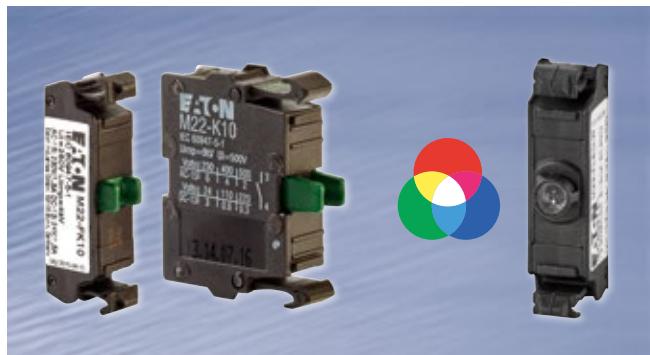

Fast, flexible labelling – The Labeleditor

The Label Editor is available as one of the functions in the Pushbutton-Configurator. Once you put together your pilot device combinations, you can use this function to make a customized laser inscription on your button plates using your own company or project-specific label, logo, or image – easily, conveniently, and custom-tailored to your needs! www.eaton.eu/config/rmq

Flush RMQ-Titan buttons

RMQ-Titan units with a flush design are the perfect complement to the industry's move towards stylish front panels for machines. These flush pushbuttons feature a modular design and are the perfect match for the RMQ-Titan series, flush contacts, and LED elements. Moreover, the flush transition between their operator and bezel make these units ideal when it comes to sleek looks and cutting-edge applications.

Flush and modular: flat rear elements

These flush contact and LED elements, which have a mounting depth of only 30 mm, are perfect for control panels in which every bit of space counts. They feature a one-of-a-kind modular design when it comes to operators, contacts, LED colors, and accessories, with the flush multi-color LED elements opening a whole new world of possibilities when it comes to intelligent control designs for machines.

High-precision settings made easy

The M22-SWD encoder makes it possible to set extremely precise settings on machines by simply turning it and confirming. Moreover, its modular design, combined with a direct SmartWire-DT connection, allows for maximum installation flexibility and ease of diagnostics. The M22-SWD encoder also completely eliminates any potential extra costs that would normally be associated with the use of an encoder.

System overview

M22 4-way selector switches	1	Centering adapter	8	Button plates/button lenses	18
4 positions		For centering pilot device elements when using a telescopic clip		Laser inscription for pushbuttons and mushroom pushbuttons	
With rotary head or thumb-grip		→ Page 69		Button lenses for illuminated pushbutton actuators and indicator lights, flush	
0-1-0-2-0-3-0-4 maintained action				With standard texts and symbols or with customized inscriptions	
→ Page 28				→ Page 60	
Labels with label mounts	2	IVS top-hat rail adapter	9	Pushbuttons	19
Color: aluminum		For direct mounting on IEC/EN 60175 DIN-rail		Momentary and maintained	
Labels: with inscription, with custom inscription, blank		→ Page 70		Flush and extended	
→ Page 32				With and without guard ring	
Mounting adapters	3			Mushroom pushbuttons, double actuator pushbuttons	
For flush mounting		Insert labels: aluminum color, with inscription or blank, can be engraved		Colors: white, green, red, yellow, blue, black	
For contact and LED elements when using M22-A...		→ Page 57		Illuminated pushbutton actuators	
For contact elements when using M22-A4				Colors: white, green, red, yellow, blue	
→ Page 48				→ Page 25	
(Double) contact elements	4	Acoustic device	11	Joysticks	20
N/C and N/O		IP40 degree of protection without buzzer		4 positions	
Universal contacts suitable for use with electronic devices		→ Page 34		→ Page 31	
Safety function implemented with positive opening as defined in IEC/EN 60947-5-1		Buzzer for acoustic device	12	4-way pushbuttons	21
Max. 2 levels, each with 3 contact elements		Continuous tone, pulse tone		4 positions	
→ Page 49		18 - 30 V DC		Pushbuttons, momentary	
LED elements	4	→ Page 34		→ Page 32	
Voltage range: 12 - 30 V AC/DC 85 - 264 V AC		Potentiometers	13	Bezels	22
→ Page 51		Resistances of 1 kΩ - 1 MΩ		• Silver	
Convenient labeling	5	3 individual connections		• Black	
A laser inscription with any text and/or symbol can be added to all button plates, indicator lights, and add-on legend plates from the RMQ-Silver range of products.		With screw terminals		• 24 carat gold can only be ordered with M22-COMBINATION	
Download: www.eaton.eu/config/rmq Keyword: "Pushbutton Configurator		→ Page 34		→ Page 69	
→ Label Editor function"		Controlled stop/emergency stop buttons	14	Accessories	23
Enclosures	6	Tamper-proof as defined in ISO 13850/EN 418		→ Page 69	
IP67 surface mounting enclosures with up to 6 mounting locations		Can be secured with a sealable shroud		SmartWire-DT	24
IP55 surface mounting enclosures with up to 12 mounting locations		Additional labels, with inscription or blank		Product characteristics	
IP54 flush mounting plates with up to 6 mounting locations		→ Page 14		<ul style="list-style-type: none"> • Clip-fit assembly modular system • Silver, black, or gold bezel • Mounting hole diameter: 22.3 mm • Minimum grid dimension: 30 x 40 mm • Min. degree of protection: IP66 • Up to 6 contacts per mounting location • For switching differing potentials • Approved throughout the world 	
IP40 and IP55 shrouds for flush mounting plates		Indicator lights	15		
→ Page 67		Style: flush, conical			
Telescopic clip	7	Colors: white, green, red, yellow, blue			
4 positions		→ Page 33			
For adjusting the depth of rear mounting devices in CI and CI-K enclosures and cabinets		Key-operated buttons	16		
→ Page 69		2 and 3 positions

System overview

M30 4-way selector switches	1	M30 panel mount connectors	8	Telescopic clip	16
4 positions		USB 3.0		For adjusting the depth of rear mounting devices in CI and CI-K enclosures and cabinets	
With rotary head or thumb-grip		→ Page 71		→ Page 69	
0-1-0-2-0-3-0-4 maintained action					
→ Page 41					
M30 joysticks	2	M30 panel mount connectors	9	Convenient labeling	17
2 or 4 positions		RJ45		A laser inscription with any text and/or symbol can be added to all button plates, indicator lights, and add-on legend plates from the RMQ-Silver range of products.	
→ Page 44		→ Page 71		Download: www.eaton.eu/config/rmq	
M30 pushbuttons	3	RMQ-AFX	10	Keyword: "Pushbutton Configurator	
Momentary and maintained		Anti-rotation tab		→ Label Editor function"	
Flush		Included with the equipment supplied with M30 front elements			
Colors: white, green, red, yellow, blue, black					
Illuminated pushbutton actuators					
Colors: white, green, red, yellow, blue, orange					
→ Page 40					
M30 selector switches	4	Threaded rings	11	SmartWire-DT	18
2 and 3 positions		→ Page 70			
With rotary head, thumb-grip					
Programmable maintained/momentary action					
Illuminated selector switches with transparent thumb-grip					
Colors: white, green, red, yellow, blue					
→ Page 41					
M30 key-operated buttons	5	Mounting adapters	12	Product characteristics	
For individual lock mechanisms		N/C and N/O		• Clip-fit assembly modular system	
2 or 3 positions		Universal contacts suitable for use with electronic devices		• Metal bezel, flush	
Programmable momentary/maintained action and key withdraw		Safety function implemented with positive opening as defined in IEC/EN 60947-5-1		• Mounting hole diameter: 30.5 mm	
Suitable for master key systems		Max. 2 levels, each with 3 contact elements		• Minimum grid dimension: 40 x 50 mm	
→ Page 42		→ Page 48		• Min. degree of protection: IP66	
M30 indicator lights	6	Contact elements	13	• Up to 6 contacts per mounting location	
Colors: white, green, red, yellow, blue, orange		N/C and N/O		• For switching differing potentials	
→ Page 44		Universal contacts suitable for use with electronic devices		• Approved throughout the world	
SmartWire-DT encoders, M30 potentiometers	7	Safety function implemented with positive opening as defined in IEC/EN 60947-5-1			
Resistances of 1 kΩ - 1 MΩ		Max. 2 levels, each with 3 contact elements			
3 individual connections		→ Page 48			
→ Page 47					
Flat Rear contact elements	14	Flat Rear LED elements	15		
Cage Clamp with push-in terminals		Cage Clamp with push-in terminals			
→ Page 53		→ Page 53

Mounting adapters

Mounting adapter (front mounting) for 3 contact/LED elements
For M22-(C)K... contact elements and M22-(C)LED... LED elements.
Sequence numbers on mounting adapter

M22-A
216374

50 units

Mounting adapter (front mounting) for 4 contact elements,
can be used with M22-WR4, M22-D4, M22-WJ..., M22-WRJ...
For M22-(C)K contact elements

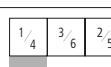

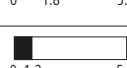

M22-A-GVP

	Description	Part no. Article no.	Std. pack
AS-Interface connection for RMQ-Titan			
For front mounting (RMQ-Titan)	AS-Interface slave Adapter element for RMQ-Titan AS-Interface information: 2 input bits, 1 output bit Module enclosure for snap-fitting on the following contact and LED elements: Inputs for 2 contact elements: M22-K01 (N/C), M22-K10 (N/O) Output for 1 LED element: M22-LED-... Including AS-Interface connector as insulation piercing terminal	M22-ASI 231269	1 unit
For base mounting (RMQ-Titan)	Adapter element for RMQ-Titan AS-Interface information: 2 input bits, 1 output bit Inputs for 2 contacts Output for 1 LED element: M22-LED-...	M22-ASI-C 231271	1 unit
For surface mounting enclosures (RMQ-Titan)	External connections: 4 inputs/4 outputs (for RMQ contact and lamp socket elements.) RMQ-Titan surface mounting enclosures: M22-I3, M22-I4, M22-I6	RMQ-M1C-ASI 032314	1 unit

For front mounting	AS-Interface slave Adapter element for RMQ-Titan AS-Interface information: 1 dual-channel input, 1 output Module enclosure for snap-fitting on the following contact and LED elements: Inputs for 2 contact elements: M22-K01 (N/C) Output for 1 LED element: M22-LED-... Including AS-Interface connector as insulation piercing terminal	M22-ASI-S 231270	1 unit
Emergency stop interfaces for AS-Interface for safety monitor			
For base mounting	AS-Interface slave Adapter element for RMQ-Titan or FAK AS-Interface information: 1 dual-channel input, 1 output for the following RMQ-Titan contact and LED elements: Inputs for 2 contact elements: M22-K01 or M22-K01 (N/C) Output for 1 LED element: M22-LED-...	M22-ASI-CS 231272	1 unit

Engineering**M22...SMC10**

- ① The self-monitoring contact mechanically monitors the connection on the M22-PV...
 ② The self-monitoring contact mechanically monitors the connection on the M22-K...SMC10 safety contact above it; but not the connection on the M22-PV...

**M22-K01SMC10
M22-KC01SMC10****M22-K02SMC10
M22-KC02SMC10**

When the self-monitoring contact is mounted correctly, the N/O contact is closed.
 The emergency stop/controlled stop circuit will be activated by means of an N/C and N/O connected in series if:

- The emergency stop/controlled stop button is pressed OR
- The self-monitoring contact is mechanically separated from the pushbutton

1x M22-XC-R → Page 30

**Plunger bridge for the middle contact on M22(S)-W...3-...
3-position selector switches****Customized inscription for devices using the Label Editor function
in the Pushbutton Configurator**

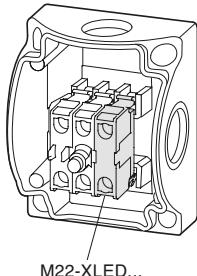

To add a custom inscription to your device, simply follow the four steps below:

- Open the Pushbutton Configurator by visiting: www.eaton.eu/config/rmq
- Create your label template (the software features menus to guide you through the process)
- Send the label template to the factory by e-mail. The program will automatically set the e-mail address based on the selected product. When you send your template, the Pushbutton Configurator will automatically assign it a filename such as "RMQ_Titan_12345.zip". This filename is part of the article no. that needs to be used when ordering (see ordering examples)
- Send the order to the Eaton sales office or the appropriate electrical wholesale distributor

RMQ *compact* solution Simple. Reliable. Compact.

Download the brochure
by visiting the product page
www.eaton.eu/RMQcompact

The C22 and C30 RMQ *compact* solution series combine connection cables with or without a plug connection together with signaling and operator elements into a single device. This turns them into an all-in-one solution that provides full protection against dust, fine foreign particles, and liquids, for example. Thanks to a high degree of protection of up to IP69K in the front and IP65 in the back, these devices are perfect for direct installation in applications such as woodworking machines and similar machine tools.

RMQ *compact* solution devices feature a sleek design that enhances machines, systems, and a broad range of additional applications. Whether you decide on our traditional C22 design or on the flush C30 version, you can rest assured knowing that we have a solution for every application out there.

The RMQ16 Series Squeezes Signaling and Control into a Tiny Space

www.eaton.eu/rmq16

Square RMQ16 pilot devices with sizes of 18 mm and 25 mm are the perfect solution for control interfaces where space is at a premium. The various front elements can be installed with a perfect fit in any of their possible four directions and, thanks to their IP65 degree of protection in the front, are the perfect choice for safe use in harsh conditions. The series is not only characterized by a wide range of indicator lights, pushbuttons, selector switches, and key-operated switches, but its label editor function within the Pushbutton-Configurator also makes it possible to get customized laser inscriptions. The LED lamps and the contact elements in the series are connected using 2.8 mm x 0.8 mm female push-on connectors.

RMQ16 emergency stop buttons are tamper-proof in compliance with ISO 13850 / EN 418 and have a pull-to-reset mechanism. They can also be used as emergency switching off buttons.

Product features

- Front dimension and minimum grid dimensions 18 x 18 mm or 25 x 25 mm
- Mounting hole diameter 16.2 mm to EN 50007
- Degree of protection IP65
- For switching differing potentials
- Suitable for use with electronic devices to IEC/EN 61131-2
- Technical data according to IEC/EN 60947-5-1
- Approved throughout the world

Foot and Palm Switches for Universal Use in all Kinds of environments

The large actuation surface on our heavy-duty FAK foot and palm switches makes them both intuitive and quick to use. In addition, they feature a tamper-proof design, preventing tampering during use. FAK devices can be actuated by hand, fist, elbow, or foot, ensuring that quick action can be taken to protect personnel and property whenever necessary. Finally, a high degree of shock resistance and extremely high IP67, IP69K degrees of protection make FAK units the ideal device for rugged applications.

FAK foot and palm switches with a red actuation surface on a yellow background are approved for use as emergency stop buttons. They perfectly match the characteristics required in DIN EN 60204, Safety of machinery – Electrical equipment of machines, and meet all relevant requirements. Moreover, the devices are tamper-proof (see IEC 60947-5) and feature positive-opening contacts (see IEC 60947-5-1).

Signal Operating States Quickly, Clearly, and Flexibly

SL7/SL4 signal towers configurator
www.eaton.eu/config/SL

SL4 and SL7 signal towers are used to continuously signal operating states for machines, systems, and processes. Their scope of application is extremely wide-ranging, going from production, through logistics, all the way to retail. This is in no small part thanks to the fact that the fast and clear signaling they provide ensures smooth and safe operation in any environment.

The light and acoustic modules in the series can be configured flexibly both in terms of volume and of the specific visual signals they emit. This versatility is only further enhanced by the signal towers' high-performance LEDs, which ensure that visual signals are recognized even under adverse light conditions. Moreover, a high IP66 degree of protection makes it possible to use the signal towers in demanding environments, such as outdoors.

With a diameter of 40 mm / 70 mm, SL4 and SL7 signal towers feature extremely compact dimensions designed to save space. In addition, only a few steps are required in order to quickly and easily install and remove them, which can prove to be a tremendous advantage when packing and transporting control panels or machines.

Connecting the signal towers to a SmartWire-DT communication system cuts down on wiring time and reduces the number of digital outputs required from your PLC. This, combined with the fact that data from the switchgear connected with SmartWire-DT will be processed in your PLC, ensures that operating states such as impending overloads will be detected and signaled with the signal towers immediately. The result? A marked increase in your systems' availability.

Degree of protection IP66		Acoustic module	5b	Base module with base adapter for slipping onto place (rapid mounting and wiring system)	6i
Operating mode: 100% DF (duty factor)		Multi-tone (8 tones) - adjustable with internal dip switch		Aluminium tube 100 mm, 250 mm or 400 mm	
→ Page 163		Frequency 500 - 2700 Hz		→ Page 165	
		→ Page 164			
Module with LED, flashing light	3	Acoustic module	5b	Base module with aluminum tube and screw fixing	6j
Easy mounting with bayonet mount		Continuous tone or pulsed tone - can be actuated externally; takes up 2 inputs (2 modules)		Aluminium tube 100 mm, 250 mm or 400 mm	
Modules can be arranged in any order		Frequency: 2800 Hz		→ Page 165	
Max. 2 x 5 modules that can be actuated individually (two with base module SL7-CB-D only)		→ Page 164			
Degree of protection IP66		Base module with base adapter for slipping onto place (rapid mounting and wiring system) and SmartWire-DT connection	7		
Operating mode: 100% DF (duty factor)		Continuous tone or pulsed tone - can be actuated externally; takes up 2 inputs (2 modules)		Aluminium tube 100 mm	
Flashing frequency 2 Hz		Frequency: 2800 Hz		→ Page 165	
→ Page 161		→ Page 164			
Module with LED, strobe light	4	Base module for mounting on both sides	6a	Accessories	8
With a fixed flashing frequency 1.4 Hz		Easy mounting with bayonet mount		Magnetic base including M20 cable gland	8a
With LED for effective signaling effect with various flashing sequences (flashing frequency 1 - 2.6 Hz)		Degree of protection IP66		For vertical mounting	
Easy mounting with bayonet mount		With cover plate		→ Page 157	
Modules can be arranged in any order		With Push in terminals			
Max. 2 x 5 modules that can be actuated individually (two with base module SL7-CB-D only)		→ Page 166			
Degree of protection IP66		Base module for vertical mounting on one sides	6b	Mounting bracket	8b
Operating mode: 100% DF (duty factor)		Plug-in connection M22		For vertical mounting	
→ Page 162		→ Eaton Online Catalog		→ Page 157	
		Base module can hold tubes	6c		
		→ Page 165			
		Base module with external fixing holes	6d	Accessories	8c
		→ Page 165		Tool for replacing filament lamp	
		Base module one-sided with bracket	6e	Filament lamp	
		→ Page 166		→ Page 157	
		Base module with internal (on the inside) fixing holes	6f

The RMQ C22 Series: Powerful Functionality with a Compact Design

Download product range catalog
„C22 compact portfolio“
www.eaton.com

RMQ C22 pilot devices are not only characterized by compact dimensions and a conventional screw connection, but also feature the same design that has made units such as our M22 modular pushbuttons stand the test of time. C22 devices are built as monolithic units with an “all-in-one” focus that combines contacts and lamps in a single housing.

In addition to a comprehensive selection of operators and selector switches, the C22 product portfolio also includes emergency stop buttons in a variety of versions, including lockable units.

C22 devices combine multiple components in a single device. This compact design means that only one article no. is required, making product selection and ordering much easier and faster. On top of this, these devices have an extremely long mechanical life and are suitable for worldwide use.

XV HMI/PLC: Easy and Convenient Operation for a Rapidly Changing World

Eaton's XV HMI PLC touch panels comprise a range of products that has been fine-tuned to perfection and can be seamlessly integrated into a variety of performance classes. Capacitive, resistive, and infrared touch technology devices are available in display sizes ranging from 3.5" to 15" with a plastic, metal, or stainless steel housing. Moreover, an on-board SmartWire-DT master interface makes it possible to achieve significant savings all the way from the hardware planning stage through commissioning.

With its multi-touch display HMI PLC units, the XV300 series has opened a whole new world of intuitive and convenient operation. These panels feature the same ease of use as modern mobile devices, such as smartphones and tablets, but upgraded for industrial applications.

Combined with a small mounting depth, the completely flat, anti-reflective, and tempered glass panel in XV300 units ensures that these devices not only meet the most demanding design and hygiene requirements, but are also ideal for use in harsh industrial environments.

Control and Signaling in Hazardous Locations

Products and Brochures

CEAG products from Eaton's Crouse-Hinds series include signal and control devices for a reliable operation in harsh environments.

Enclosures in high degree of protection (IP66) are available in impact-resistant plastic, glass fiber-reinforced polyester, light alloy or stainless steel with a high resistance to chemicals.

The portfolio includes explosion-protected built-in components designed for panel mounting and use in zones 1 and 2. In addition to control units, it also includes signal lamps, pushbuttons, and switches. Moreover, the switch and pushbutton top parts can be combined with various contact systems.

Control units are available in enclosure solutions that make them suitable for use in zone 1, 2, 21, and 22. Up to three built-in components can be installed in each enclosure. Even the light alloy and stainless steel enclosures are particularly characterized by high mechanical and thermal resistances.

Explosion-protected built-in components

The use of CEAG signal and control devices for panel mounting applications is approved for panel thicknesses of up to 5 mm. The panel built-in devices, signal lamps, pushbutton, and switch bases can be installed in a matter of seconds by using the bayonet mount on the devices. Single-wire installation is easy and clear. Slip-on strain-relief fittings and protective caps for the cable connections can be retrofitted on all panel mounting devices, at which point the devices become fully certified units.

This approach eliminates the need to configure and keep spares of panel built-in devices with different cable lengths.

Built-in components for control units

The variety of built-in components available means that custom-tailored control units for specific customers can be put together within the scope of type examination. The switch and button top parts can be combined with a variety of contact systems as necessary.

Explosion-protected control units

Enclosure solutions made of low-temperature impact-resistant thermoplastic, high-quality die-cast aluminum (AISI), or stainless steel (AISI 316) are available. The well-engineered design behind the plastic housing makes it possible to achieve an optimum cable connection thanks to the fact that the side panels are drawn deeper.

In order to make cable routing easier, the built-in components can be snapped out from the housing.

Mounting openings can be left unused so that certified genuine CEAG components can be retrofitted as necessary. In this case, the openings will be sealed at the factory with blanking elements.

Assortment

The explosion-protected pilot devices are available as pushbuttons, double pushbuttons, mushroom-head pushbuttons, emergency stop mushroom-head pushbuttons, key-operated pushbuttons and LED signal lamps with a number of designs. In addition, a variety of accessories, including label plates and protective caps, are available as well.

In the case of explosion-protected control units, the built-in components are installed inside an enclosure, making them suitable for use in zone 1 and 2 explosive gas areas and zone 21 and 22 explosive dust areas. The corresponding enclosures made of plastic, light alloy, or stainless steel feature a high degree of protection (IP66).

Explosion-protected built-in components

for zone 1 and 2

Pushbuttons

Mushroom-head pushbuttons

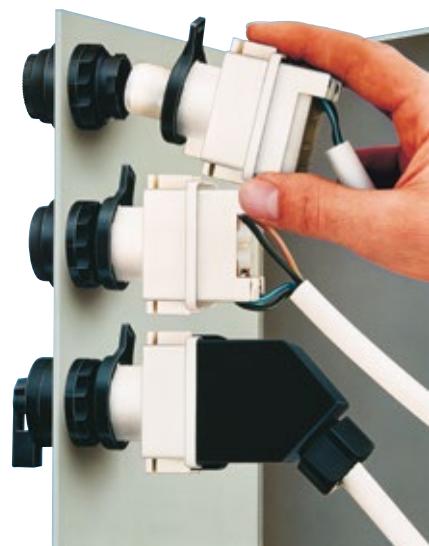

Key-operated actuators

Signal lamp

Eaton Crouse-Hinds products are suitable for use in harsh and demanding environmental conditions.

Quick and easy installation of built-in components in control panels.

Our Service – Your Benefit

See More, Do More

- We increase your profits
- We improve your productivity and quality
- We reduce your total cost of ownership
- We simplify your sourcing and ordering processes
- You can focus on your core competencies
- Environmental benefit:
We minimize your packaging and transportation effort

VAS-EMEA@eaton.com

Basic Services

- Dispatch notification
- Customized labels / barcodes
- Kitting – all variations / different possibilities
- Customer-specific packaging

Warehouse Services

Integrated Solutions

Assemblies

- Product assemblies
- Product combinations incl. wiring
- Products in enclosures / on DIN-rail / mounting plate
- SmartWire-DT solutions
- Pre-programmed soft starters / HMI's / PLC's

Customized Solutions

Workshops / Innovation

- Workshops with Value Analysis/Value Engineering approach

With our Value Added Services you can save up to 40% of your costs!

To find the right contact person

At Eaton, we believe that building and maintaining strong relationships with our customers is something that deserves our undivided attention.

That is why you can rest assured knowing that you will be able to count on us for every project from the very start. Simply contact us to get personalized one-on-one advice. To quickly and easily find the appropriate contact, please refer to the contact addresses below.

In just a few steps, we will get you the contact information for the person or team in charge of support for your specific industry in your region.

To find the right contact person anywhere in the world, visit:

Eatons After Sales Service

Eaton is known for its unparalleled after-sales support for low-voltage switchgear, switchgear systems, and services. For more detailed information, as well as to view our terms and conditions, please visit www.eaton.eu/aftersales

Europe, Middle East, Africa 24/7

Hotline

For immediate support please call +49 (0) 180 5 223822* (24/7). You will receive competent and fast, round the clock assistance, with unplanned machine and system stand stills, system malfunctions and device failures.

(* 0.14 Euro per minute from the Deutsche Telekom AG network)

Helpdesk

Eaton specialists: +49 (0) 228 602 3640 (Monday–Friday from 08:00–16:00 CET) or contact your local Eaton representative.

We offer extensive support from commissioning to application queries as well as in the area of fault analysis, which can also include remote diagnostics.

We can also offer you an individual consulting service contract which is tailor-made to suit your requirements.

If you would like to communicate your service queries in writing, please use the following e-mail address:

AfterSalesEGBonn@eaton.com

At Eaton, we're energized by the challenge of powering a world that demands more. With over 100 years experience in electrical power management, we have the expertise to see beyond today. From groundbreaking products to turnkey design and engineering services, critical industries around the globe count on Eaton.

We power businesses with reliable, efficient and safe electrical power management solutions. Combined with our personal service, support and bold thinking, we are answering tomorrow's needs today. Follow the charge with Eaton. **Visit eaton.eu.**
